Costa level 2 and 3 questions examples

1996-2014 ©, 1996-2015 © Amazon.com, Inc. or its affiliates, Amazon.com, Inc. or its affiliates 1996-2015 ©, Amazon.com, Inc. or its affiliates Total Score 9.2PROS: Good for leafy greens – The only drawback is that the feeder’s throat is too narrow and you need to cut the leaves into smaller pieces. Very easy to clean – Everything can be easily disintegrated and comes with a juicer cleaning brush. The average cleaning time reported by the owners is about 5 minutes. Very Quiet - Many users have reported that juicer is very quiet. CONS: The juice is very pulped - when the soft fruit or vegetable is juicy it usually has more dough and remains in the foam tube. Not suitable for soft fruits - owners have reported that the auger becomes clogged when the soft vegetables, such as pears and apples, are juicy. Price - it seems expensive at first glance for those who are not sure what you are looking for or if healthy juice habits stick with omega J8006. Omega J8006 amazon has a reason for the best-selling masticating juicer. These positive reviews are a ton and every juice enthusiast, even those who choose another juicer, are aware of its pros. But what is so special that does not apply to other juicers? Let's be honest, there is no juice in the market that suits and satisfies everyone's needs. It is better for some soft fruits and vegetables, others for leafy greens, if most suitable for some hard foods. Before buying juicer you need to take into account what you are going to use. Omega J8006 amazon best-selling masticating juicer is because it is multifunctional. These soft and hard foods as well as leafy greens juice such as wheatgrass, spinach and celery do not have a big job. And you can even use it as a mill to make your own nut butter or hazelnut milk. Omega J8006 is for the advanced user who does not regularly spend an extra few dollars in exchange for juice and quality on a daily rate. Those who appreciate quality water consistent with more nutrients will love juicer. It is also only suitable for those who love an all-in-one food processor to cook a juicer but butter, homemade pizza and powdered seeds and spices. Omega's best-selling juicer deserves to stay on top. It is definitely the best masticating juicer on the market and a perfect fit for the culinary arsenal. Omega J8006 FeaturesBest Seller on Amazon3 is considered the best masticating juicer with 4.5 stars out of 5 based on more than 1,000 reviews. The speed of Omega J8006 is 80RPM, compared to other juicers that trade at rates such as 1,650 to 15,000 RPM at Slow Speed. The slower system means longer juice time but no more efficiency and higher juice quality. High Juice QualityA slow speed protects water from oxidation and prevents degradation Up to 72 hours. When foam is thrown, its water remains natural color, taste and appearance. Double Stage Juice Processing Is designed to mimic people's chewing mechanism. First, fruits and vegetables are crushed, and then pressed. This system produces higher juice yields than juicers with centrifuge and grinding mechanisms. With a warranty of 15 years, you can be sure to achieve the best quality on the market. Last Updated June 22, 2019SummaryReview Date 2016-12-09Reviewed Item Omega J8006Author Rating 5Editor selection accelo is an award-winning project management platform that helps you run and manage profitable customer projects.
