Poptropica carrot island milk

In 24 Carrots, an evil rabbit is terrorizing the city and all citizens stealing carrots, which is leaving the economy in ruins! It is your duty to defeat Dr. Hare, and bring peace back to the island. This is a very exciting island and longer than most of the first. 24 Carrot Let's eat some rabbit stew! Hold him... Let's talk to the mayor first. Looks like this town has a problem with carrots. No problem, we're here to get to the bottom of this! First we're going to need some tools, then run to Charlie's Carrot Supplies Co. The owner is giving a free crowbar to anyone who can find his cat! We're going to do this. Get out and run all the way to the left, to the farm. The farm is boarded, but you can enter through the chimney. You can see the mysterious paws that lead there. Walk to the right and get the milk plate. Hmm... it needs to be filled in. Speed up Main Street and enter the Carrot King Restaurant. Talk to the lady who works there and she'll be happy to fill your bowl. Hey, who are these people on the bulletin board? Looks like they've been missing for a while. Run back to the farm and you will put the bowl. Then to the top floor. From there go to the left and to the bathroom. Turn the water into the tub, and the cat will burst! Chase him to the milk plate walking behind him. STAY BEHIND THAT!!! If you don't, he goes back. When the cat drinks the milk, he will start following it. Take him to Charlie's supplies, and claim his reward. Then run to the factory to the factory. Run to the right and fall into the water. Go left and use that handy crowbar. Alive! It's open. Race inside to start the true adventure of 24 carrots! Go left and take carrot transporter. But you don't need that. Jump to the small edge and jump to the right to the top. Time when the platforms will come to run through them. There's a little break between them. The first two are easy, but the others get tougher. What I do is how long they stay down, and then the next time it does down, I count for that amount and run through at the end. A little confusing, but it works. The first one is about 2 1/2 seconds, the second is 4. In the end, jump and you'll see a horrible mouse on the platform above. Jump up there when he's on his back, then take the bypass tube above him. Then go upstairs. Finally, you're out of the sewers! You're in the engine room now. Walk to the left and you will find the controls. Bring the first switch to the middle, second switch down, and the last in the middle as well. The lights and the winch will light up. Run to the right, jump to the boxes, and then to the platform path to the left, jump to the barrels, then the box, then the platform to the left. Wait for the winch, and when he comes, attack him! Jump on the right end and enter the ventilation system. You have the blueprints to help you navigate. Then make your way to the Processing Room. Remember that there are blowers everywhere. If you have trouble following the map, the video walkthrough should help. On the way, take the Wire Cutters. In the Processing Room, you will see that the security system is on. Hmm... walk to the right and fall down. Hey! You will be teleported to the Freezer Room! Oh man, I don't know what to do. How will you survive here? But quickly, find the Security System controls and use the wire cutters to cut... Well, all the wires. The security system will shut down! Okay, well, how are we going to get out of here? Climb the mountain of boxes and jump into the lamp. Jump to the left and you're free! Now the Processing Room is safe, but first we must make a detour to the Printing Room. Once there, you will find some dangerous boxes falling! You will also find that you can go through them because there is a pattern of how they come. They come in groups of 3, 4, 6, etc. Go down at the end and run to the left. What the other year? What happened to this girl? Talk to her and you can distract her. When you do that, you can turn off her mind control thing. She's going to show you the system password. To escape, go up the printer and keep climbing. Then go to the Processing Room. This time no one's going to try to teleport him. Go down to the ground and run to the right, freeing mind-controlled slaves as you go. Hey, these look like the missing people from the Carrot King Diner! It also looks like Dr. Hare is liquefying carrots for some reason. So you found the thief! In the end, you'll find a door only for authorized rabbit drones. O. Let's go inside. No, no, no, no, no, no, no, no, no, no. You've been thrown through a trapdoor! You're now in the Foundry Room, where Dr. Hare turns carrots into fuel. Walk to the left and fall. It's a conveyor belt! Make your way through it, avoiding the slammers and the hot carrot juice. At the end, jump into the barrel and jump to the left. Take the rabbit's ears, put them on and leave the place. You look ugly, but now you can pass without getting knocked down. Hare! He