Sweet minecraft builds

Everyone gets bored of Minecraft and doesn't know what to build next. Thankfully, we have a list of 34 cool things to build on Minecraft to give you some inspiration. Minecraft has a lot of things like houses, castles, nice netcheon portals, bridges or statues. If you don't want to get bored or give up on ideas, choose a project to build a fun building for. It is also important to choose a building idea that is a little challenging but not too challenging. If your building idea is too ambitious or difficult, you can give up after a few hours and get bored with the game. It is best to divide the build into multiple smaller projects. For example, if you are building a castle in Minecraft, it would be better to focus on building walls first, then one tower, then more towers, then rooms connecting these towers, and so on. If you are looking for things to build on minecraft survival, keep in mind that you can get all the ingredients yourself. For really big projects like skyscrapers, you have to do a lot of work to get all the blocks you need. But if you're playing in Creative mode, you don't have to worry about it, you can build as big as you want! Here is our list of 34 cool things to build on Minecraft:1. CastleSource Castle is a fun thing to build in Minecraft. For what? Who wouldn't want to live in their castle! Castles are generally easier to build because they use simple materials such as stones and trees that can be easily obtained. The castles range from small fortresses with a few connected towers to huge walled cities. There is a lot to add: wooden doors, bridges, fountains, statues, lava meds with gardens, etc. Bonus: Keep the mob on the walls and at the searing base! Any mob that gets closer, you can shoot using a bow from the top of your wall. Read more: 8 amazing Minecraft library designs I recommend adding to it to start smaller and need more space. There were so many days when I started building a huge castle that worked so much. Making a project so difficult can make Minecraft boring. For inspiration, see posts with gender ideas and photos.2. MansionSource Creating a mansion for yourself in Minecraft survival can be a lot of fun. Design your own bedroom, storage space, hallway, grand staircase and more. You can go one step further and build a nice fence around the property and create a nice garden or fountain in front of your house. For more inspiration, you can easily google examples of real mansions to model minecraft builds after. Feeling lazy? Find a naturally generated woodland mansion and renovate it to your liking. READ MORE: Awesome Minecraft homes to build in Survival3. Create a collection of buildings in TownSource. Connect with the road to create a minecraft village with style. For

additional protection, consider building walls to protect against creepers and other mobs. Some building styles may be sandstone themed around medieval stone and wood, Asian towers and deserts. If you're looking for cool things to build on Minecraft, the city can definitely keep you busy because there are so many buildings you can add. Some ideas for village buildings: banks, hospitals or medical clinics, storage rooms, hotels, town halls (courtrooms and prisons).4. Modern CitySourceA modern city with skyscrapers, pavements, lampposts, parks and sidewalks is a huge project, but if you have a lot of time in the building, it can be very rewarding. There are a lot of repetitive buildings (for example, adding a lot of floors to the same skyscraper) so it may not be the best thing to build in Minecraft to survive. Otherwise, you can always do this in survival mode with a group of friends.5. FarmSourceEveryone needs a farm in Minecraft to grow its own food and supply. You can create a simple farm with a place for essentials such as wood and wheat, or a nice farm outdoors with windmills and barns. Another option is to create an indoor or underground farm, but this will be more work. Crops need light to grow, so you need to make sure there is enough light from torches, lanterns or lamps. A cool Minecraft farm idea is to create a greenhouse of glass using natural light to grow your crops. The greenhouse will stop animals and mobs, but it still needs to be lit a little to prevent the mob from spawning at night.6. GardensSourceGardens is well-ing with almost everything in town, in front of the house, and even on its own. Guests can decorate the garden using flowers, trees, gravel paths, benches and water. The fountain is a very nice center for the garden, but sometimes you can cry tricky to get the water flowing the way you want. To get flowers for your garden, you can use bones on the grass to grow them or find them naturally around the world. Some vimes will have far more flowers than others.7. Famous LandmarksSource reports on Google for photos of famous landmarks and used them as a reference for building something amazing in Minecraft. For example, famous castles such as Neuschwanstein, Eiffel Tower, Big Ben, Statue of Liberty, etc. Hint: If you travel a lot, choose what you like to see on your trip. If you are playing in Survival Minecraft, maybe choose something a little less detailed or try to build a more miniature version of the landmark. Without creative flight and infinite blocks, it can be difficult to build survival. Read more: 13 best modes played in pack 20198. FountainSource fountains are simple or large They have good décor in the garden, castle courtyard and even indoors. Try using 'steps' to get water flowing down and shine in the water. If Mojang changes the flow of water, the fountain is a little trickier to do now and you may need to experiment with water flowing perfectly. To add beauty, you need to illuminate the fountain so that you can see more at night. This