## Wv airast secure browser

Do I need to use a secure browser? Yes. ODE requires all students to use the secure browser for OSAS testing. The correct secure browser must be installed on every student machine that will be used for testing. Is it possible to access the student test site without a secure browser? Lol You cannot access OSAS ratings without the use of a secure browser. My school still has the safe browsers used last year. Can we use them for testing? Lol OSAS Online is only accessible using secure browsers specifically designed for current test administration. Past secure browsers won't work, and you might want to consider uninstalling older secure browsers to avoid having multiple browsers on your desktop. Although older browsers do not affect the functionality of new browsers, they cannot be used for any reason and can cause confusion for students and test administrators. For information about uninstalling secure browsers, see Configurations, troubleshooting, and advanced secure browser installation for Windows, Mac, Chrome OS, or iOS/iPadOS. What addresses and ports should be added to the allow list? Schools will need to make sure that the information is not locked in web filters and that the data is not cached. Ensure that the following addresses and ports are open for TDS systems: Browser Installation File: Port: 443/tcp (SSL) OSAS Single Sign On (SSO): Port: 443/tcp (SSL) OSAS Test Information Distribution Engine (TIDE): Port: 443/tcp (SSL) OSAS Online Reporting System (ORS): : 443/tcp (SSL) OSAS test sites: \*.cambiumast.com \*.tds.cambiumast.com \*.cloud1.tds.cambiumast.com \*.cloud2.tds.cambiumast.com \*.airast.org \*.tds.airast.org \*.cloud1.tds.airast.org \*.cloud2.tds.airast.org \*.cambiumassessment.com Port: 443/tcp (SSL) CAI cannot cause firewall-specific or content filtering issues for its school. Contact your school's network administrator for information about setting up your school. Where can I find installation instructions for the secure browser? The Quick Guide to Configuring Online Test Technology contains general instructions for installing your secure browser on computers and tablets that will be used for testing. The Configurations, Troubleshooting, and Advanced Secure Browser Installation documents for Windows, Mac, and Chrome contain step-by-step instructions for installing the secure browser on each operating system with troubleshooting sections. When they need to be secure browsers in my school? Secure browsers must be installed and tested well in advance of test administration to verify the correct installation and identify potential issues with network configuration or security settings. The pop-up blocker must be disabled on the secure browser? Lol Due to the nature of the secure browser, there is no need to make any changes or preferences (including disabling pop-up blocker). Warning: This is a reminder that interim eligibility below the level has been removed for all students as of December 31, 2020. Provisional eligibility will only be for current grade intermediates. Provisional eligibility may be changed to TIDE; however, the change process requires a school administrator to manually change one student's eligibility at a time. A quick guide to changing the intermediate test rank is now available here. For more information, see the school and/or district coordinator or the Quick Guide. Windows 8, 8.1, 10; Server 2012 R2, 2016 R2 Windows (Take a Test) 10, 10 in S Linux mode (32-bit) Fedora 30 LTS (Gnome) Ubuntu 16.04 LTS (Gnome) Linux (64-bit) Fedora 30 LTS (Gnome) Ubuntu 16.04, 18.04 LTS (Gnome) iOS/iPadOS The Evaluation Office manages test development, administration, scoring and reporting of results for the comprehensive evaluation program at the state level. These programs currently include the West Virginia General Summative Assessment (WVGSA) for grades 3 through 8, SAT School Day in high school, West Virginia Alternate Summative Assessment (WVASA), National Assessment of Educational Progress (NAEP), and various international evaluations administered by the National Center for Education Statistics (NCES). These assessments are designed to provide information on the performance of students, schools, districts, and the state. The office is responsible for implementing the West Virginia Board of Education Policy 2340, West Virginia Measures of Academic Progress. West Virginia, as a state, has always sought high standards through the state's accountability practices, and research shows that data from a wide range of assessments can better inform educators of various areas of growth and change. Therefore, educators are better prepared to meet the needs of the school and students. Consistency at the state level is our goal as we work to improve the school and improve student learning for all students. Students.
