Honestly this hack that you have is very similar to G-Bo from \*\*\*\*\*\*\*s, but its safer way the safer cause has an anti ban bypass. P.S. If you don't want to be banned, be smart with your conclusion. It's been on tape for a few days, and it's in your file. Joined Jul 28, 2019 Messages 194 Points 28 Location USA Hey Mod, instead of insta win or weak enemies, why not just mod enemies forget to attack what I think makes enemies speed to 0, so they will never get a turn, so there will always be players turn around and it is so as insta wins. Frankly, this hack that you have is very similar to G-Bo from\*s, \*s, His is safer because he's against the ban. P.S. If you don't want to be banned, be smart with your conclusion. It's been on tape for a few days, and it's in your file. I wholeheartedly agree, please remove the insta win/weak enemies option and add DEF x and DMG x instead or go with the poster I guoted. You can run everything in this game except for RTA & amp; rift The game is time-based and make sure you simulate real time. beyond your level + how many 6 stars you have, you will reduce your chance of receiving a significant ban. If you're smart, you can play until you're 50. Here's an example: if you start out and want to run faimon to level up the monsters faster, no run it at 2 minutes, on normal, hard or hell, it doesn't matter until it's atleasing the stars at the stars 2 min. I mean, run the task, find the timer, now PA NOT automatically and wait minutes before finishing the search. 2 min is possible when you start, because your free knight of water magic is pretty much your rustic monster to begin with and she can do it with \*\*\*ty rune. Now let's say you get to LVL 50 and your farm monster is 6 stars, well now you can farm in 1 minute. It's about simulating a reasonable time. Now let's say you make a super farm nat 5 like a beth or some other farmer, you can reduce it to 30 sk. My beth can legally lead a faimon hell in about 20 sec. What does that mean? Now I only have to wait 20 sec to finish it, far faster. P.S. is extremely important that if you modding never auto always manually all + Please check the ranking, it shows you the top 300 fastest time, which will only increase your chances of a ban. If you are lazy, then use an android emulator like nox or bluestack and just macro your boot time, so just press the button and macro works, simulating the whole auto with the exact wait time and boot time. Joined Sep 5, 2019 Messages 15 Points 3 Age 26 So, here's what I discovered, Yes li you are on a new account i are doing from the beginning i get ban, elect, so ma how you get the new player blessing for 15 day, u whom is you are going to run your exp/mana, runa 50% off, etc. but Com2us reviews your account, a 15-day is up to see your progress i b/c of it, they i check that you are hacking. Now I'm not 100% sure about it, but so 2 my account got banned, even though I play super safe when it expired, already the next day I was banned. It is also best to avoid the jails of the B8-b10 and the complete TOA until you have at least IvI 30. So here are 4 tips: 1. Do not hack until 15 day a new player blessing is up (maybe wait as a few days after the expiry of B4 hacking just to be safe, because Idk how long you check your account for, it could be 1 day, 1 week) 2. While not a hacker, level up atleast IvI 30 (use this double exp from blessing, 15 days you can get on IvI 30 easy) 3. \*VERY IMPORTANT\* in intrusion, NO CAR EVER. 4. Once you do 1 & amp; 2 and start hacking, make sure your time is running with the real completion time (let's sav you're running faimon hell on IvI 30. start the stage, wait for say 2 minutes, then finish. Do it with everything in the game to reduce the chance to get a ban. When you get better monsters and runes, lower up to 30 seconds, be smart with your run, run out the top 300 time range) Well, yes li wonder vou are hackable i are both inconceivable to lead. here's the rundown: Hackable: -Scenarios -Caiross Dungeons (avoid b8-b10 until you're atleast lvl 30) -Dimensional Hole [you have to beat the rift raids Lvl 1, but don't jump] -TOA (don't dovraga up 30 lvl & amp; completed gb10) -Standard Arena (do not attack lvl 50 -Standard Guild Wars (Join hacking guild, i would report you) -The boss of the world (hack does not turn on the boss of the world) -Elemental beasts (the highest rating is 500k, but that's B-, it's better to rune your monsters and running w/o hacks)[you need to overcome the discord raids lvl 3 without hacks to unlock] Not safe(50/50): -Tartarus Labyrinth (tested by my friend, which also hack, whole guild was collected, or that's why a hundred is a good end game stuff, could be to work that imas i vise guild i vise lvl 50-ica, I therefore is 50/50) -Seige Guild War (jos I do not test, or I assume that this should work shto se boris with AI, or 50/50 remain u 50/50 remain u 50/50 remain u 50/50 shto neshvacam) Rift Rift Warranty: -RTA [automerge] 4. The script for higher levels is extra safe I used to farm a hell scenario on a car with 6.7.8 secs time on my lvl50 account. Easily. For new users who play smart, it doesn't progress too fast. As I tried some new accs built 2.3 6\* in 1 day and got a ban on all of them. Also tho there is a blessing 15 days u get a double exp and I activate another exp booster to get triple xp. But it seems that com2us doesn't care. Joined Sep 5, 2019 Messages 15 Points 3 Age 26 First off it's not false, It's this is the way through gameplay testing through many accounts, and how did I say this is for new toys, that I keep getting to try to show them a safer way to benefit it so that they're further benefiting from hack sa manjom care, yes it doesn't say that it's 100% facts, most of them are from experience and other feedback, so no one knows about com2us ban system. If you are LVL 50 already it's less possible that you will get a ban because you've been playing for some time and com2us assumes that you just meli runes for running speed. As I said, when you're getting quite far you can run almost as far as you can, but you still have the option to get a ban just like one of my lvl 50, which was an old account, but I tested that limit by some really obvious hacking behavior. The arena is fine, because you can just win by having only 1 monster in the party, so I said it's safe to do it, but if you're lvl 30 and you attack a full team lvl 50 yes you might get signed up if you're mud on it. Also 3 second runs and no ban is quite lucky, but I hope you know still give an opportunity, do what you want just b/c you haven't been caught, doesn't mean it won't, it's not 100% safe, my tips are to help people don't say that my way is the best, but the safety net [avtomerge]1572335743[/automerge] My experience so far. But it seems that com2us assumes that you have played for a while. My Beth can legally do 13 sk running hell faimon, so it's very pull-out with a good running unit, but it's always safe to run over 10 seconds why? b/c there's animation and stuff that has a factor I wouldn't recommend anything below. You were lucky, but once again, there is no 100% guarantee, it is safer than sorry.
