ShortcutsWP:LAMEWP:LAMESTWP:HALLOFLAMEWP:HOWMANYANGELS What powerful competitions emerge from trivial matters — Alexander Pope, Rape locks An unidentified clerk (center) tries to bring an end to a major edit war involving dozens of respected editors. At her feet, three confused newcomers are seen caught in the middle of a dispute. Two editors by each other's throats while they were engaged in the Edit War. Soon the judge will separate them and decide their fates in WP:AN3. Occasionally, even experienced Wikipedias lose their heads and dedicate every waking moment to editing warring over the mostgvious things, sticulving time discussing topics without practical value, or wrestling over questions whose answers have no practical consequences. This page documents our most endeading examples. It's not comprehensive or authoritative, but it serves as a showcase of situations where people lose sight of the big picture and obsessively exude huge amounts of energy fighting over something that, in the end, isn't really that important. The ordacement of editing is believed by some to be important, possibly because of the historical regularity and frequency of these wars. Careful and scientific study of available archaeological evidence has even that editing wars can have recurring on a regular basis goes all the way to the beginning of recorded history, even before the advent of proper writing around 2001 C.E. (see Wikipedia). In some earlier cases of warring, dating back to the good old days, participants would simply use their swords and fight the battle, or later, with their guns and fight a duel. In modern times, physical combat has been banned and replaced by careful incitement of personal attacks, strategic 3RR templating and search, timely notifications to WP:AN/I and (in some cases) marking changes as minor editing. Indeed, the revolutionary view of Wikipedia has changed the way things are done. It changed them from the real one to not ending it. On the other hand, no one gets shipping (so far!). Guidelines on how to create lameness This section is intended as humor. It is not, never has been, nor ever will be, the politics or guidelines of Wikipedia. Instead, it illustrates standards or behavior that the Wikipedia community generally does not accept. Some debates are born lame; some achieve lameness; some have lame thrust on them. Once they encounter a debate that is borderline lame, some Wikipedia may be tempted to do something useful. This is a big mistake. Left to its own devices, the debate could inadvertently become useful. What's the fun in that? It is essential that as many editors as possible ring, not adding to the discussion at hand, but by showing, LOL and pathetically commenting on how pathetic it is and how it is a huge waste of time (See self-fulfilling prophecy, Positive feedback and exponential growth). Just stating that the debate is lame is often not enough; any contrary statement must be rejected with increasingly fierce claims of lameness. While at first blushing, wasting time moaning about what a waste of time is something can seem illogical, the inherent irony only increases lameness. An additional step to increase lameness is to include repeated links to this essay, which is WP:LAME. Administrators have a special role to play; proposing and implementing bans on topics for lame participants is doubly effective: it not only increases today's lameness, but, by abolishing the debate, it helps ensure that the lame issue remains unresolved for future generations of Wikipedians. Poor. The best way to start a lame editing war is to change a large number of articles based on your interpretation of minutiae in the style manual. If this does not work, try to change the MOS itself; It always works. Guidelines on how to add an entry to this guide If you want to add a lame editing war to this page, keep in mind the following: It must have been an actual editing war. Discussions on the pages of conversations, even around trivially lame details, are not offices of wars and should never be added: we want to encourage such discussions between users/points of view (as opposed to actually editing the warring). Note for example that pithy quotes on conversation pages may be appropriate for Wikipedia: Talk pages. It really should be one of the most heist edit wars. Not just garden variety lame. Unless the participants or link to their user pages. People have lapses in judgment, and some end up editing the warring; they should not, however, be stuck with this for the rest of their wiki careers for no reason. This is absolutely no place to harp over someone's past editing. Be careful to avoid even the semblance of taking sides in war. If one version is more or less accepted after that, it's okay to find it, but the fact that there's been a war of editing means that neither side has been right all along. Be brave! If you think the editing war was truly lame, add it! You don't have to ask on the chat page. Lameness should speak for itself. Of course, editors with a more experienced eye for lameness may disagree with your claim to the most pathetic, which can result in another miserable war of editing! Note that the original research and verifiability rules should not apply to the article namespace and not necessarily to pages such as this one in the Wikipedia (project) namespace. This is for the community, not the average readers. Witty, insightful comments are encouraged here. Ethnic and National Quarrels Main page: Wikipedia:Lamest edit wars/Ethnic feuds People Chopin Was Chopin Polish, French, Polish-French or French-Polish? For years, there has been a low-level (and sometimes high-intensity) conflict about which country can search for Chopin as its son. Or was it Szopen? The Observer learns a lot about the nuances of citizenship, nationality and ethnicity. Law students can claim fine points of jus sanguinis and jus salt The use of Polish-born was branded a racist slur. There is a heated debate about whether quoting the bill's passage is considered an original survey, which amounts to dropping Mentos in a bottle of Pepsi to see if it explodes. Can you emigrate from a country you're not a citizen of? Can you get citizenship if you already have one? The possibilities of intensive study are endless. Famous witnesses such as Obama, Churchill, Sean Taro Ono Lennon and Dr. Seuss have been pressed to appear. Collateral damage even comes to WP:Lama, where Chopin's remains are divided. The body rests in Paris, the heart in Warsaw. Anyos Jedlik