## Cool minecraft castle ideas

Castles are an interesting thing you can create in Minecraft. They can be built in either survival or creative mode, and come in different shapes and sizes. When building survival, think twice before trying to build a huge Minecraft castle yourself. You can get frustrated or bored and then quit pretty quickly. Minecraft Castle can follow many different building styles, but usually they are more medieval. Which makes sense, because the castles are from this period after all! The medieval build will mainly be built of stone, wood or concrete, which are easily found for survival in Minecraft. If you want to try something else, quartz castles also look fancy and a little futuristic. Castles usually have at least some of the following main parts: large walls, ditches, bridges, statues, large front doors, gardens, houses, fountains, corridors, library and living spaces. Only from you, which parts you want to add. I recommend having everything to make it a fun combination. You should consider using a texture pack for the construction of castles to make them look even sharper. Here is our list of the best Minecraft castle ideas:1. A small, cozy Minecraft CastleSourceThis cute and simple castle is one of my favorites. Almost everyone can create something like this, because it is small. Despite the fact that it is small, it has a cozy feeling and is very hospitable. If you want step-by-step instructions on how to create it, click Source for youtube video. Because it is so small, you can consider creating it using more expensive materials.2. Medieval castle with TownSourceThis is also a relatively small castle that has a city around it. I like this idea because there is a protected fortress for myself, with houses for other people just outside. This medieval castle is made mainly of stone and wood, so it is quite simple for survival mode.3. Kenilworth (Real Castle)SourceKenilworth is a real castle based in England, and this photo is his recreation of Minecraft. Cool idea to build a castle is to search for real castle google images, then try to create it yourself. This is one such example of what you can do with this method.4. Golden Minecraft Castle waterSourceA fancy, golden castle on water is a good idea for the creative mode of Minecraft. You can try something like survival, but keep in mind that it would be a lot of work. A project that this challenge can be better for if there is a group of players on the server. This building is modeled after the castle in shrek films.5. Winter castle on HillSourceA cozy, warm castle on the hill in winter is a nice idea for those colder biomes. This castle is inspired by Game of Thrones and can be a good idea for fans of the series!6. The French castle with GardensSourceFrench castles are famous for its beautiful gardens and large open spaces. Consider at the end of your castle (or even in front) have a large garden field with water and it would be a fantastic view from your bedroom in the castle.7. Fortress CastleSourceA protected fortress with many walls and other defensive buildings is a good way to protect yourself. Whether it's an PvP server from players or from crowds, fortress really protects your values.8. The castle is carved into mountainsideSourceThis is a castle that is carved directly to the side of the mountain. The mountain will hide your castle a little bit on the other side, which can be a good or bad thing. It's bad if you want to show your castle, and well if you want to hide it from other people. With such a castle you can easily build a network of underground tunnels throughout the mountain. In tunnels you can add things like farms, corridors, storage rooms, other portals and more. If there are dungeons in the mountains, you can even make a mob spawn farm.9. Medieval Minecraft Castle With GateSourceAlthough this castle is quite simple, I really like this gateway to this one. You can see there is a little bridge/footpath also leading from the front door. It would be a good place to build a water vulture (or lava if you dare) to keep uninvited players and crowds. This castle also has a beautiful outdoor area immediately after the entrance. The courtyard adds a beautiful decoration to the buildings right next to the walls.10. The large courtyard and GardenSourceThis one is a very wide open courtyard and garden. The walls are quite far from the main buildings and provide plenty of space for things like farming or breeding animals. Building like this is a great idea if you have a large open area. If your land is quite potted or rough, you should probably do a lot of terraforming (flatten the grass). Keep this in mind, especially if you're playing survival mode. If you are looking for Minecraft castle ideas to inspire your creativity, you are lucky. Building a castle in this blocked world can seem intimidating, especially if you have just learned how to build a house in Minecraft. But why should you keep it small? Minecraft is full of endless possibilities and you can let your imagination escape with you. The size of most castles may seem a little extravagant-think about all that walk!-but the feeling you get when you interrogate your kingdom from the comfort of your castle ramparts is that extra work is more than worth it. If you're still not convinced and want to work your way up to a bigger home, consider building yourself a lavish Minecraft mansion first. It's hardly surprising that players have built many different cool castles in Minecraft, given the flexibility of what you can do there. So if you're looking for inspiration for another project, below you'll find a collection of the best ideas for Minecraft Castle. Where did I leave the crown? Angelville (Video credit: Mojang)The title sounds a bit - As long as you lift it up and walk, that is. The sheer time and effort that came to Angelville is one difficult to analyze: along with the castle itself, which takes hours to explore, you have several additional structures, including a chapel. The heavenly view from the top of the castle is also worth the climb. Steampunk Castle (Video credit: Mojang)Steampunk Castle is a little different, but since it still has a castle in the name, we count it. Along with the impressive front of the structure, there is a lot to do inside. Secrets are scattered everywhere, and there is even a narrative to follow. (Image credit: Mojang) This castle is one to manage them all. Not only do you have a castle, as well as great reasons it is laid inside, and much more. The arena is a great place to settle in old puddles, the church is there for all your confessional needs, and there's even a huge tree with oodles treehouse potential. Castle And Gladiator Arena has everything you can want from Minecraft Castle. Falcon's Rock (Image credit: Mojang)What if instead of one castle, you can have nine castles in one? Falcon's Rock, a medieval-era German recreation, gives you the opportunity to do so by giving one castle, which is actually made up of nine castles, seven villages, one city, and a monastery all inside one larger castle. This is a huge feat of medieval architecture, and there is a sight not to be missed. Castle Speire of Aeritus (Image Credit: Mojang)There are many recreation spectacular castles (including the entry below, in fact), but it is the myths and world creation sparked by castle Speire of the Aeritus that distinguishes it. It's exceptional. There's even a huge surrounding town to explore plus some cool blimps just hanging about, doing everything they do. (Image credit: Mojang) Castles are about dominance, defense and fortitude, but they should also be about elegance and improvement. Status symbol like no other; in the house just suitable for the king or queen. The French Chateau, modeled at the Jardis du Chateau du Pin in Angers, fits that tee. With lavish gardens with water fountains, you can stare down the splendor of the Queen's Palace on the tower, or entertain guests in the banquet hall. Whatever you do, you'll do it in the French Chateau in style. Dragonstone (Image Credit: Mojang)Sometimes not the building itself is breathtaking, but setting. Although the rest of the classic Game of Thrones is faithful enough to make the show fans happy, it is worth mentioning the detail for its environment. The scenery is harsh, and the castle looks insurmountable, in other words, it's pretty much perfect. Unlike Game of Thrones, Dragonstone won't fall apart right at the end, either. Super Mario Peach Castle (Video credit: Mojang)You know all those when could not decide whether to play Minecraft or Super Mario? Well, those days are a thing of the past, thanks to super mario peach castle. This castle replicates the famous iteration of Super Mario 64 Castle and allows you to have an iconic piece of game history. If you are looking for Minecraft castle ideas to inspire your creativity, you are lucky. Building a castle in this blocked world can seem intimidating, especially if you have just learned how to build a house in Minecraft. But why should you keep it small?
