(Wolfoid bomb) Mega Man X5Mega Man X6Mega Man X7 Damaged Reploids (c備I, Kizutsuita Repuriroido Tachi, damaged Replroids in Japan).[1] Reploids (c, Repuriroido Tachi, Replroids)[2] briefly, the Reploids of the Mega Man X series that appear in the batches [1] sections Mega Man X5, Mega Man X6 and Mega Man X7 are asking for help. Mega Man X5 The Mega Man X5, yellow Reploids appear in stages of Brilliant Firefly, Spiral Pegasus, and Former Kraken. Also, U-555 released some from its mouth when it pushed the back of the screen into the front part of the tidal whale stage. In addition to restoring some of the player's life meter, they also give an extra life as a thank you for saving. They re-appear when the player enters the stages when they are present. Mega Man X6 The Mega Man X6, all eight main stages contain 16 Reploids in need of assistance, of which a total of 128 Reploids. Each of them is named and some give items when rescued. Nightmare Virus can convert these Reploids and Wolffroids into Mavericks, and if that happens, they attack the player and can no longer be saved. If infected Reploids do not die, they disappear and are marked MISSING on the rescue screen. If the player decides to kill the Reploids, he will be marked as DEATH in the rescue screen. Unlike mega man x5, these Reploids do not re-appear after being rescued or infected with a nightmare virus. In addition, if the Reploid carries an element and becomes infected, the item disappears and cannot be obtained again. List of Reploids Reploids on Commander Yammark's stage in the Amazon.