Is considered by both Hungarians and Slovaks as the unsung father of dynamos and electric motors. Freddie Mercury's true origins. Is he Iran's most famous rock star? Indian? Parsi? Azeri? You'd be surprised how many people annoy this, to the point where it's still a hotly contested item there. Only one example can be seen here, and this one, like everyone else, had its share of random vandals, people leaving unmarked anonymous insults and snorting their teeth. Let's just say for now it's Parsi whose parents originated in India! Just don't even think to suggest that he left Queen or is a former band member, though, or you'll really get people hackles up... Ivana Miličević But where did this great beauty come from? Is she a Bosnian actress of Croatian origin/ethnicity or a Croatian actress? Should she be called an American without supply because she's lived in America for almost 30 years? Is she Bosnian because she was born in Sarajevo or born in Bosnia because Bosnia did not exist as a nation when she was born there? Go ahead and edit the article and see how long your version takes before someone returns you! Jennifer Aniston Is she American? Is she Greek-American? Is it English-American? Franz Liszt Was born in what was then Hungary, but is now part of Austria to ethnic German parents whose families have lived in Hungary for a long time, and we all thought it was common knowledge that Liszt claims that Hungary is his homeland and Hungary is his nationality. Er, right? Order the biggest and cruelest war in recent memory! He was mercifully confined to a chat site, but what a chat site it was. How does Liszt's real name, Franz or Ferenc? Or was it the publication of Heinrich Heine's rude poem about him? Why didn't he learn to speak Hungarian? Did he like goulash? Can he dance csárdás? The farce was further exacerbated by the occasional appearance of anonymous trolls insisting that Liszt was, in fact, Slovak. This Liszt is incomplete; you can help Wikipedia by trying not to expand it further. Jeremy Lin Is he American? Is it Chinese and Taiwanese Chinese-American? Is it Chinese and Taiwanese Chinese ancestors Freedom fighters and threat to humanity Mao Zedong worshippers and modern Chinese Unionists and Independencrats revive arguments that once almost sabotaged zh.wiki, this article has the (mis)wealth to have a lengthy FAQ that uses statements such as Chinese can also be Pekingers and Jeremy Lin's maternal grandmother lives in Zhejiang and thus he has an undeniable Chinese background to satisfy both sides. What's my nationality? Nicolaus Copernicus were around today, he might suggest he'd be content to be remembered as an astronomer, but we'll never know. Was he ever married? What's his middle name? No one knows exactly. Whether this editing war will spread to a page on its memorial on the periodic area is unknown. Nikola Tesla Was born to Serbian parents in a part of the Hungarian half of Austria-Hungary and is now in Croatia. He eventually became a naturalized U.S. citizen. Was he Serb? Croatian? Austrian? Austro-Hungarian Empire? Istro-Romanian? Jewish? American? Mars? There's even a certain sub-chat site just for this! It's up to you! But don't forget to leave an editing summary that says it's pathetic to choose any other version. P. G. Wodehouse Who said that the English-speaking world is immune to pointless ethnological disputes? This discussion, over one word in the article, consumed most of the month of September 2007. The key guestion is: is he an English writer or is he a British writer or is he a British writer or is he an English descent? Can we add an American somewhere because he moved to America when he was 74? More than half of the chat page is dedicated to this one issue. Two editors at war over this have filed simultaneous 3RR reports against each other and RFC. Accusations of weaseling acts appear on the interview site. Fine policy points under discussion: does return to prevent war from returning constitute a real comeback? Does it count as a revert if you call it vandalism, even if it's content? Is it bad faith to remove HTML comments from the site if only editors will see them, or are such invisible comments representing their own vandalism? Is it a bad thing to use the minor button for Change? Raven Riley Is this porn star Italian? Italian? American? Puerto rican? Cypriot? Does he have Indian blood? Who cares? But make sure that when you change it, you do not think at all about citing any source; Please feel free to offend whoever put it in a previous ethnicity. Anonymous editors: be sure to insert a multitude of her different real names, without a source. German-born Werner Herzog, reportedly the mother of a German and a Yugoslav father, and grew up in Bavaria, Germany. Does Herzog: a) Croatian or b) Serbian? How about the fact that relatives live in Bosnia and Herzegovina? Use editing summaries to publish or hear rumors about interviews you've conducted. Mirrors and forks are also excellent sources. After consulting the printed source, it turned out that it was the mother who was from Croatia. Alas. Saladin Biographers who knew him said his family was Kurdish. But was it a Kurd, an Arab, a Turk, a Persian, an Armenian, some combination of these, or Something else? Are his father and uncle Kurds, or Kurdish Arabs, or Turks, or Kurdscized Turks? Milla Jovovich Is Млииа Hataa Jeobobи/Milica Jovović Serbian/Montenegrin or just Serbian? Montenegro in 2006, but Milla was born in Ukraine in the Soviet Union in 1975. What are you on? U2 Are U2 an Irish band or simply a band that happens to be from Ireland, since two of their members were born in the UK? Over several years, there have been many discussions about whether U2 should be included in the lyrics are an Irish and British rock band. Edit wars continued back and forth, and at one point the article even said U2 were an Irish and British rock band (which didn't last long). A similar compromise could have been an Irish rock band with two British members. [[.. /Wording#U2] And it was in addition to the debate about whether it should be used is or is!]] Casey Kasem may have foreshadowed this editing war decades ago when he offered his first impression of U2 early in their career: This sucks. Nobody cares. These guys. from England and who's in pain! Eventually, over the course of two and a half weeks, there was a heated debate that resulted in at least one editor being alerted, to eventually come to the conclusion that U2 were, in fact, an Irish band. (At least for