I don't like how it has in app purchases, although it may not be something that big of a problem complaining about it is just I personally hate it in app purchases because it can sometimes leave for scams or bait. So just to be careful pro I don't want to buy anything in the app, but that's just me. You can try and see if it doesn't scan your money, but just in case I don't put information on you or things like that. But again I have not tried because I'm afraid if it is a scam. And I don't like how you have to watch an ad to see your rare character. Because it could be the opposite character you chose and it could be a waste of time. And some tips to fool the akinator (if you want) I think you should think of a difficult character that some of your family or friends don't know or you can press yes a lot of time or not a lot of times. I hope this review helps improve this game a little more, but again that's a good app or so I wouldn't be writing this review (: So that's really funny and maybe a failure well the first part at least ok so I was playing and my character was me so I said yes to the girl and said that after it's your character a woman said yes then came Up is the female gender of your character said yes then asked me is your character a man a man laughed no, then asked me if the gender of my character was male said no ok now the second part he asked me if my character used a female voice said yes so the answer came as my reflection I did not know that reflections could speak XD ok now the reason I do not like much more is because I did ticci toby once that said how his name ticci toby/toby rogers ok yes you can call him just toby but his full name is Tobais Rodgers so i changed his name to ticci toby/tobais rogers the next day i wanted to see if he changed made all the things as tobyish as possible then he said Toby was a rare character why now he is a rare character when he wasn't yesterday please swap him back after reading all the other reviews I was on about to get this game. My friend recommended it to me and I did it anyway. No problems except ads every time it will tell the answer. I personally hate ads, but about 5 seconds in the ad gives a jump option. So that's not really a big problem. The reason I didn't give this 5 star game is because of children's locks. With the children's locks out there may be some inappropriate questions that arise, with child locks on it keeps adult characters like VIP's you have to pay to see. So basically, it's a choice between pay and inappropriate questions. I prefer to choose a non-existent choice without payment and without inappropriate questions. The game play Very fun and addictive as you can get to any obscure character answering questions and winning prizes to guess that particular character. You can change what the genius looks like and he even knows when you're just inventing something or playing randomly. I got Akinator a while back and still occasionally touch it. I recommend this game. The developer, Elokence, indicated that the app's privacy practices may include data handling as described below. For more information, see the developer's privacy policy.
