Earth science regents review book answers

The goal of the site is to provide resource and links to useful review materials for the June 15th, 2017 Earth Science Regents. Please take the time to review each section and report any links that don't work here. The NYS Regents examination in Earth Science is designed to measure performance in a study course that highlights student laboratory activities and field experiences in an investigation approach to learning activity. The examination consists of two components, a laboratory performance test and a written test applied separately. The performance component consists of tasks to be completed at three stations - Station 1 - Minerals and Rock Identification, Detecting an Epicenter, and Building and Analyzing an Asteroid's Elliptical Orbit. The time allows for the completion of the tasks at each station is 9 minutes.
