Before you get started, read all the instructions carefully to ensure full understanding and get the best possible performance for your device. WARNINGS: (To prevent accidents and damage) • DO NOT install any device or cable where;— this may hinder the operation of the steering wheel and gear shifter. — may impede the operation of safety devices such as airbags. — may impede visibility. • DO NOT operate the device while driving. If you want to operate the device while driving, look carefully. • The driver cannot view the monitor while driving. • The driver must not wear headphones while driving. Marking products with lasers The label is attached to the chassis/housing and says that the component uses laser beams that have been classified as Class 1. This means that the device uses laser beams that are of a weaker class. There is no danger of dangerous radiation outside the device. Page 3 For safety... • Do not raise the volume too high as this will make driving dangerous by blocking external sounds and may cause hearing loss. • Stop the car from performing complex operations. The temperature inside the car... If the car has been parked for a long time on hot or cold days, wait until the temperature in the car becomes normal before starting to work the device. For security reasons, a numbered ID card is available for the apartment and the same ID number will be printed on the device case. Keep your card in a safe place as this will help authorities identify your unit if it is stolen.