now.) And why didn't anyone even edit the war to use it or did they? What is life? Nelly Furtado Is she Canadian or Portuguese-Canadian? Editors argue mercilessly about the formalities of citizenship and nationality. What country citizenship laws should be used? She was reportedly born to Portuguese parents and released albums in Portuguese, but was born, lives and works in Canada. Accusations of xenophobia have been made. Similar to reality television, this could get ugly. Confusingly, she has a star on Canada's Walk of Fame (for Canada) and has been awarded the Commander of the Order of Prince Henry (for Portugal), expanding the war of editing well into real life. Andy Murray Is this Grand Slam-winning tennis player from Scotland, (or Great Scotland) Great Britain, or Great Britain? Despite the leadership compromise calling him both Scottish and British, users and IPs don't realize they're talking about the same place, so every year, when Wimbledon comes, you can always see edit war or talk page arguments on the subject, and like tennis, the final result of this edit war will never be known. Mostly going down the line Murray is called Scottish. Murray is anti-English and British after the media misinterpreted a joke with Des Kelly and Tim Henman in 2006, so he has to play for Great Britain. Any of this is begs with another argument and goes round all summer until a regular editor returns it to the compromise of consensus. Of course, consumers of the British press will be aware that, to those south of the border, Murray is British until he loses the match, at which point he returns to Scottishness. But the really lame thing about this site is that it's not the only regular editing war. The page also shows the argument of whether Murray was born in Dunblane or Glasgow. James Clerk Maxwell Was his nationality Scottish or British citizenship, or (3) Scottish & amp; British citizenship (or (2) Scottish & amp; British citizenship or (2) Scottish or British citizenship or (2) Scottish citizenship or (3) Scottish & amp; British citizenship (or (3) Scottish citizenship or (2) Scottish & amp; British citizenship (or (3) Scottish & amp; Brit over the formalities of nationality and citizenship in more than 27,000 words of discussion (and counting). The editors then adopt a strategy to discuss which of the versions should be in place until the debate resolves the issues, but it remains a mystery whether they did so expecting the issues to never be resolved. George Michael was Jewish. his grandmother or never? People claiming his grandmother was Jewish but married a pagan and raised her children without knowing about their Semitic heritage. It was during World War II, and she 'thought that if they didn't know their mother was Jewish, she wouldn't be in danger,' Michael said.' They also argue that he should stay in the article because being Jewish (ethnicity) and practicing Judaism (religion) are two different things. The opposition claims that George Michael was simply confused by the name of his grandmother, Daisy Angold for a Jewish surname. One of the value o oppositions found a genealogy for George Michael's grandmother leading up to 1828 in London. The same person linked an article discussing Christmas carols written by Jews on an interfaith support website claiming Michael the Jew was an internet myth. All this argument led to mass editing of the warring, accusations of Jews and non-Jews trying to wash away the history of whites and anti-Semitism. Dates on the talks pages stretch from 2/10/07-12/20/08, 6/25/11-1/11/13, 12/30/16-1/5/17 and 10/19/17-11/14/17. Three of the many examples of 3RR are here: [2], [3], [4]. 21 Savage How many nationalities does he have? a lot. Born to Haitian-Dominican parents in the UK but raised in Atlanta, Georgia since the age of 7, 21 Savage's citizenship status has been challenged since his arrest in February 2019. Is he English? American? The discussion on the interview site included a discussion about his rights to be a British citizen, taking into account that nationality laws between the UK and the US differ. From now on, he's described as an English-born rapper based in Georgia. Because of his debate status, whether his date should be listed as 22 October? Does he even qualify for DACA protection? Why does he have a 12-car garage? The rules on the imposition of a garage do not have to apply. No, this is not the title of the Liancourt album, but a group of sinking volcanic rocks that japan and Korea have since, really, really long ago claimed. [5] Evidence of ownership for both sides rests on hard-to-read decaying pieces of old paper. This is not a silly dispute because rocks have important economic and military value, yada yada. Serious Japanese or Korean Wikipedia may even decide to make these rocks their case. This article extensively documents each small factoid that could indicate the ownership of one country, and each, of course, has Statement. Newspapers and online forums such as 2channel are part of the debate, but all claim their POV is NPOV. As correctly fits this great political question, most editing summaries begin with rv... Fortunately, at least the title of the article is settled on ... or does he have one? See also: Liancourt Rocks dispute. The Association of British Counties you'd think U.K. districts would be a pretty uncontroversial topic, but no - this insider pressure group of outsiders that includes ninety-two eighty-six counties of the United Kingdom (which does not include government policy) is guaranteed to bring out the red fog every now and then. One thing is certain, the editing warring on this article is far from over ... Is this term acceptable to the British Is this term acceptable? Does geographically include the entire Northern European archipelago; or is the term inherently anti-Irish? Should it always be Great Britain and Ireland? Warring removals and campaign upheaval on almost every article containing the words 'British Isles' have resulted in bans on topics, gruelling skirmishes packed with sock warriors and general misery over the matter. There was really no consensus on the ideal term: or even if the existing one is really a problem or not. Enceladus As much as 1.40 billion miles) from Earth. politics matters. The image on this featured article shows saturn's tiny moon on a map of the British Isles the United Kingdom, the Netherlands Great Britain and Ireland, Luxembourg and the North Sea. Edit the warring, vandalism charges and full protection of the article. Ceviche