Ice age continental drift movie worksheet answer key

Introduce your students to the location of continents 250 million years ago! Guide students to practical research on how tectonic plates form our planet. Explore how plant and animal fossils teach scientists about continental drift. See how Catch Drift aligns with National Science Education Standards and common basic national standards. Can your students show the world their niceness? Are they secret do-gooders, saving a nice act when no one is looking? Take this quiz to learn your Ice Age kindness. Students promised to do a random act of niceness for the chance to win a private film screening of Ice Age: Continental Drift and other fun awards. Betting is closed. When the Earth collapses, history's greatest heroes will keep it together. The result was announced on May 5, 2010 and was released on July 13, 2012. It's the second installment of the Ice Age, which uses digital 3D. The film is made from Blue Sky Studios and is being distributed by 20th Century Fox. [3] Despite mixed reviews from critics, the film became a huge cash er, showing \$877 million worldwide, accounting for \$95 million. Synthesis One of the filmdom's most beloved trios – Ice Age's Manny, Diego, and Sid – embark on their greatest adventure after cataclysm down the entire continent adrift. Separated from the rest of the herd, they use icebergs as makeshift ships that launch them in an epic seafaring quest. Manny and the gang are challenged like never before to become heroes and do the impossible as they encounter exotic sea creatures, explore a brave new world, and battle ruthless pirates. And Scrat's reunion with his cursed nut catapults in his places no prehistoric squirrel has gone before. Plot movie opens when Scrat (Chris Wedge) sniffs an ice cap in search of a place where his prized acorn would be safe. When Scrat hits the ice, it begins to crack to prevent trouble, Scrat pushes the ice back into the hole. When Scrat just touches the ice with the tip of his acorn, it ends up breaking the entire mountain under the ice cap. Scrat gets his and falls into the gap that goes through Dinosaur World, where Buck (Simon Pegg) is assembling his dinosaur nemesis Rudy while he walks out and ends up passing through all the layers of earth, eventually arriving in the metal sphere that forms the inner core. Continuing his acorn, Scrat makes a major spin and breaks Pangaea into modern continents, creating giraffes, making their necks stretch while Africa is being separated, and making the boot-shaped Italian peninsula kick on a nearby island (along with Scream GOAL!) in time Formation. Scrat finally rides and starts bumping between the sphere and the solid outer core, creating a Scrat-like Moai, Scrat Sphinx (which loses its nose when it falls), and 4 Scrat faces mount Rushmore. Scrat later picks up the balance and grabs his acorn, but ends up spinning the core until he is thrown out of the gap into the upper atmosphere. While falling, Scrat positions his body as if he might end up in the sea, but ends up crashing into some ice that breaks in half, separating Scrat from his acorn. Scrat then continues to shout frustration when opening the film's title card. As in previous films, the main characters are the mammoth Manny, sloth Sid, sword-tooth cat Diego, and, in parallel to the storyline, the sword-toothed squirrel Scrat. Scrat hunting acorns is causing the collapse of the Pangaea continent, as we know them today. Meanwhile, Manny and his wife Elijah are engaged to their 16-year-old daughter Peaches, who have a crush on a mammoth named Ethan. Peach's best friend, a molehog named Louis, also seems to have a crush on him. When Manny catches peaches hanging out with Ethan after he said it doesn't, Manny and Peaches argue and are out. Soon after, the collapse of the continent separates Manny from his family. Manny gets stuck on a floating ice raft along with Sid, Diego, and Sid's annoying grandma Granny. The great moving landmass drives Ellie, Peaches, Louis, Ethan, Crash, Eddie and a herd of other animals on the ground bridge where they hope to reunite with Manny. Meanwhile, Scrat, lost in the sea, also finds an acorn-shaped map that the dead sword tooth squirrel skeleton was pointing out, leading to a mysterious acorn-filled island. Scrat decides to follow the map and find the island, but as he begins his journey, he is suddenly captured by a gang of animal pirates on a large ship-shaped iceberg that is sailing in the oceans. Manny and his friends have also captured a pirate gang led by a giant ape named Gutt. Each one jumps on the edge of their iceberg ship to see them in Shira, the female saber-toothed tiger that happens to catch Diego's eye. The herd is later tied to Gutt and his crew. Gutt and the pirate gang attempt to persuade Manny to leave family life and join the pirates, with the song, the sea master, but he refuses. Gutt takes it as an insult, and tries to make the herd walk the plan board, but they (along with Scrat, who continues his journey) manage to escape, in the process of destroying the pirate ship, and again swim to the oceans on a small ice raft. They rescued Shira, whom the pirates had left behind. She reluctantly joins the group, though she says the pirates will come back to her. The group reaches the island and encounters a group of hyrax as well as pirates who build new ice ships elsewhere in the same The herd plans to steal the ship and use it to return home. At night Diego visits Shira, who holds the prisoner in the herd and gives her water. The next morning, as the herd finished its plan, Shira escapes and rejoins