The phone on the following image view shows the primary external functions and phone keys. Phone Basics 2 Key Functions ● Smart Sonic Receiver allows you to hear callers and automated prompts. Place your ear around the inner receiver and adjust the position of the phone to find the best hearing point, depending on the surroundings. Note: Do not cover microphones during a call. Do not use any sheet or label in the display area as it may compromise hearing quality. Phone Basics 3 ● The main screen displays all the information needed to manage your phone, such as call status, Contacts list, date and time, and signal and battery strength. ● Soft keys (/) allow you to select key actions or menu items that correspond to the lower left and right bar on the main screen while the phone is open. ● The navigation key allows you to scroll through the phone menu options. ● MENU/OK ( ) allows you to access your phone's menus and selects the selected selection when navigating the menu. ● The CAMERA key ( ) allows you to activate the camera or video mode, and take photos and videos with your phone open. Note: The Camera function is not available in all models. ● Send key ( ) allows you to place or receive calls, answer On call waiting, or use 3-way Calling. ● The CLR key ( ) deletes characters from the screen in text input mode. menu, press it back to the previous menu. This key also allows you to return to the previous screen in a data session or activate voice commands. ● The speaker key ( ) allows you to make or receive calls in speaker mode. When you receive an incoming call, press and hold to answer the call in speaker mode. During a call, press to turn the speaker on or off. ● THE END/PWR key ( ) allows you to turn the phone on or off, end the call, or cancel the entry, and return to standby mode. ● The keyboard allows you to enter numbers, letters, and characters and perform functions. ● The external speaker key allows you to install or receive calls in speaker mode, turn the speaker on and off during a call, activate voice commands, or unlock the lock. ● The call list key allows you to display a recent call history or end a call. ● The speaker allows you to hear different ringtones and sounds. The speaker also allows you to hear the caller's voice in speaker mode. ● The camera lens allows you to take pictures and videos. Note: The Camera function is not available in all models. ● The secondary microphone suppresses background noise that improves the sound quality for the other party during a voice call, except in speaker mode. Phone Basics 4 ● Flash helps to illuminate people in a low-light environment when recording or recording a video. It can also act as a lamp. Look at the Flashlight. ● The outside screen displays information such as call status, date and time, signal and battery strength. ● The primary microphone transmits your voice and ambience during voice, voice, and video. ● The internal antenna allows you to receive and download. To increase performance, do not interfere with your phone while using your phone. ● The microSD card slot (internal) allows you to insert a microSD card to support external memory. The microSD drawer is for the battery. See Replacing a microSD card. Note: The phone is available with an already installed microSD card. ● The sim card slot (internal) allows you to insert a SIM card. It's a sim drawer for the battery. See Change your SIM card. Note: The phone is available with a sim card

already installed. ● The battery cover opens the battery cover to replace the battery. Note: The battery cover screw is permanently mounted on the cover and cannot be removed. ● The volume key allows you to adjust the ringing volume in standby mode or the volume during a call. ● USB/charging ports allow you to connect your phone and USB cable for use with a charging adapter or other compatible accessories. ● The Jack headset allows you to connect optional headphones for handy, hands-free conversations. Caution! Inserting an add-on into the wrong plug may damage your phone. Phone Basics 5 You must first install and charge the battery to start setting up your phone. Insert battery use coin to turn the battery cover screw on the back of the phone counterclockwise 1 times to unlock the back cover. Note: The battery cover screw is permanently mounted on the cover and cannot be removed. Insert the nail into the slot at the bottom of the back cover and gently lift the cover of the 2.battery. First, insert the battery, the contacts end and gently press the site. 3. Phone Basics 6 Replace the battery cover and make sure all tabs are secure and there is no gap 4.around the cover. Use coins to rotate the battery cover clockwise until the cover locks. 5.Charge the battery fully before charging the phone. Important: Disconnect the charger from the power outlet if it is not used to reduce the impact of charging on the environment Open the USB/Charging port cover on the left side of the phone. 