Is this marinated raw fish delicacy invented in Peru, or ecuador? Or maybe Mexico, Polynesian, Spain, Chile, Granada, Argentina... Derry/Londonderry Should an article about this town in Northern Ireland be called Derry or should it be called Londonderry? With loyalists and Republicans (and even nationalists) on both sides, don't expect an answer anytime soon. \*cough\*WP:LONDONDERRY/WP the building is the bat building or the B.A.T building (from British American Tobacco). For a while, this was resolved by guoting both, but then followed by further editing of the engagement about whether to follow it '(better known as a bat)' or B.A.T. Looking for guotes showed that it was mostly called BAT, leading to the absurdity of three versions of the nickname in the lead-up to this barely noticed tower block in a small provincial town. The costumed climb to the said tower now seems inevitable, presumably dressed as an alternative name is Lerin Macedonian. Bulgarian or South Slavic (covered by both and Bulgarian). Fustanella Who first put on a frilly skirt and threatened to kill anyone who questioned his manhood for it? Was he Albanian or Greek? If Albanian, Gheg or Tosk? Fortunately, none of the modern warriors on this topic have access to real weapons (hopefully!) Caesar salad Veni, see, vici ...... And I'd like something light for lunch today. Was this delicious salad invented in Mexico in 1924, or in ancient Rome? Was it named after Caesar Cardini or Julius Caesar or is it something called Letchworth salad? A slow-motion edit war spanning over one two three-four five-five-five-eight-nine-nine-year-old is surely the best way to find out. Grand Theft Auto IV Is Niko Bellic (main character) Serb. Slovak, Bosnian, Croat, Russian or from an unnamed Eastern European country? Normally reliable sources disagree on this issue (with those written pre-launches suggesting that the character is Russian and post-launch is Serbian or Croatian), and the game itself is just ambiguous enough about the topic to create disagreement (and of course it is a part of the world where nationalist feelings run high, see Balkanization - even the order that Croatia and Serbia are listed also offends some.). At one point, the article contained five consecutive guotes, repeated each of the three times mentions of the character's nationality. totaling a whopping fifteen guote numbers throughout the article to justify the alleged nationality of the character in the fictional video game. The war (unknown) and the name of Despite more than a decade since the game's release, and despite notices about editing and text alerts in the body of the article and FREQUENTLY ASKED QUESTIONS on the chat page, the topic still receives many changes annually, and the topic is repeatedly raised on the article conversation page. Hogenakkal waterfalls Are these beautiful waterfalls on the Kavera River located in Tamil Nadu - or on the border of Tamil Nadu and Karnataka - or in Tamil Nadu on its border with Karnataka? Or is it really the Cauvery River, and the separate dispute over access to the island below Waterfall, have no bearing on that, or do they prove that the location of the Falls must be at the border? Whatever you believe, be sure to take the (Google) map to the debate and jump out that your opponent's sources are not RS or NPOV! Hummus and friends Hummus: they love it in Israel, so it should not be in the category: Israeli cuisine? Or is it purely Arabic food illegally occupied by the Zionists? [6] Following a related skirmish on Za'atar, the ingredients are listed in the Order, but was this all part of a cunning Zionist conspiracy? Don't be silly, the answer has arrived: and anyone who removes a Hebrew name from the first sentence is a racist vandal. [7] Meanwhile, back in Hummus, it is trying to replace the mention that the Oxford English Dictionary says that the word entered English via Turkish with a reference to the Greek name for eating. Finally, Tabbouleh saw action, this time mercifully free of Arab-Israeli connotations; Instead, the guestion was: can we call this dish part of Lentine cuisine, or is the very term Lentina a European colonial conspiracy to divide a great Arab nation? [8] Meanwhile, attempts are being made to kick the Turks out of a description of a traditional Greek (or perhaps Arabic) pie dish (or is it pitta?), while controversy is posing as to whether the israeli falafel house photo represents Zionism. Bottom line: Delicious snacks in the Middle East are hilariously politicized. As of January 2015[update], the conversation page for Hummus says: The Hummus article, along with other articles pertaining to the Arab-Israeli conflict, is currently subject to active arbitration drugs. Lake Michigan-Huron Is it a lake or is it just a name? Or is it a system? And if that's just a name? Or is that the lake just hydrological? Should he be called a llaque instead? People to turn on and give The higher priority believed that the actor had a significant history in that state of India, as well as enough cheerleading followers to deserve transliteration, while editors from Tamil descent were of the opinion that he would surrender his unique issue. The Japanese Sea The body of water Formerly known as the Sea of Japan (East Sea), will soon be replaced by symbols of Japan-Korea relations, and then simply called the Sea! Look at Prince or FYROM. Or should it be the actual most common English and international name of the Sea of Japan (East Sea), brackets and all? Should the dispute page be called a dispute over the naming of the Sea of Japan or a dispute over the appointment of a water body between Japan and Korea and the Russian Far East? Siena College Which is an unincorporinated (and therefore limitless) hamlet of the city of Colonie north of Albany, New York, is this small Catholic liberal art college in Loudonville? The debate reaches 30,000 words, returns in all three articles, two are protected, an informal RFC opens and one editor briefly retires. Hata clan No one believes that the Hata tribe of Asia is in any way Jewish. Yet we seem to have an ongoing editing war just about how to put it, with a book ref from the eminent author Jon Entine stating the fact that all parties (and healthy people) will agree, right there at the bottom of page 117. Vipera palaestinae Snakes from the Middle East are also hilariously politicized! This one is located in Syria, Jordan, Israel, Lebanon and Palestine or palestinian territories. Szlachta Can khmelnytsky's uprising be described