can be done with blocks such as glowstones or redstone lamps. If you are using a lamp, you can also connect it to a daylight sensor so that the daylight light is only lit at night. Check out our guide here for fountain building ideas and examples.9. Underground citiesSource to build underground cities, find large underground valleys or put windows on TnT. Walls, hang vines, carve huge holes with columns of water or lava (if you want). This can be a lot of work, especially if you need to excavate a larger area to grow farms or trees. On the Minecraft server I played a long time ago, there was a very nice underground vault city dug up by the players. There were many corridors with room doors and a huge atrium with trees and gardens. Secret corridors and rooms can also be made. If you like digging, it can be fun to build something like this!10. Pyramidal backbone pyramids are typically built into the bio-member world of the desert using sandstone or sand. They are a great place to put beacons and can be built into other biomes using so many different materials. To maintain the Egyptian theme, decorate the outside with pools, pillars and sphinxes. Building pyramids is really easy for most players, even in survival Minecraft. Building plans are very simple, you need to create really large squares and then keep building small squares vertically until you reach the end of the pyramid. Read more: How to get a neter star and make beacons in Minecraft11. ArchSourceArchways can be used as a grand entrance to a village, base or other building. They are fun things to build and can be made from simple materials such as diamonds or gold, or luxurious materials such as diamonds or gold. They can be large and impressive monuments or they can be small entrances to the area.12. LibrarySource book bookshelves, wood, red carpets, stained glass buildings, or siderooms at the base to create enchanting areas. For fun, use pistons to make some hidden passages behind the bookshelf. Get inspired by library design and layout for more ideas. The library is the perfect place to put all the fascinating tables and even potion brewing stands. Even if you don't want to build a large library, you can still build a small library near the storage room for a fascinating potion.13. CathedralSource has so many impressive churches and cathedrals in the world and building one in Minecraft can be pretty Especially in survival mode. However, they can create busy and satisfying projects. For inspiration, you can find images of famous cathedrals online for reference as you build. Don't forget the stained glass!14. Nice Netder PortalSourcecder Portal doesn't have to be boring and there are many ways to design it. Create a decorated room for the netder portal, or create and decorate a larger neter portal (neter portals can be much larger than the standard smaller sizes). As an added bonus, keeping the Netder Portal in a separate room keeps all mobs away from walking through it. For building materials, we recommend using materials found in the netcheon, such as quartz, netcheon, netcheon brick, or lava. This ensures that the portal still has a nether theme.15. Cool Storage RoomSource Storage Room is an important part of minecraft house. They can be large, very organized, and decorated (if you want!). If you have materials, use expensive blocks in your warehouse to show off your wealth, such as gold, diamonds and emeralds. For more ideas on building a Minecraft storage room, check out our article on save room design here.16. Floating baseSourcefloating bases can be a fun thing to build a survival Minecraft as well as a skyblock. Build a big platform for yourself in the clouds, have some building materials, and start building bases there. Make sure there are ways to safely descend, such as moving to a puddle of water, a ladder or a block of mucus. As an added bonus, if you're playing on a PvP server, you can hide your sky-high floating base from other players. It's a great way to keep your privacy, unless the basics are too big! Sky Base has a good challenge for Minecraft to survive. Also, check out our list of the best Minecraft mode packs to play in 2020, which definitely includes Skypack!17. DocksSource connects the buildings with wooden walkways to build villages on the water. You can also build a boat from a tree as a decoration of the pier. The piers make for a relaxing place to go fishing (another thing you can do when you're bored of Minecraft). You should preferably build a pier with a lot of water, on the ground next to the sea bio potion. Building a pier on the river doesn't make much sense after all.18. Find wooden housesource jungle vims, build a base on trees or build your own giant tree with trees and then build a Minecraft base inside the tree. Be careful if the fire spread is on. It would mean a player only have one fireplace or burn the entire build. It's also a great idea to build a wooden bridge that connects different tree houses when stacked in trees. However, if you are on a server with another player, your home may be less private and more obvious.19. Fill the underground tunnel near the base with a little water. Add plants such as iron fence gates or vines and lily pads to decorate and have a sewer system. If you want, you can also put mine tracks into traffic here. Sewerage systems can be a wonderful way to connect different houses underground. For an additional sense of adventure, add treasures and hidden corridors for visitors. This corridor can be hidden with pressure plates, levers, pistons, etc.20. The SubwaySourceA Minecraft subway system is the perfect way to transport around the city or between buildings. Dig through the long corridors of the basement and add a 'stop' or 'station' along the way with an exit into