Bitconnect lending spreadsheet

What is Bitconnect? Bitconnect.co is an open source platform where you can buy, sell and lend bitcoins to trusted members of the community. Bitconnect members directly restrict each other's contacts in order to allow all other members to purchase, sell, or lend operations to each other. Bitconnect was not designed as a company nor a financial institution, but acted as a collective. Bitconnect's mission is to make Bitcoin the main payment system used by the world. We propose encouraging the ups and down of bitcoin by providing this community among peers, where all members interact directly with each other. For this we have provided you with several modules aimed at connecting with our market. Some of these modules include buying, selling, lending and listing services (where we act as a bitcoin payment administrator on your behalf.) Bitconnect has designed these modules from the ground to ensure extensive verification and security so that the highest-ranked service providers are promoted first, providing an opportunity for honest participants to obtain additional income or purchase bitcoin through our product offering. About Bitconnect - Bitconnect price now \$160 and listed in the top 20 in the crypto value market - BitConnect has more than 50,900 customers – market capitalization is \$249,611,204 Million – The price of a BitConnect coin has grown 70 times!
