rivers of Asia List of oceania rivers List of rivers drawn from the river Nile is the longest river in Africa and in the world with a length of 6,650 km (4,132mi) flowing northward from Burundi through Rwanda, Uganda, South Sudan, Sudan, Ethiopia and Egypt on their way to the Mediterranean Sea. Its
coordinates are the following 18.4500° N, 33.3833° E Google Map Highlights River Nile is a famous International River because the longest in the world River Nile flows from south to north Form is three main tributaries. White Nile, Blue Nile and Atbara. The Nile is considered Egyptian blood because most
of the country's population lives in the Nile Valley. Fishing activities: There are a number of fish species in this river, including Tilapia, this is the potential for water games like rafting. Agriculture: A lot of agriculture is happening in the Nile Valley. Some parts of the river are Navigable River has the potential
to support agricultural farming through irrigation Wildlife: Rijeka supports a lot of wild animals including hippos, crocodiles and many species of birds and animals Rijeka is tapped in numerous energy production sites and has the potential to produce more energy. Vegetation Rijeka supports various types
of vegetation including papyrus, plume thistle, methomile, blue Egyptian water lily and poppy opium part of the river The total navigable area for the River Nile is 1,545 km. The Nile Energy River has the potential to produce energy for the countries it passes through. The Nile supplies energy as follows;
Burundi – 20mwEgypt – 40 mwEthiopia- 13,947 mwRwanda – 20 mwSouth Sudan - mwSudan – 3,280 mwUganda -4,343 mw Congo River is the second longest river in Africa and the deepest river in the world with measured depths of more than 220 m (720 feet). It is the
second largest river in the world in the amount of water dropped and the ninth longest in the world with a length of 4,700 km (2,922 we). The river flows through Angola, Cameroon, the Central African Republic, the Democratic Republic of congo and the Republic of congo. Congo River springs are located
in the mountains and highlands of the East African break, as well as on Lake Tanganyika and Lake Mweru. Congo River coordinates are as follows; 6.0792° S, 12.4500° E Highlights Rijeka and its tributaries flow through the congo rainforest, the second largest rainforest area in the world Rijeka has the
second largest stream in the world River steamers operate all year round between Kinshasa and the Kisangani Congo River is the largest potential source of hydroelectric power plant Kinkole is a small fishing port 40 kilometers away from the center of Kinshasa. With its lively fish market Activities
generating hydropower Tourism: River Congo is the most exposed tourist attraction in the country. The river separates the two Congose – Kinshasa and Brazzaville Palm Oil Production Transport: the Congo River is an important navigation system in Africa, available in all seasons of toads with a capacity
of between 800 and 1,100 tonnes Fishing: Elephants dominate, followed by cichlids, characini and Distichodontidae Agricultural activities Caesalpiniacea vegetation: trees and shrubs consisting of about 150 genera and 2,200 species. The leaves are prescribed, an alternative and mostly pinnately
compound. Okoumé trees: Trees grow to a length of 30 to 60 meters with a diameter of 60 to 200 cm. Okoumé- has a fairly soft Papyrus tree: Many papyrus swamps are found on the Congo River and in places containing several rivers, nine lakes, extensive rainforests and flooded grasslands Navigable
from the Congo River is navigable in parts, especially between Kinshasa and Kisangani. The Congo River and its insouciaries are 2,000 miles (3,000 km) in waterways. Congo River National Parks flows through a number of national parks that include; Salonga Salonga National Park is the largest tropical
rainforest reserve in Africa. Located in the heart of the Congo River's central basin of 36,000 km <sup>2</sup> Of wildlife in the Congo River and rainforest are home to nearly 400 species of mammals such as pygmy hippopotamus, The 1,000 species of birds, 216 species of amphibians, 280 species of reptiles and
more than 900 species of Energy Inga Brana butterfly on the Congo River have a potential capacity to generate up to 40,000 MW of electricity for the country. The Niger River is the third longest river in Africa, the main river of West Africa and the eleventh longest in stretches for
about 4,200 km (2,611 we). The river flows through: Algeria, Burkina Faso, Benin, Cameroon, Chad, Côte d'Ivoire, Guinea, Mali, Niger and Nigeria. Its main tributary is the Benue River. Coordinates of 05°19′34N 06°28′15E / 5.32611°N 6.47083°E Google map Highlights the third longest river in Africa Its
main tributary is the flood of the Benue Niger River annually; it begins in September, peaks in November and until May Rijeka is famous for its unique route which is; The river flees from the sea to the Sahara Desert, then makes a sharp right turn near the ancient city of Timbuktu Activities Transport
mainly by boats on the Agricultural River: Most of the banks of the river are fertile and good for agriculture. Fishing trade: The Great River, for example, supported life and trade in the region; The ancient city of Timbuktu is located only a few short distances from its shores. Vegetation Shrub and acacia
wood: Acacia is a genus of shrubs and trees belonging to subfamily with Swedish botanist and shrubs growing along the river. Mangrove trees provide shelter and food to terrestrial animals and fish; All eight species of mangrove trees growing in Africa do so along the Niger
Sedge vegetation consisting of fine, string-like strands interspersed with bare stone surfaces of the Mangrove tree are an important part of the economy and natural environment in the Niger River. Mangroves provide food and shelter for numerous animals and fish along the Navigable Niger River River is
navigable 300 km from Niamey to Gaya on the Benin border from mid-December to March National Parks River Niger flows through the National Park is located on the border of Niger, Burkina Faso and Benin, including a measier part of the Niger River. The park has animals
such as: African bison, cheetahs, warthogs, hippos, caracal, leopards, lions, baboons and elephants. Wildlife on the Niger River. For example, fish, such as soma, carp and nile perch are found in the Niger River. Also in Niger are
crocodiles and hippos living in the river. The Kainji Dam energy built in 1968, the Jebba Dam built in 1985 and the Shiroro Dam on the Niger River are all hydroelectric power plants and generate a potential combined power of 1,900 megawatts The Zambezi River Background River Zambezi is the fourth
longest river in Africa and the largest flowing into the Indian Ocean from Africa. Its pool area is 1,390,000 square kilometers and its depth is 2,693 km (1,673 m). The river flows through Angola, Botswana, Malawi, Mozambique, Namibia, Tanzania, Zambia and Zimbabwe. The coordinates are as follows:
18.8333° S, 36.2833° E Google Map Highlights River Zambezi is known for several waterfalls including amazing Victoria Falls, which is one of the most popular sightseeing spots Other waterfalls include Ngonye Falls in western Zambia and Chavuma Falls on the border of Angola and Zambia. The
people of Zambia believe that the Zambezi River has a spirit called Nyami Nyami The first European to see the Zambezi River there is a Victoria Falls Activities Devils Pool – There is Livingstone Island with a picnic and then swimming in Devils Pool
at the very edge of falls Victoria Wave boarding and surfing - this one is for a serious enthusiast. River boarding is carried out on the same part of the water as river rafting Fishing: there are tiger fish, various sea bream, Kafue pike and Vunda soms found in the upper Zambezi and Chessi rivers, Nkupi,
Bottlenose, Cornish Jack and various Bream found in Lower Zambezi White water rafting: Rafting takes place in gorges below Victoria Falls Watching savanna vegetation waterfalls: rolling grasslands scattered with shrubs and isolated trees on the banks of the River Grasslands: they cover 8% of the
Mangrove River Basin: Mangrove trees provide shelter and food for land animals Navigable 460 km Zamb River Tete and along the national Park located on the north bank of the Zambezi River in southeastern Zambia. The park covers