as an anti-Polish revolt? Or was it just a revolt that took place against the Polish-Lithuanian Commonwealth? Names Main Page: Wikipedia:Lamest edit wars/Names English names Aeris vs. Aerith Character Final Fantasy VII was introduced to English audiences in 1997 as Aeris, but its name changed to Aerith in later performances. Was the first name misspelled? Misrepresentation from the original Japanese pronunciation? That's how it was when it was first published in English so that makes it her official name. But later appearances are official, right? She's been known and named Aeris for years, so it's a common name, but she's been going after Aerith since 2002... With each title in the Compilation Final Fantasy VII (2003) using Aerith, the engagement seems to have ended. Lengthy discussions are archived in talk: Aerith Gainsborough/Name debate archive (page size 113kb). Avengers (comics) Should there be a separate page for the New Avengers (comics)? Is the team name now New Avengers or is it just the new Avengers? Is this a new comic book entirely or just a continuation of the old one? After a positive vote on the merger, a series of comebacks occur when the editor merges the two by simply merging the merged information into an article, creating two articles in one. The slow nature of the war with returns means that, technically, no one violates WP:3RR, and requests for help from other administrators go unnoticed because, well, it's pathetic, After a series of exchanges on the chat site questioning people's command of English, as well as their sanity, the problem seems to have been solved by creating New Avengers (comic book) (keep a note of oh-so-subtle difference) based on WikiProject Comics guidelines. C# In the name of the programming language C#, is this # thing (octothorpe) after C sign number or musical sharp symbol? What's the wrong name template supposed to say? Some argue that the Microsoft FAQ supports a sharp symbol, while others argue that the ECMA standard promotes the # symbol and has better browser support. Some refusing to discuss the issue on the conversation page. The issue was addressed by exchanging emails with Microsoft stating that in their opinion it is an octothorpe symbol that represents a sharp symbol, similar to &It;= being a less than equal symbol, and that Microsoft therefore disagrees with ECMA. Written by Netscape, but pronounced Mozilla, eh? Anyone? Clover (creature) The creature in the film Cloverfield was never explicitly named in Or was it? Is Cloverfield the name of a

Some reporter kept talking about the creature itself as Cloverfield, so let's go with Cloverfield, so let's go with Cloverfield, wait, maybe it should just be a Cloverfield creature? Or wait, maybe it should just be a Cloverfield creature? NPOV. Rumor has it the production staff just called him Clover, but it's just a nickname, it doesn't count, does it? Regardless, we can't use it until we find a source that confirms they call it Clover... Okay, now we have one. How about we bypass all naming conventions and call them Monster/Clover to make everyone happy. No, it's not good, back to Clover. But wait, it's still not the creature's real name, so we shouldn't use that. Follow and interspersed with kavalkad OK to be that just compromise and set it back <editor's favorite= name=&gt;na . It is extremely important that an article on a fictional topic that has only eluded the AfD is duly named. All calm down - relax, have a coffee and listen to your favorite ... Erm... great musical circle. The surprisingly common Lake Devils' Lakes Devils Lake (North Dakota) Shockingly, there are multiple locations in the United States with the name Devils Lake with and without apostrophes. A very fierce war broke out here about which one should be found, whether an out-of-place site is needed, even because of the use of apostrophising - eventually literally degenerating into my lake is better than yours! Solution: RENAME FREAKIN' LAKES!!! Eagles (band) Does the name of this band include a definite article? Is it the Eagles or the Eagles or the Eagles in published interviews and on official websites. Eris (dwarf planet) Was Eris named after the Greek goddess Eris or the Greek and discourdanical goddess Eris? Does it matter that the IAU and the discoverer Michael E. Edit the war results in the loss of good article status and temporary locking of articles (but now the featured article, hoorah!). A fight of Discord! G4techTV Canada Does the name of the Canadian TV channel, originally an offshoot of the American namesake, the word Canada in its official title, ergo it should be engecked in the title? Fossil fuel for reciprocation of piston motors equipped with spark plugs Gasoline gasoline gasoline gasoline gas mixture refined flammable organic liquid compounds for reciprocation of piston motors equipped with spark plugs Should this substance be called 'gasoline'? We haven't decided yet, but rest assured, while some silly people try in vain to reach consensus, those with the power prove their point with a comeback. There have even been threats from ArbCom. Silent Hill: Hospitalized or imprisoned Alessa is trapped, but how trapped do you have to be considered captured? This forced medical aid makes all the difference in the world, so why should we need the word captured? While playing the game, the user can get the idea that the character implies something, so a subtle win winr into the source material? It was important to some, obviously, because a massive edit war broke out here and there over a few words and the war would still be going on, were it not for the fact that administrators did some shallow digging and discovered that the instigator of the editing war was a famed blocked user who was found to be creating no fewer than 23 sockpuppet accounts. Heather from Silent Hill 3 The protagonist from Konami's survival horror video game Silent Hill 3 is known to those who played the game as Heather. But what's his name? Is morris after the actress who portrayed her? Is it a Freemason? Does anyone care? Many source is worth more than yours' edit war broke out in an unlikely place. Halo 1, Halo 2 and Halo's numbers for their albums? Does Trent Reznor's acceptance of numbers mean anything? Are Halo's numbers significant enough to be dismembered? Will people be looking for Halo 2 or 3, not expecting video game information? Is halo shape Halo 3 or halo\_03 HALO 3? Fortunately, this debate does not appear to have rekindled with the release of Halo on 4 October. Hillary