The long dark maps timberwolf mountain

If you've spent a lot of time in The Long Dark, you've more than likely searched for a detailed map of all regions. Hinterland Studio does not provide any game maps, but a community member named Whiteberry has created the most detailed maps one could ask for in The Long Dark. To make your life a lot easier, we've compiled them here to stop tripping over bears every time you walk around a tree. Not all region maps of The Long Dark Forlorn Muskeg have been added, and there seems to be room for another region north of Mystery Lake. This first map is a map of the whole world that makes up The Long Darkness. This was shared by Hinterland Studio some time ago, and does not include the new Forlorn Muskeg region west of Mystery Lake. However, it gives you a very good idea of the overall location of the land. Mystery Lake Mystery Lake is a good starting region for those who want a good balance of wildlife, resources and shelter. We'll start with a map of what many consider the easiest region, Mystery Lake. It connects to Forlorn Muskeg, Pleasant Valley, and Coastal Highway, making it a somewhat central location, even though it is to the west. Mystery Lake has plenty of good buildings that you can call home, including our favorite, Trapper's Cabin. If there's a major downside to Mystery Lake, it would probably be that the wolf population can get out of hand. Parasol Muskeg This map of Forlorn Muskeg is not made entirely, but it's still good enough to keep you from getting lost. The longest region of The Long Dark is Forlorn Muskeg, an area hinterland Studio added when reviewing the in-game clothing system. The good thing, too, because like Timberwolf Mountain, there are exactly zero places to sleep inside. It connects to Mystery Lake, but is full of wolves and at least one bear. The main reason to enter Forlorn Muskeg is to use the second forge of the game, allowing you to save the journey to the Desolation Point. Carter Hydro Dam There's a little loot in Carter Hydro Dam, but you also have to be careful with Fluffy. As you can see on whiteberry's Hydro Dam map, it's not a place you'd call home. It's just a region that will connect Mystery Lake to Pleasant Valley. There's a little loot and a lone wolf that patrols him sometimes, but most of all you'll just be passing through. Just keep in mind that in difficulties other than Pilgrim, Fluffy tends to roam inside the prey itself. Barranco The Barranco region has a bit of wildlife and almost zero shelter, so the passage is all good for. Looking at the map of the Ravine, it's clear to see that this region of The Long Dark is also there to help you get from Mystery Lake to Coastal Highway. There's some wildlife and loot to take note of, but there's nothing in the form of shelter some caves. If you're planning to go from Mystery Lake to Coastal Highway, leave early in the morning and be sure to complete the trip. Don't get caught in the cold unless you're sure you're ready for it. Pleasant Valley Pleasant Valley has the worst weather in The Long Dark, but it's a resource-rich environment with excellent Farmstead to live in. You'll need this Whiteberry map of Pleasant Valley if you plan to spend a lot of time there in your game through The Long Darkness. It's a huge area, full of all kinds of wildlife and perhaps one of the best places to call home in the game, the Pleasant Valley Farmstead. Pleasant Valley is also the only region that will connect you to Timberwolf Mountain, but it also connects to Coastal Highway and Mystery Lake. Pleasant Valley also has some of the most punishing climates the game has to offer, so it might be better to start at Mystery Lake and move there when you're ready. Coastal Highway Coastal Highway has great fishing, and one of the best places to call home if you're properly crazy. Because of all the buildings and loot you can find on Coastal Highway, you'll probably want to use a map so you don't miss any of that. It can be a difficult place to travel if you're in the mountains, but on the ice and along the road you can see predators at a distance, making it one of our favorites in terms of not being ambushed by bears and wolves. It also has the Quonset gas station, a place that people who love misery swear is the best base in the game. You see, the Quonset gas station often has three wolves and a bear nearby, but whatever floats its boat. Coastal Highway connects to Mystery Lake (through the Ravine), Pleasant Valley and Desolation Point (via the Crumbling Highway). Crumbling Highway Crumbling Highway exists purely to connect Coastal Highway to Desolation Point. You probably won't need a map to traverse the Long Darkness region unless you're looking for a specific loot. You should also not plan to spend the night, unless you have a bedroll that you can use to sleep in the only interior building in the region, a basement. There are a couple of cars and caves, but that's taking too much risk. Leave Coastal Highway early and stop by Crumbling Highway and go to Desolation Point in a day. Desolation Point Desolation Point is a great place to visit if you need a forge, but after that you should go home. The Desolation Point map will be very useful, as there are several areas of interest, especially the Riken, one of only two places that has a forge. If you're crazy enough to play Interloper, you'll need the forge, but only after finding a heavy hammer. The point of is isolated from any other region except the coastal road (via the crumbling motorway). It's not the kind of place you call home to Go in, do your craft at the Riken, and then go back somewhere warmer. Timberwolf Mountain Climbing Timberwolf Mountain will be something you'll never forget in The Long Dark. Timberwolf Mountain is a region that will require a map more than any other in The Long Dark. The whole point of going there is getting to the summit, and the region counts exactly zero places to sleep inside. There's the mountaineer's cabin, which isn't horrible, but it also has a huge hole in the ceiling, so it won't be the warmest place I've ever slept. Even the ice-fishing hut is missing a door, so that sucks. No, just go to Timberwolf Mountain if you're ready and have a means to stay fed and warm. But, absolutely go there because it is probably the coolest location in the game. That'll do. Those are all regions of The Long Dark, with expert Whiteberry maps. Be sure to follow Whiteberry on Twitter as a means to say thank you for saving your life with these maps of all regions of The Long Dark. Guide The Long Dark Tank War Room Load Comments Climb to the top of the mountain of wooden wolves worth 30 players. If you are fully oriented and an expert survivor try to live in the mountaineers' hut at the base of the mountain by the lake.
