For the best experience on our site, you need to enable Javascript in your browser. Login/Join/0/\$0.00 Keep baby close and protected with the SwaddleMe Deluxe By Your Side Sleeper – the safest way for baby to sleep next to you. It offers a cozy and comfortable sleeping area with mesh sides that circulate air and provide easy access to soothe the baby. The sound, light and vibration unit helps your little one fall asleep. Features: Provides a clear picture of baby Mesh sides helping air circulate to protect baby from overheating Folds flat for travel Sturdy metal frame Soft, Comfortable Fabrics Includes mattress and decorated plate Detachable sound, light and vibration unit plays heartbeat, nature sounds and music to help little ones fall asleep Age Range: Birth to baby starts pushing or rolling over I love how easy the deluxe folds, stay in one piece (except for the slip-in-place sound and vibration unit). It is also very compact and lightweight- perfect for travel, even by plane! I've found that keeping babies sleep environment familiar while on the road can only increase your chances of getting some much needed shuteye yourself. My first baby was a nightmare regarding sleep, so in preparation for baby No. 2, we were willing to try all kinds of sleeping products. The SwaddleMe Deluxe By Your Side Sleeper (let's go with Deluxe for short) came a few weeks before baby, and I couldn't wait to try it out. I opened the box and pulled the sleeper out. To my delight, it was already in a piece with no editing required. I looked at the instructions long enough to see that they are very simple, because this product is pretty obvious. The most important part is folding and unfolding/setup, which is demonstrated with a concise combination of illustrations and text. These are my kind of instructions... you don't really need! Folding includes three quick steps, while the setup is four. Anyway, it only takes a minute. The Deluxe is intended for use from birth until your baby can roll over or push up on hands and knees. The manufacturer's website perfectly describes it as a safe, cozy, comfortable sleeping space. The mattress feels nice, and the mesh sides provide good air circulation and a clear view of your newborn. The bells and whistles of this sleeper are packed into the vibration and sound unit, which is a separate piece. It requires a small screwdriver to access the battery compartment and three AA batteries. Once it's gobbled up, the device simply slides on to the frame the sleeper. The sound is controlled by a four-position slide switch, which offers music, nature and uterine sounds; there are also different volume levels. After 20 minutes, every sound automatically switched off to save battery. The light is super handy if you stumble around in the dark to find a pacifier or check the diaper status! We don't use the vibration function very much because it's a bit loud. Harvey often lazed in the Deluxe during his first few weeks. We were fighting jaundice and had to place it near windows while keeping him in a safe sleeping environment. He slept so well in the sleeper, despite his ever-changing location in the house. Now that he is 6 weeks old, we mainly use it for night trips, because we prefer not to go to bed regularly. I love how easily the deluxe folds up, staying in one piece (except for the slip-in-place sound and vibration unit). It is also very compact and lightweight- perfect for travel, even by plane! I've found that keeping babies sleep environment familiar while on the road can only increase your chances of getting some much needed shuteye yourself. One of my favorite features is how easy it is to clean. The built-in plate is machine washable, with no special care required. The frame and pillow can be easily wiped off with a damp cloth. Since Harvey was born during the flu season, I usually wipe it all off with natural, non-toxic disinfectants. The SwaddleMe Deluxe By Your Side Sleeper comes in a sleek grey and white neutral design and is sold for \$60. (The standard version is \$40.) The main difference is the sound, light and vibration unit, so you decide what works best for your family. Price: \$60 Buy: amazon.com ©2020 Walmart Stores, Inc.