Clinton Should Hillary Clinton or Hillary Rodham Clinton say in the infobox? This protracted editing war since 6 June 2015 has led to two full protections, while also leading to the loss of halfback indefinitely after one has expired. It also led to RFC stopping the war. Wait, that's Hillary Diane Rodham now?! Interstate 75 Is the southern terminus interstate 75 Is the southern ter Miami, Florida, a more famous city with twice as many residents 10 miles away? The straw vote after the debate indicated that most participants preferred the latter text, but there was no consensus. The debate (and the editing war) calmed down for several months until someone affiliated with Miami Dade College, whose Hialeah campus, er, near Miami, rekindled the reversions by insisting that the phrase should be listed with an online reference and that near Miami violates WP:NPOV. Since then, the dispute – mainly through edit comments – has widened when asked whether those quoted in Hialeah should trump the unpoily near Miami. The dispute has caught up with MDC students and faculty against a handful of Wikipedians who believe precedent should prevail. As the stalemate continues, the rest of the world passes... until finally, it seems in Hialeah, FL near Miami, with a quote! gets a nod. Lady Jane Grey Was she really queen of England? Should her site be with Jane of England or Lady Jane Grey? Should She be called Her Majesty Queen Jane? Does her husband deserve to be included on the United Kingdom's List of Royal Conse? (Notice that until recently, the Royal Conse of the United kingdom was a red link, unlike the times in Liverpool.) It resulted in many cutting page moves and a story, multi-page edits and flaming ones on those conversation pages. The warriors didn't get hurt even when it stood out how dead Jane was on her own, though mercifully none of them met the
same fate as their subject by having their heads untied. Although that would reduce the chatter! Libertarian socialism Various supporters of the American Libertarian Party (founded in 1971) claim to possess the meaning of the word libertarianism, that putting alongside socialism is a contradiction in terms of, and thus libertarian socialism (described 1850) could not possibly have existed. A war of editing ensued and a war of editing ensued and a war of demands for deletion. J.K. Rowling Is her name pronounced as rolling or rhymes with howling? Rowling claims to pronounce his name as rolling. The irritating editor claims it is a British pronunciation and the American pronunciation of her name should also be noted. It's a bit funny because she's English, and therefore, of course, she'll pronounce it in an English way. Cue endless spats on talk sites about whose arguments are more cogent, and more reversion. The question is finally resolved (in a way) very, very obliquely implying that she pronounces her name rolling, rather than stating that this is how her name is pronounced. Edit's war was brief, but, astonishingly, other people have since signed up and filed the same complaint. Maybe it rhymes with Trolling? On the other articles and templates mentioning this award) use the common name of the prize, the official name, the Bank of Sweden Economics? Richard Kyanka or Richard Kyanka An inconsistent brawl over whether the article should be named Richard Kyanka or Richard Kyanka or Richard Charles Kyanka. The disgraced planet Pluto has been considered a planet for decades, becoming a dwarf planet since 134340. Much dispute followed on the page to discuss whether the article should be on 134340 Pluto or whether the disgraced planet should keep its simpler name (or, for that matter, whether it should be considered a planet or not). Potrero Hills are a series of low hills on the western edge of Richmond, California. They're pretty memorable; that's where the Chevron oil refinery is happening. But is it the Chevron Richmond refinery or the Chevron Richmond Refinery? On-and-off editing war over this detail roils for months. After an infuriating (if exciting) administrator goes to the length of full site protection, the war spills over into Potrero Hill, San Francisco, where it is now debated whether the disassociation mark at the top should say: For the Potrero Hills in Richmond, California, see Potrero Hills or For bluffs in Richmond, California, see... or For a smaller mountain range ..... Or isn't it? Is Sega's 16-bit Genesis and Sega Genesis and Sega Console? The article has been moved from one name to another multiple times, there are FREQUENTLY ASKED QUESTIONS and Untruths in FAQs on the issue, and the war has spilled over into Wikipedia talk: Article headlines. The article currently sits in Sega Genesis, and reached the enshrined status of an article in December 2013, so it looks like the debate is finally over... at least until Megatron Mega Drive (which is obviously the correct title of the article), is raised again ... Scotland is a Scottish constituent country) or a country (which connects to a constituent country), or a semiautonomous division of the United Kingdom, or a semiautonomous constituent division of the United Kingdom, or a semiautonomous division of the above, or none of the above, or nation, or kingdom, or a parent nation., or nation, or kingdom, or part, or province, or region, or combination of the above? There have also been similar editing wars on sites about England, Northern Ireland and Wales. Following the fine tradition of truly crappy editing wars, the conflict spilled over into unlikely places - for example, cities connected to Scottish cities had flag icons He switched between the Union Jack and Scotland, with collateral damage seen on Colin McRae and Chris Hoy (whose page during the 2008 Olympics removed/added the and Scottish). St Pancras vs. St Pancras International What name should Wikipedia give to the article on the Railway Station in London from which direct international passenger trains depart? Should it first and foremost be given the historic, shorter, simpler and everyday St Pancras or the (mostly) official, longer, more formal and descriptive St Pancras International? Should the UK convention on calling train station in favour of X station be abolished? For that matter, since St is an abbreviation, should it stop al more (I'm not kidding)? All pretty lame as they all refocus on the article and the two most popular variations are bold in the lead anyway. More moves followed and a stupidly long, long, long court case on the interview site (along with Exhibit