the world above. The subway system can be used to connect different bases with other players on the server.21. Mirososmaze is easily built with leaves/fences and can be placed in the garden. They can also be made underground or inside buildings. More fun, it's a good place to add traps and surprises using pistons like drops, wall changes, dispensers to shoot arrows. Don't forget the reward chest at the end of the maze. If you are playing in survival mode, you will definitely want silk touch enchanting to collect leaf blocks from trees!22. StatueSource If you have an empty hallway inside your building, you can fill your space by building some statues. Create a statue dedicated to your favorite item, mob, animal or player. The statues shown in the photo also make a nice decoration for your build entrance. See the full list of statues to build on Minecraft for more ideas.23. Is there a big river at the Bridgesource base? Or a deep canyon? Build a great bridge and cross it! Decorate the edges, decorate the supports for the legs, and add some lighting as well. Instead of dirt and cobblestone, they use good materials such as stone, brick or wood. The bridge can be as simple as a walkway or as grand as the Golden Gate Bridge.24. LighthouseSourceSourceA Lighthouse is a cool decoration if your base is by the sea, on a shining street at night. The lighthouse doesn't look very nice in the fields or rivers, so make it possible to make it to the beach by the sea! For a classic look, make the lighthouse white and red (concrete, wool or terracotta). If redstone is good, you can also create a piston-based system to rotate the lighthouse into light. For more information about Redstone Lighthouse, see this YouTube video.25. BoatSource Unfortunately, if you make a boat out of a block in Minecraft, you can't sail it yourself. But it makes a nice decoration in the water by your base. Built-in boats are usually made of sails made of wood and wool. Boats can be as simple as a yacht or as big as a cruise liner with sleeping and dining cabins.26. Build a SuiteSource city and if you have a skyscraper, set your home in the sky with a penthouse suite. You will be able to easily see through the entire Minecraft build from the top of the skyscraper. If you don't have a skyscraper yet, it could be a bit more work. For a full-fledged look, stay modern and be inspired by a New York TV show with a penthouse.27. Watch TowerSource Clock Tower is a stunning building that can be built in a medieval-themed town or a modern city (think London's Big Ben). They are usually very simple to build and can be made from a variety of building materials, such as logs or stones. Unfortunately, it can't tell you the time (unless you're a redstone wizard), but it's a good decoration anyway.28. Bank and VaultSource Bank's vaults are a unique way to store items in Minecraft. There is a bank at the back of the basement safe area with items. What better place to store gold and diamonds than in an underground vault? To make the bolts more realistic, secure them with a very strong material. I like to build my bank vault from obsody and have another room for different items. If you want to be more creative, you can lock each floor and open it only on the levers of the security office.29. Restaurant or TavernSourceYe needs a place to store your food and access it easily. Sure, you can put it in your storage box, but how much fun is that? Build a restaurant, kitchen or tavern with a seating area and a place to order and get food. Friends and visitors will love it, as well if you play on the server with others. For more fun, you can create fast food restaurants like Subway or McDonald's.30. HospitalSourceA What's cool to build on Minecraft survival is a big city hospital for yourself and your visitors. Organize emergency rooms, waiting rooms, and wards on the upper floors. If you want a small project, create a small clinic building for the town. It is recommended to build with white materials such as white wool or quartz. Concrete will also be a good building material to use. To make the hospital more realistic, we add a beacon that automatically heals players entering the building.31. CourthouseSource builds courts that can handle rule-breaking players on servers or make fun of them. Inside, it should include an area where people can see the proceedings and a front area for judges and defendants. Don't forget to build an underground dungeon or attach it to a court. Today, most courts are traditional with wooden interiors (walls, ceilings, floors, benches), even if the outside is made of something else, such as stone. Prisonsource prison servers are gaining quite a bit of popularity in Minecraft, so why My own? Don't forget the fence around the prison where the watch tower is. Prisons can have a lot because most of them need to be self-reliant. You need cell blocks, cafeterias, security rooms and everything you can think of. Redstone must be used to create a complete security system with lever activation doors.33. Pixel ArtSource2 3D art can be created in Minecraft using blocks of different colors, such as colored wool or concrete. Pixel art may seem easy, but trust me, you'll find it pretty challenging while still interesting if you try it. For pixel art ideas, people often create flags, slogans, Minecraft items (diamond pickaxes, etc.) or other players.34. Cottage Sauceodumak on the lake or river is a friendly and cozy place to call home. You can create one like a vacation home and connect it to the base with a road or landmine cart rail system. If you're on the water or at least have a lake, there's a comfortable place to fish. And there you have it, 34 cool things to build on Minecraft! Do you have any more suggestions to add? Leave a comment below. Below.
