Similar tags for this file This file is also searched by such requests: Steam_api64.dll missing, GTA v, call the task thing, die light, error, steam_api64.dll crack. Additional details on steamapi64.dll. Steamapi64.dll is used by games to access some of steamworks features and solutions, such as statistics and achievements, user authentication, finding game servers, and connecting with other Steam users. Steamworks API also offer Valve Anti-Cheat functionality and drm protection. Steamapi.dll - dll file called Steam Client API is a part of the Steam Client API program developed by Valve Corporation. Some apps or games may need this file to function properly. If steamapi.dll is missing, every time you start the application/game you may encounter various kinds of errors. 3 years ago Nov 14, 2014 The most common reason for steamapi.dll missing error is that you downloaded a cracked game – in this case, the steamapi file.dll in a game modified and your antivirus may have been removed from your computer (see antivirus reports). To fix an error, you'll need to purchase a game or turn off your antivirus program, reinstall a program, and run it again. Steamapi.dll is one of the files that gets cracked to allow you to run the game and bypass Steam's DRM. The copy of the game is a pirated version. ArchivedSteam games cracked by teams give you to copy steam_api.dll + steam_api.ini to the game's installation folder in order to play them without installed steam. The problem is many of the cracked steam_api.dll in the new releases appear as infected by 40+ scanners when scanned (such as virustotal). The original you are replacing and earlier cracked versions still show zero viruses during scanning. Is there a safe known cracked steam_api.dll that people use? I've read about a universal cracked steam_api.dll on gamecopyworld, but can't find anything more about it. 5upvotes 3comments Compaties with Windows 10, 8, 7, Vista, XP and 2000 Optional Offer for WinThruster from Solvusoft | Licence | Privacy Policy | Conditions | Uninstall Steam_api.dll is a type of DLL file associated with amazing adventures around the world developed by PopCap Games, Inc. for the operating system The last known version of Steam_api.dll is 1.0.0.0, which was produced for Windows. This DLL file has a 5-star popularity rating and an 'UNKNOWN' security rating. DLL (dynamic link library) files such as steam_api.dll are small programs, similar to EXE (executable) files, which allow multiple software programs to share the same functionality (e.g. printing). For example, suppose you are running Windows and editing a document in Microsoft Word. The DLL file that controls printing does not have to load unless it is running is necessary - e.g. you yourself to print your document. When you select Print, Microsoft Word calls the printer's DLL and loads it into memory (RAM) at that time. If you want to print a document to another program, Adobe Acrobat, for example, will also use the same printer DLL file. Because they are shared files, DLL files exist outside the software application itself. Although this provides many advantages for software developers, this separation also provides an opportunity for problems to arise. Quite simply, if Windows can't load your computer file steam_api.dll, you'll experience an error message. See Causes of steam_api.dll below for more information. DLL errors, such as those associated with steam_api.dll, occur most frequently when you start the computer, start the program, or try to use a specific function in your program (e.g. printing).