A and various friends). It's not settled yet. Star Trek (I/i)nto Darkness Is it Into or into? A simple capitalised letter led to, as xkcd neatly summed up, Forty thousand words of discussion, before proposing a compromise solution ~\*~ StAr TrEk InTo DaRkNeSs ~\*~. And that's more than three months before the movie opens. Representatives of Star Stargaz neglected to comment. State routes Should articles for U.S. government routes use the State Route xx or Ruta xx (state) format or something else (where is the xx route number)? There have been numerous edit battles and huge discussions about official terms versus common ground and through uniformity against state individuality. Some advocated a pipe-tricked version, while others preferred a complete de-adhesion method. This skirmish raged for about a full year between roadfans, WikiProject members of American roads, regular editors and administrators, resulting in several suspended sentences and even a song. The debate was finally resolved by a survey after three previous nominating conventions (#1, #2, #3) failed to resolve the conflict. In the end, the State Route xx format prevailed by a small margin. All articles of the state route in the United States are grandfathers in this format. Looks like the fourth try is charm! Here is a report on the entire war and the final peace agreement. Straight Outta Lynwood For this Weird Al Yankovic CD, the dispute over whether outta should be capitalized has spawned lengthy threads on the admin ad, as well as allegations of abuse and site protection. The arguments focus on whether it is relevant that it is not shorter than five letters, and whether the way the title is written on a real CD is more important than our style manual. Until the change in the naming convention, Outta Lynwood can be SOL (or SoL). Cornelius vas nicknamed The Ass or not. Another good user stopped a brief editing war by adding comments about missed vandalism. Tuatara That weird little reptile from New Zealand, no waiting, it's a diapsyd, no it's a taller animal, reptile once again, ... amniot (??) The drama unfolds ... But the tuatar himself just doesn't care. Oh yes, I know! Her Late Majesty Must the Queen passed away for more than a century still be stylised here by Her Majesty, an epithet conventionally reserved for the current monarch? This great dispute (a fading reflection of the warring here), filling the pages for conversation and editing history, has spilled over to other British monarchs, other royals and title holders, several countries that have had or had a monarchy here, applicants and other royal pretensions, and even hundreds of holders of the papacy, where popes have been confirmed here for centuries as His Holiness, losing and blasing support The ongoing discussions deal with the date format, and the used or unused, existing or nonexistent surname surnames of the names of the names of former fiefdoms (some inherited names, but very few are sure what exactly they are) monarchs and relatively unknown variants of those (as well as the putative name of the editing being extremely trivial. The parties involved guarantee only to target accuracy, and certainly some argument goes deeper than was believed to be humanly possible. It even created an editing war over whether it could be mentioned here. The truce, seemingly imposed by the royal intervention that dragged innocent bystander Prince Michael of Kent, Scottish accents and snail slime, seems to be holding up, although occasionally some new consequences are being created. Local girl makes good Five views of the nobility again, mostly the same parties warring - but this time, align the
opposite. Can an American woman who made her former king her catch retain the title given to her by marriage... or did the attitude steal our king reason enough to (posthumously) return her to the surname of her second husband, Wallis Simpson? See how opposing POVPs enter the debate: the figures who wanted majesty and highness used in the articles of every minor royal MP claiming to deprive an American girl of her only title of nobility, and knightly Americans fighting to a metaphorical death in defense of a compatriot's rights. It was interesting whether it was fatal or not that she married her Duke after his abdication, and this applies to various and sundry Austrian, Russian and Romanian monarchies lost, as well as to sisters-in-law and fergie (no, (no, that Fergie or the other Fergie). Wii Is this an article about the Wii or Nintendo Wii? If it's a Wii, should it only be called Wii or Wii? Or maybe Nintendo's Wii? Does he rhyme with Us or Wee? Should Wee connect to urine? Is Wee slang or a euphemism for urine? Is that a British or international word for urine? Is it even worth mentioning in the article? (not to mention small as synonymous with small or scaled-down) Only some of the hard-hit issues that sparked more than 1,500 changes two weeks apart - long before the console was even released, and not long before a major war broke out over unofficial external connections leading to a huge straw mast to end the issue, and continuing debates over whether they are the console's official or unofficial names (according to official Nintendo policy, the console is called Wii, not Nintendo Wii) and its plugins (for example, Wii Remote aka Wii-mote aka Wiimote) are more commonly used and which should be mentioned in which articles. William of Orange Is that the name of one king of England and also some completely obscure minor characters in the fog of history - or was it actually the name of two important and well-known Protestant heads of state, etc.? It has become the subject of a diversion dispute. This vital question divided a bunch of eminent history readers and led to a renewed war that alternated reorientation almost every hour. Casual viewers held their breath on arrival to check the current position of that weather forecast. As the use of names in English-speaking cultures was considered to be a determining factor, there were attempts to count English speakers almost manually in New Zealand, South Africa, etc. Extensive and detailed arguments on several pages of conversations of nationalist POV, filibustering and using all tricks in the box. This teaches us some things about deployment sites and potential issues surrounding even such tools. The official poll resulted in a 9-5 vote in favor of renaming the divisive site as simply William of Orange, but luckily it is a pigeon, an animal that generally symbolizes peace, so the