The announcement was a complete surprise. Rumors were running rampant as everyone wondered when the next installment would be ready. Bungie and Microsoft did a stellar job of keeping their lips sealed and fans took advantage of their first glimpse of the sacred third and final installment. The short presentation was delivered in real time to the Xbox 360 using the current version of the Halo 3 game engine. In this right-not studio production video, Bungie and Microsoft presented a real deal: what they showed in the ad is what players see when they play Halo 3. HDR lighting, self-shading, GPU-controlled particle system and many other features appear completely in the final game. No need to say anything, the gaming community was saliva. CJ Cowan, Bungie's film director, discussed one of the most stunning moments of the presentation: Cortana's return. Given the diversity of character and history arcs at the end of Halo 2, we wanted to brew our ad into several key threads. Cortana and The Chief is a galaxy apart is a situation we haven't seen before, and there is something that is a powerful component of Halo 3. We use its renditions in the demo to give the viewer some subtle clues to her situation and state of mind, without disseminating any specifics that we want to preserve for the game itself. Graphically, the game closely follows the Halo 2 tradition, although it has been updated to take advantage of the Xbox 360's more likely visual abilities. As art directed Marcus Lehto explained, [The presentation] was intended to be under-announcing Halo's 3-tone is a mystery and sucy-calm before the storm. I wanted to make sure that we were again superior, showed that the Earth was carefully conquered, with covenants everywhere, and that there is a glorious, ancient artifact buried under the Earth's crust that will provide Halo 3 with the epic journey we all want. Taking full advantage of the power of the Xbox 360, Halo 3 expands everything that has made the franchise great, adding a lot of technical and game achievements. The design of the game has evolved with the next generation of high-resolution images: improved AI; intelligent real-time lighting engine; and, of course, new weapons, symbols and challenges. Halo 3 promises an unparalleled first-person shooter experience and, after all, the most compelling and enabling story in franchise history. Last but certainly not least, Halo 3 is based on unique social experience of several players and innovative, developing Halo 2 online game, Resort You will still be able to run with your clan and battle with (or against) your buddies from coast to coast.
