Let's go over how to perform a factory reset on your device. This way, you can continue to reap all the benefits of your NordicTrack equipment, and continue on your way to improve your physique. How to do a factory reset on your NordicTrack device if your built-in console or iFit Cardio application has stopped responding, or if your Wi-Fi connection is still weak after your router is reset, factory reset may be your solution. However, factory reset sits only on the latest controllers. To see if your device is compatible with this process, look at the settings and check the firmware version. Available versions for factory reset sits at 7.1.1. You can also find out if the device is compatible by looking at your console. If the device has a USB port or HDMI port, this is not compatible with this process. We recommend that you complete the factory reset with two people. Make sure you turn on your Wi-Fi and have a paper clip at your fingertips. First, locate the power and turn it off to your equipment by flipping the power switch into off mode. To locate the key on the equipment, see the owner's manual. If your device is NordicTrack rowing, simply separate it. Next, locate the hole, which is likely to be found on one side or on the back of your console. If you have difficulty finding it, please refer to your owner's manual. Insert the paper clip into the hole. While inserting the paper clip, press down. As you hold the paper clip, the second person will flip the power key again. Once the screen lights up, you can remove the paper clip. You'll see the iFit logo with system recovery: please wait... Highlighted in blue. This is the boot screen. If the blue text does not appear, please repeat the reset. If the boot screen reads up and the text blue, restore the system: please wait... , it may take up to 30 minutes for the device to start the process on board. If the playscreen stays up for more than 30 minutes, you'll need a reset to try again. If factory resets are successful, you'll be asked to reconnect to Wi-Fi, select the unit of measurement, and choose the time zone. Once connected to Wi-Fi, your NordicTrack device will be automatically updated to the latest software — and it may take a few minutes. Once you download your iFit logo screen, please log in using your iFit username and password. You will now be able to A new workout trip on your device. For a visual explanation of the performance of a factory reset on your NordicTrack device, you can refer to the video below. If you need additional support from iFit customers, join a chat session with an iFit team member or contact us via email or phone. For more information about managing your iFit membership, see the NordicTrack blog for information about: How do I start contacting iFit to contact your Bluetooth equipment, manage my iFit subscription, add secondary users to your iFit account exporting your exercise data, update your firmware update on disclaimer of your device: This publication is not intended to replace the advice of a medical professional.
