Paperback. Condition: New. 2nd edition. Language: English. Brand new book in bland. This classic by Don Lancaster is by far the best-selling active filter book of all time. It gives you everything you need to know to build active lowpass filters, bandpass and highpass. An active filter does not need inductors. Instead, operation amplifiers, resistors and capacitors are used for best results. Advantages include lower cost, easy fit, simple design and modularity. Lancaster's Active Filter Cookbook includes practical elements such as work circuits, out-of-the-go design tables, adjustment, and real-world applications, making it easy to use and apply. You'll find both the instant design and the math behind the coverage. Microcomputer pioneer Don Lancaster is the author of 34 books, 2 videos and numerous articles and columns in technical magazines. He also runs Synergetics, an Arizona-based design and consulting firm.