1. Connect the smaller end of the USB cable to the USB port/charging phone. 2. Connect the other end of the USB cable to the charger and then connect the charger to the 3.electrical outlet. Make sure you use the charger that you charged with your phone. When charging is complete, remove the cable from the door and close the cover. Press 4.around the edges of the lid to ensure that it is securely closed. Warning: Only use an approved charger to charge your phone. Improper handling of the charging port and use of an incompatible charger may cause damage to the device and invalidate the warranty. Phone Basics 7 Replace sim card Your phone comes with a pre-installed SIM card. If you need to change your SIM card, follow these steps. Remove the battery cover and battery. 1. Scroll the SIM card holder in the direction of the arrow to unlock it (1). 2. Lift the SIM card holder with your finger and remove the original SIM card (2). 3. Insert a new SIM card with the Verizon logo facing up and the cut-off angle to the right of 4.below (3). Close the SIM card holder and slide the holder into the locked position. 5. Put the battery back in its compartment and replace the battery cover. 6.Warning: Make sure that all doors and lids are closed properly to maintain the waterproof performance of the phone. Phone Basics 8 Replace the microSD card Your phone is already installed with a 4 GB microSD card. If you need to replace the microSD card, follow these steps. Remove the battery cover and battery. 1. Scroll the microSD card holder in the direction of the arrow to unlock it (1). 2. Lift the microSD card holder with your finger and remove the original microSD card 3. (2). Insert a new microSD card into the gold contact holder facing you (3). 4. Gently close the card holder and then slide the holder into the locked position. 5. Put the battery back in its compartment and replace the battery cover. 6.Note: The microSD card can be easily damaged by incorrect operation. Please be careful. inserting, removing or handling a microSD card. Turning your phone on and off The instructions below explains how to turn your phone on and off. Turn on the phone ► Open the phone and press and hold the END/PWR key until the screen lights up. Switching off the phone ► Open the phone and press and hold the END/PWR key until the screen turns off. Phone Basics 9 Set Up Voicemail Set voicemail and personal greeting as soon as the phone is activated. Always use a password to protect against unauthorized access. Your phone automatically downloads all calls without replying to voicemail, even if your phone is in use or turned off. Set up Voice Mail Press and hold from the home mail screen. 1.-or- On the Home page screen, select *86 and press . When you hear a greeting, press to stop. 2. Phone calls 18 Call Using a call speed dial speed allows you to contact friends and family more easily. For information about assigning speed dial numbers, see Set up a speed call. To use a 2-9 location speed call: ► On the Start screen, press and hold the corresponding key for about two seconds. To use a speed dial for locations 10-999: ► On the home page screen, press the first number(s) and press and hold the last number for about two seconds. Tip: You can also enter assigned speed dialling numbers, and then press . Call your phone number With redirects You can call or save phone numbers with redirects for use with automated systems, such as voice mail or credit card billing numbers. There are two types of breaks on your phone: ● 2-Sec. A pause after two seconds automatically sends the next set of numbers. ● Wait for the confirmation to send the remaining numbers when you reach it. Note: In the phone number, you can have multiple redirects and combine two seconds and hard redirects. To make a call or save phone numbers from switch: Enter all or part of the number. 1. Press the right soft key [Options] > add 2-sk. Pause or Add wait. 2. Enter additional numbers. 3. Press to dial the number. 4.– or – Press the left soft [Save] button. (You can save to a new or existing contact entry.) Call emergency numbers You can also place 911 numbers if your phone screen is locked or your account is Phone calls 19 ► Phone 911 and press . Improved 911 (E911) Information This phone has a built-in global positioning system (GPS) chip needed to use emergency location services where available. When you submit a 911 emergency call, the GPS feature on your phone looks for information to calculate the approximate location. Depending on several variables, including availability and access to satellite signals, it may take up to 30 seconds or more to determine and report your approximate location. Important: Always report your location to the 