Season 1, Episode 1:Order of the Stone Season 1, Episode 4: A Block and a Hard Place The Wither Storm is a Mutant Wither found in Minecraft: Story Mode. It was created by building a Wither with a command block instead of middle soul sand and absorbing blocks and mobs to increase in strength. When it was created, Wither Storm resembled a regular Wither, with a command block attached to it, but so began to suck blocks toward it, eventually became a giant creature with long, strong tentacles, 3 heads, bright purple eyes, and large, glowing teeth. The Wither Storm look has some similarities to regular Wither. Storm Wither is a massive monster that resembles a floating island, with three huge heads that each have two rows of teeth. Each head has a huge purple eyeball that can pull a tractor beam that sucks into anything from blocks to mobs. It also has five (or more) tentacles. It has the same abilities as a normal Wither, but it seems to have the power to absorb blocks, which makes the beast stronger. History In the game, Minecraft: Story Mode, Wither Storm appears as the main antagonist of the first four episodes. Storm Wither was created by Ivor, scheduled to follow the Order of the Stone' amlet, and was intended to be used to downgrade Gabriel the Warrior. However, due to some incidents, the plan turned against Ivor, when Ivor lost control of the storm wither and became unstoppable as he began to absorb the surrounding blocks, turning into a colossal beast with several weapons that destroys everything in the path of the amelet. In The Last Place You Look, Storm Wither is believed to have been killed by the Formidi bomb. However, the explosion did not destroy the command block, and the beast rebuilt itself. Two smaller duplicates of The Wither Storm and one main of the Wiltstorm (the one with the command block) were formed as a result. Storm Wither was eventually killed by Jesse in A Block and a Hard Place when the command block was destroyed with their enchanted weapon. Quote from jonathanpecany» I tried google it, but no one realized the command yet I bet people are trying to figure out the command yet that why I need your advice what commands it might be, so I could combine everyones and try to make a storm withering. To test this theory, I Googled it. I found this video in 30 seconds. It's 20 times more than a fading boss, and also much stronger. This is the ultimate goal for those who consider themselves to be good fighters and want to know how far their skills can accept them. If you decide to fight a deadly battle, then you're just an arrogant fighter. This is such a cool way and definitely one of the craziest in the world, especially when you have to go and kill him. Wither Storm Mod is by far one of my favorites in the minecraft Mods game. Screenshots: Crafting Recipes: Installs: Make sure you have already installed Minecraft Minecraft Locate the Minecraft app folder. In windows open Run from the start menu, type %appdata% and click Run. On the open finder mac, hold down ALT and then click Go Library in the top menu bar. Open the App Support folder and search for Minecraft. Place the way you just downloaded (.jar file) in the Mods folder. When you launch Minecraft and click the mods button you should now see the mode is installed.
