Top reviews The latest top reviews The latest top reviews image not available forColour: Image not available forColour: © 1996-2015, Amazon.com, Inc. ou ses filiales. © 1996-2020, Amazon.com, Inc. o afiliados. Todos los derechos reservados. Overall score 9.2PROS:Good for leaf green – The only drawback is that the feeder's throat is very narrow and you have to cut leaves into smaller pieces. Very easy to clean – everything can easily fall apart and the juicer comes with a cleaning brush. The average cleaning time reported by the owners is about 5 minutes. Very quiet – Many users have reported that the juicer is very quiet. CONS:A lot of pulp in the juice – When juiced soft fruit or vegetables, there is more pulp than usual and the foam stays in the tube. Not suitable for soft fruits – owners have reported that the snail is clogged when juiced soft vegetables such as pears and apples. Price – For those who aren't sure what to look for or those who aren't sure if they can stay with healthy juice habits, the Omega J8006 looks expensive at first glance. There's a reason Omega J8006 is Amazon's best-selling juice juice bite. It has a ton of positive reviews and every juicy enthusiast, even those who choose a different juicer, are aware of its professionals. But what is special about the fact that it does not apply to other juicers? Let's face it, there is no juicer on the market that fits everyone's needs and meets everyone's needs. Some are better for soft fruits and vegetables, others for leafy greens, while some are best suited for hard foods. You need to think about what you're going to use the juicer for before you buy. The reason Omega J8006 is the best-selling mastic juicer on Amazon is because it's multifunctional. It does a great job of succulating soft and hard foods as well as leafy greens such as wheatgrass, spinach and celery. And you can even use it as a grinder to make your own nut butter or nut milk. Omega J8006 is for advanced users that is regularly juicy daily and does not spend a few dollars more in exchange for quality. Those who appreciate the consistent quality juice with more nutrients will love the juicer. It is also suitable for those who want not only a juicer, but an all-in-one food processor for cooking butter, homemade pizza and powderseeds and spices. Omega's best-selling juicer deserves to be at the top. It is definitely the best mastentsafter on the market and a perfect fit for your kitchen arsenal. Omega J8006 FeaturesBest Seller on its 4.5 out of 5 stars based on more than 3 thousand reviews, it is considered the best mast more entss. Runs at slow speedCompared to the other juicers that process at speeds such as 1,650 to 15,000 RPM, Omega J8006 speed is 80RPM. The slower system does not mean longer juice time, but more efficiency and Juice quality. Higher juice qualityThe slow speed protects the juice from oxidation and prevents degradation up to 72 hours. The natural color, taste and appearance of the juice remain while the foam is disposed of. Dual-Stage Juice ProcessingEs is designed to mimic the chewing mechanism of humans. First, the fruits and vegetables are crushed and then pressed. This system produces a higher juice yield compared to juicers with centrifugal and grinding mechanisms. WarrantyWith a 15-year warranty, you are sure to get the best quality on the market.