911 operator when making an emergency call. Some named emergency call recipients, known as Public Security Response Points (PSAP), may not be equipped to receive GPS location information from your phone. Receive phone calls You can choose the most appropriate way to respond to a call. Your phone notifies you of incoming calls in the following ways: ● The phone rings or vibrates. ● The led indicator flashes. ● Backlight. ● An incoming call message is displayed on the screen. If the incoming call is from a number stored in contacts, the name of the entry is displayed. If available, the caller's phone number may also be displayed. Note: If your phone is turned off, all calls are automatically opened in voicemail. Note: Your phone will answer the incoming call by opening the phone by default. To change the setting, see Answer options. Answer an incoming call ► Press to answer an incoming call. (Depending on the settings, you can also answer incoming calls by pressing other keys. See Answer options.) Answer incoming calls in speaker mode ► Press and hold . Disconnect the phone call ► Press . Phone call options Your phone app offers a number of useful features and options to help you make the most of your call experience. Call options Press the right soft [Options] key during a call to display a list of available call functions. To select an option, select and press . ● Send messages to create a new message. ● Contact list to display your contact list. ● Recent calls to show recent incoming, outgoing, or missed calls. ● Bluetooth menu to display the Bluetooth menu. After connecting to a Bluetooth device, select the Sound switch to switch the phone or sound to the device. ● Main menu to display the main menu of the phone. ● Notepad to open notepad. Phone calls 21 ● Voice privacy to enable or disable enhanced privacy mode. Additional options may also be available. ► Press the left soft [Mute/Shut down] key to turn the microphone off or off. ► Press volume up or down to adjust the volume of the receiver. ► Press to turn on the speaker. Press again to turn it off. Caller Name ID The name ID recognizes the caller before you answer your phone to display the incoming call number. If you don't want to display a number when you make a call, follow these steps. On the Home screen, type *67. 1. Enter the number you want to call. 2. Press . 3.Call Waiting When you are on a call, Call Waiting alerts you to incoming calls by hearing two audio calls. Your phone screen lets you know that another call is coming and displays the caller's phone number (if available). To respond to incoming calls when you are on the call: ► Press . This put the first caller on hold and answered the second call. To switch back to the first caller: ► Press again. Note: For those calls where you don't want to be interrupted, you can temporarily disable Call Waiting by typing *70 before submitting the call. Call waiting automatically reactivates when you end the call. 3-Way Calling With a 3-way call, you can talk to two people at once. When using this feature, the normal air time rates are charged for each of the two calls. Enter a number and press . 1. Phone calls 22 When you connect, press . This puts the first caller on 2nd hold and calls the second number. Press the right soft key [Options] > contact list or recent calls. 3. Select a number from contacts or recent calls, and press . 4. When you are connected to another party, press again to start the 3-way call. 5. To end the 3-way call, press . 6.Note: If one of the customers you called cancels during a call, you and the remaining customer remain connected. If you triggered the call and you stopped the first one, all customers are disconnected. Forwarding calls lets you forward all incoming calls to a different phone number— even when your phone is turned off. After you activate call forwarding, you can continue to make calls from your phone. Note: A higher rate will be charged for calls you forwarded. To activate call forwarding: On the home screen, type *72. 1. Enter the dialing code and phone number you want to forward calls to. 2. Press . You will hear tones to confirm the activation of the forward call. 3.To to deactivate call forwarding: On the Start screen, type *73. 1. Press. You'll hear tone to confirm the deactivation. 2. Phone calls 23 Recent calls Recent calls keep track of calls that have been received, received and missed on your phone View Recent calls ► From the home screen, press . 👇 You can specify whether the entry was an incoming, outgoing, or delayed call from the icons below. = Incoming call = Outgoing call = Options for late calls from recent calls ► To make calls from the Recent calls list, see Call from recent calls. For additional options: On the Home screen, press . 1. Select the entry and press the right soft key [Options] to display the list of options: 2.