Keywords: SeatGeek.com reviews, is SeatGeek legit, is SeatGeek safe, SeatGeek review 2020, is SeatGeek trusted, is SeatGeek real, SeatGeek reviews 2020 SeatGeek is a search engine used to find tickets for live events. These live events range from concerts to comedy, from sports to theatre, and everything between them. Built in 2009 by Jack Groetzing and Russell D'Souza, it was the first-of-its-kind product created to help alleviate the pain of trying to buy secondary, otherwise sold-out tickets online. Like other search engines, SeatGeek searches for tickets all over the web and aggregates the results on easy-to-use desktop and mobile platforms. Its user-friendly design and time-saving features are the reason it has been dubbed the smart way to buy tickets. Where does SeatGeek get their tickets? The tickets displayed on SeatGeek are either from the secondary market (tickets re-sold) or from the primary markets that have allocated stock to SeatGeek. SeatGeek is also the primary ticket holder for all MLS and several NBA and NFL teams. In the above-mentioned secondary market, many people (i.e. ticket brokers) do business with the purchase of tickets as soon as they are available on the primary market and then angling for profit by re-selling them on the secondary market (without the intention of participating in the event itself). Other times, tickets are listed by an ordinary person who was unable to attend the event and try to sell their tickets instead of letting them go to waste. Can I trust the vendors of SeatGeek? Yes! Check out The SeatGeek buyer's warranty for more information about your marketplace policy. All other markets listed in SeatGeek offer 100% (or better) guarantees for tickets. (For example, if they do not fulfill the order for the event or if the event is canceled.) What if my tickets are fake? Your tickets should never be fraudulent. (For more information, see an article dedicated to the theme of all invalid tickets.) Each seller has a money back guarantee, which forces a faulty ticketbroker to compensate you for up to 120% of the ticket price in cases where they are counterfeit or have already been used. As a result, fraudulent ticket cases are extremely rare, as brokers do not have the incentive to tear people down. But if you ever get a fraudulent ticket, you should contact the seller you bought immediately and make it easier to return your money. If this seller is SeatGeek, please contact them at hi@seatgeek.com. Bait and switch tactics? No way. Have you ever received tickets from us and the seats are not the same as where they appeared online? Here's why: SeatGeek cards 1,000s tickets from hundreds of vendors across the web, and in order to do so effectively they use a process called normalization. Normalization is when data is systematically scraped from ticket sites and automatically transferred to the SeatGeek card, and then the event with the flow is displayed. As the increasing volume of ticket lists, errors are definitely happening. If there is a case where the ticket you received does not match the ticket shown on the SeatGeek card, the company will work with you to resolve the issue.
