

Cubi killer 3d

... Cubi Kill 5, but at the expense of a few. Cubi Kill 5, and it's going to get worse for the Centrosaurus. With a flooded river in front of him and Daspletosaurus behind the stage, he is now ready for a massacre. But despite the rich pickings, it is not the Daspletosaurs who are responsible for the extent of the defeat. There's an even deadlier killer working here. Heavy monsoon rains turned shallow rivers into deadly currents. The real killer is the weather itself. Recent studies of this dense bone bed suggest that % of the bones are of one species – Cubi Kill 5 – and relatively few bones show any signs of bites. Fossil evidence suggests that these were mass drownings as a result of widespread seasonal flooding... event that we have seen repeated in different places. And when the water recedes, new opportunities emerge. Events like these provide easy picking for predators. But even in the fight for rotting meat, the Daspletosaurus Authority is absolute. Tyrannosaurs in the north and Abelisaurids in the south were the highest killers of their time. They have taken over all the continents where they were found. And together they were fue last of the murderous clinosaurs. Random Games Click here to be taken into a random hacked game by 100% players like this game, right?