👇 Details for input information if it has already been stored in contacts. 👇 Save to contacts to save the phone number to your contact list. 👇 Delete to delete an entry in recent calls. 👇 Lock/unlock to lock or unlock the entry to prevent accidental deletion. 👇 Delete all to delete all entries from recent calls. 👇 View timers to show the duration of the last call, all calls, calls received, calls you dialed, roaming calls, etc. Phone calls 24 Call settings In the call settings menu on your phone, you can configure voice mail options and many other settings for the phone app. Answer options Select how to answer incoming calls on your phone. From the home screen, press > Settings & tools > Calling settings > Reply 1.Options. Select one of the following settings: 2.👇 Open to answer calls when the phone opens. 👇 Each call response key when you press any key. 👇 Automatically use Handsfree to automatically answer calls after 5 seconds. Press [MARK]. 3. Press the left soft key [Done]. 4.Automatically retry with auto trial enabled, the phone automatically dials the number that failed to connect it to. From the home screen, press > Settings & tools > calling settings > try automatically. 1. Select 10 seconds, 30 seconds, 60 seconds or Turn off 2. Press [SET]. 3.TTY Mode A TTY (teletiptic machine, also known as TDD or Text Phone) is a telecommunications device that allows people who are deaf, auditory or have voice or language disorders to communicate over the phone. The phone is compatible with the selected TTY devices. Check with the TTY device manufacturer to ensure that it supports digital wireless transmission. The phone and tty device will connect to a special cable that connects to the phone's audio outlet. If this cable was not available on your TTY device, contact the TTY device manufacturer to purchase a connecting cable. To turn TTY mode on or off: Phone calls 25 From the home screen, press > Settings & tools > Call settings > TTY mode. 1. Select one of the following settings: 2.👇 TTY Full to enable all TTY settings. 👇 TTY + Talk (VCO) to enable TTY mode in Voice Transfer mode, which allows you to send voice and receive text during a call. 👇 TTY + Hear (HCO) to enable TTY mode in hearing transfer mode, which allows you to send text and receive voice during a call. 👇 TTY Switch off to disable TTY mode. Press [SET]. 3.Note: If enabled, TTY mode may undermine the sound quality of devices other than TTY associated with the audio plug. Warning: 911 Emergency call It is recommended that TTY users call in an emergency by other means, including telecommunications relay services (TRS), analogue and stock communications. TTY wireless 911 calls may be damaged when they are received by public safety call points (PSAP), which makes some communications incomprehensible. The problem appears to be related to TTY TTY software used by PSAP. This matter has been pointed out by the FCC, the wireless industry and the PSAP community are currently working to resolve this. One Touch Dial This feature allows you to enable or disable the speed dialing feature. On the Home screen, press > Settings & tools > Call settings > One Touch 1.Dial. Select On or Off and press [SET]. 2.Voice privacy You can provide enhanced privacy mode. From the home screen, tap > Settings & tools > Call settings > Voice 1.Privacy. Select On or Off and press [SET]. 2. Phone calls 26 DTMF Tones Follow below steps if you need to change DTMF tones. From the home screen, press > Settings & tools > Call settings > DTMF tones. 1. Select Normal or Long and press [SET]. 2.Call assistance Supported calling makes it easy to make international calls while roaming in other countries. Your default reference country is set to the United States. On the Home screen, press > Settings & tools > Calling settings > call help 1.Calling. Press the navigation key left or right on 2 using the Call Assistance help box on 2.Select On or Off. When you select On, press the navigation key down to select the Country reference 3. check box, and then press left soft [Set]. Select the country whose settings you want to set to the default values. 4.👇 To change the settings, press the left soft key [Details] to edit the country label, international dial prefix (IDD), national dial prefix (NDD), area/city codes, and national number length. Press [SET] to save the settings. 5.Hearing aid Your phone has been tested and evaluated for compatibility of hearing aids. To use this feature effectively, set the hearing aid option to On. On the Home screen, press > Settings & tools > Call settings > hearing aid. 1. Select On or Off and press [SET]. 2. Contacts 27 Contacts Your phone's contacts help you stay in touch with family, friends, and colleagues by following all their contact details. This section explains how to use contacts on your phone.