pirates, but gets reprimanded by Gutt instead of being welcomed back, making Shira slowly realizing that Diego was right about Gutt not caring for her well or meeting well after Gutt realized that she was with the herd and hadn't attacked them. The herd, along with hyraxes, overtake the new ice ship and, with some help from Shira, who changed his mind after being reprimanded by Gutt, sail away. Gutt, in anger, quickly turns a new iceberg into a ship, which he later calls Sweet Revenge, propelled narwhals, and chases Manny's gang determined to take revenge. Meanwhile, Peaches is still hanging out with Ethan and a group of teenage mammoth Brat Pack, but after realizing that they don't care about the dangers and thinking that being a best friend with a molehog is funny, she leaves them and returns to Louis. When Elijah, Peaches, Louis, Crash and Eddie reach the earth bridge, they believe it has been destroyed. Meanwhile, Manny, Sid, Granny and Diego encounter sirens, depicted as sharp toothed creatures who take the form of loved ones and try to lure sailors. Fortunately, Manny understands this and manages to steer the ship away from the siren. Later, Scrat meets a mermaid who uses the shape of his ex-girlfriend from the third film, Scratte, to try to lure him. If this fails, the siren takes the shape of an acorn, causing Scrat to run into and hug it. The siren changes back and attacks Scrat, but he gets away. The next morning, Manny, Sid, Diego and Granny finally reached home, but, much to their horror, find out that Gutt and his pirate gang had beaten them and captured Ellie and Peaches. Diego also points out that Shira seems hurt, probably, from Gutt because of her betrayal and a change of loyalty. Manny is trying to turn himself in to Gutt in exchange for the release of his family, but Gutt doesn't hold his side of the bargain and is going to kill the family. However, Louis come to the rescue, begins a fight during which Shira joins them, and Granny's supposedly imaginary pet Precious, a large spermwhale (Livvatan melvillei), appears in defeat by pirates. Peaches rescues Ellie, but as they prepare to escape, Gutt attacks Manny again. Gutt and Manny get involved in the last fight, but Manny manages to defeat him. Manny arrives in time to pick up Ellie and the peaches that are caught between the moving landmass and the ocean in the place where the earth bridge once existed. Meanwhile, Gutt is allegedly killed when he ends up being attacked by a siren, taking on the shape of a female of his species. After sailing over the ocean, the herd and all the animals find new homes. Manny and Peaches and coherent, Manny finally admits that Sid doesn't screw-up after all, but the hero, Shira, joins the herd and becomes Diego's girlfriend, but Louis is finally allowed to still be with peaches when she hangs out with Ethan's gang. The film ends with Scrat finally reaching the island on the map, Scratantis (Scrat's version of Atlantis), a floating city filled with other sword-toothed squirrels and nuts. But because of his nut obsession, Scrat grabs a lot of nut frenzy and sooner or later, he tries to grab a giant one blocking the hole. He grabs it despite the sword-toothed squirrel leader warnings, causing the city to sink to the bottom of the ocean, leaving Scrat in the middle of the newly created land: the desert , (known as Death Valley). For the finale, Scrat's eyes burn, and he screams in pain and frustration, ending the movie. Development First details of the film were revealed on January 10, 2010, when the New York Times reported that Blue Sky is working on a fourth film and was in talks with the voice cast. Fox later confirmed on May 5, 2010 that Ice Age: Continental Drift will be released on July 13, 2012. [9] An early film poster was unveiled at the 2010 International Licensing International Exhibition in Las Vegas. [10] On December 19, 2010, the 20th Century Fox released the first screenshot of the Ice Age: Continental Drift (pictured). [11] Steve Martino and Mike Thurmeier are directors (according to IMDb) and John Powell is once again making up for the musical score. Visual effects are performed by Dan Cayer, who's composting manager at Blue Sky Studios. Lori Forte also returned to produce the film. Michael Berg, Jason Fuchs, and Mike Reiss are writers of the film. Ari Rubenstein is the main film's company. An official screenshot of the teaser trailer for Ice Age: Continental Drift was released January 6, 2011 examiner.com. [12] The official trailer was released on 5 March 2011. [13] Reception Critical Response Reviews are usually mixed by critics. The film holds 37% of Rotten Tomatoes and 49 mixed or average reviews of Metacritic. Audience Response Audiences were polarized by the film. They either love it for their wit, heart, and spectacular animation, while others thought it was an unnecessary result because it's a reworked piece of elements and an overabundance for underdeveloped characters.. It holds an audience score of 62% for rotten tomatoes. The film won - from CinemaScore. The sequel to the animated film industry is so great now, so mysterious, competitive. It has become a huge multi-billion dollar industry. And they won't tell me. I tried to get it out of them... and I learned a few things because I just keep talking until I get answers. Sounds like they're working on something. So hopefully the answer is YES, but I can't say for sure. that 20th Century Fox may be planning a fifth Ice Age movie, but hasn't gotten any definite news from the studio. [14] On December 20, 2013, 20th Century Fosa planned the film on July 15, 2016. [15] References ↑ 4.