thinks you're a rabbit drone. Climb the rabbot, the invention in which Dr. Hare has worked to fly into space and control the mind of all Poptropica! So that's why he needs the carrot juice. When you get to your right paw, jump on to the computer and release the guy there. Then click the computer. Enter the print room password... fuzzybunny. Use the command Rabbot. Now let's have some fun. You drive your rabbot using the joystick, much like a video game. But this time you have to hit the ship against the asteroids! After the third blow, Dr. Hare realizes what he's up to. One more hit and... And... Hare doesn't exist anymore. Yes! Now follow the guy to Main Street. Everyone's happy now. But wait... Isn't something missing? You island locket! Go to the mayor and you'll get it along with 100C! You will find yourself in a barren city. Talk to Mayor McTeague, and he'll tell you that all the carrots are gone. Oh, my God, I'm so sorry. Walk left at Carrot Farm, and go to the addressed house. Get on the roof and get in the chimney. Now that you're inside the house, take the Empty Bowl, and leave the house by the fireplace. Go back to Main Street, and go inside the Carrot King Diner. Talk to Flo, the waitress, and have her fill your bowl with milk. She's going to say yes, and the bowl will now be a bowl of milk. Get out of the diner and go home to Carrot Farm. You're going to put the bowl on the floor. Then climb the black rope to the right to reach the second floor. On the second floor, go left until you reach the bathroom. Turn on one of the faucets, and Whiskers the cat will jump out of the tub, and run downstairs. As soon as he drinks the milk, he'll gain your trust and follow you. Guide the cat to Charlie's Carrot Surplus Co., a store on Main Street. Return Whiskers to Charlie, and she'll give you a crowbar for free. Back on Main Street, walk right, and go to the factory. Climb onto the roof of the carrot cake factory, and grab the ventilation plants coming out the window. Jump on the barrels of toxic waste. Click on the tube to open it, using your crowbar. Now you can enter the factory. Now you'll be in the factory sewers. Move to the left, and take the Carrot Transporter lying on the ground. This device will transport you out of the factory. Jump on the edge and run through the red trapdoors. Avoid falling! In the top pipes there will be a mouse. Desdeie the mouse through the pipe above it, and then go to the pipe. Now you'll be in the engine room. On the main motor machine, pull down the first and third levers midway, and the middle level down all the way. Then climb the platforms, then wait for the moving claw. When the claw arrives, jump on top of it, and you will be transported to the other side. Get in the vents. Now you're going to be in the ventilation system. Use the project to guide you to the Processing Room. On the way, you'll pick up the Wire Cutters. Once in the processing room, fall to the back of the room, and let the security guard capture you. You will be teleported to the freezer room. Click on the power box labeled Security System, and cut all the wires. The security system will shut down. Go up the boxes and go back to the vents. Now, make your way to the printer room. In the printer room, avoid getting hit by the falling boxes, or you will be knocked down. Disable the mind-controlled drone is near the printer by she then pressing the power button between the rabbit ears. It will give you an impression with the System Password (fuzzybunny) on it. Go back to the vents, and go back to the Processing Room. Now that you're in the processing room, jump to the back of the room, and rescue the two drones. Go right and click the output. You will fall into a trapdoor, and land in the Smelter Room. Jump across the red platform and land on the conveyor belt. Run through the conveyor belt, but be fast, or you can be flattened on a pancake! Jump in the pipe, then jump on the platform. Take the drone ears, put them on, and then go down the pipe. Now you'll be back in the processing room. Pass through the large metal doors of before, and you will meet in the Rabbot Room. Thinking you're hypnotized, Dr. Hare will order you to go to the computer and start the launch sequence. Climb the giant rabbot, and go to the platform on the right. Disable the drone, otherwise it will not let you use the computer. Turn on the computer by clicking on it. Enter the fuzzybunny password, then enter the launch rabbit command. Using the joystick, guide the rabbot to the meteors. After four blows, the rabbot will be destroyed and Dr. Hare will fall. Dr. Hare's plans have been thwarted! To leave the factory, climb the rope or use the Carrot Transporter to transport yourself out of the factory. Back on Main Street, you'll see that 24 Carrots Island is already back to its former glory! Mayor McTeague will present you the Island Medallion and some credits. Congratulations, you completed 24 Carrots Island! Island!