war of editing and the participants did not harm this unfortunate pigeon (as well as the fact that it is the only non-human named William of Orange). U.S. Post Office, Podunk Branch - unless, of course, it should be the United States are known as the U.S. Which one's better? More accurately? More respect? (Respectfully?) The editing war is so notorious that it is mentioned in the log of Wikipedia's first IRC chat from April 2006. The war of editing is detailed in the chapter of the book. Kiev / Kiev The capital of Ukraine had the (wrong)wealth of its Russian name Kiev which is internationally much better known than its native Ukrainian name Kiev. The Ukrainian government's best efforts to determine by law the name of its own capital in English have led only to the editing and re-prevention of the Wikipedia wars, as some editors have refused to follow the government's decision, insisting that the most famous version be used. Since it was inconceivable that any of the warring camps were wrong in their claims, NPOV policy must have been wrong. In September 2020, everyone noticed that the rest of the world had already been accepted by Kiev, and the article was moved despite much crying and sleaze of teeth. Tsushima Pool Is it important to know that Korea was preparing to officially register the name Ulleung Basin? This has only happened once known time before, so there is clearly no pre-existing consensus. The debate ultimately explores the terms of hurricane season, and even whether the stapler moved from one table to another is considered on another table. It was a truly astonishing debate that lasted seven months, drew comparisons to civil unions and gay marriage, and could be reignite at any moment. The highest value of a currency unit Is Bitcoin a currency? Should the fact that it is worth more than any other currency swing both ways? It continues since 2011, this debate that has led to most of the chat site being filled with ad hominem attacks, dozens of comebacks (on both sides claiming vandalism) and two locks for protection so far. Just be happy that Kuwaiti patriots, upset that Bitcoin is beating their dinar, have not yet found this site. The article is merged into the List of Circulating Currencies, but a short editing war has begun about whether it should be in the destination article. The redirection was eventually deleted on August 7, 2020. List of fictional badgers Which badgers are notable enough to earn inclusion? For more than a year, there were inclusions that were immediately reversed, additions to maintenance templates, and rather fiery discussions about badgerhood (including the phrase character is non-trivial and is deliberately a badger, for badger reasons). Those involved could be considered mad as a badger, or if another digging mammal is allowed, making mountains out of molehills. Categories Category: Recursion Slowly edit warred over several years to include it in yourself despite guidelines that say otherwise. Loop advocates have variously argued that it should be done as a joke, as a (recursively defined?) tradition or as an educational effort. You have one of the longest-running debates on Wikipedia. Looks like he's got everything but a sink in the kitchen. Which of the two should get the prestigious title as the primary topic, thus getting the removal of the entering phrase in the name of the article? Archived discussions are full of endless content and tables regarding search engine results, population statistics, and the number of English speakers in each (enough material to create your own encyclopedia). This is followed by numerous accusations of either US or EUROPEAN-systemic bias, along with accusations that one side is holding the other to ransom. Is the fact that Wikipedia web servers are located in the United States relevant? Does Wikipedia's method of deploying a topic make it less important or meaningful? Well, if the sites are protected for now, which article will be first listed on the Georgia deployment page? And do flag icons make a difference on that pasta page? Does this whole debate make English Wikipedia? Or are we just whipping a dead horse? This discussion lasts so long that there have been occasional requests on Talk:Georgia for brief summaries of previous discussions! Did we mention that Wikipedia's web servers are located in the United States? GNAA Should the Gay Nigger Association of America be at the top of this irrelevant split site, or somewhere in the middle? The ongoing dispute leads to site protection and blocking of a single WP:3RR administrator. After 18 articles for nominations to delete, the association's article was deleted due to a lack of reliable sources (see below), and the dispate mutated about whether the site should include redlink to a deleted article
or not. This critical issue of one protection (three times) and requests for comment on the deployment page. The situation only calmed down when the disassociation page for the 4-letter acronym joined a small number of articles with unspecified full protection (it has since been reduced to semi-protected). Recently, an article about association was recreated as a result of a deletion review. Lolita (disambiguation) A phenomenally lame, multi-stage edit war on the Lolita deployment page for the purpose of the spread pages. Is the Style Manual written in stone, or is it just a recommendation that can be ignored? Vladimir Nabokov's novel is currently in Lolita, making it a de facto primary use: should it be listed at the top of the disassociation page, as the MoS says, or below etymology for the name Lolita that did not have an article? Should the site include a list of Japanese fashion styles that include the word Lolita in the name? Will anyone enroll Lolita in the search for Amy Fisher? The only thing that doesn't occur to anyone is that they have better things to do. The debate gets so heated that one user moves the page on Lolita (non-disassociation) to free it from the tyrannical limitations of the MoS, believing that WP:3RR does not refer to the new creation and continues to return. The following is a disorderly fusion of incision and paste, ensuring that no one is satisfied with the state of the article. Eventually an indifferent administrator fixes the mess and protects the site for a week, with at least one user taking a long wikibreak over the ordeal. Conflict still arises from time to time, especially after the creation of steps for lolita's name and the debate over whether Naboko's novel really should be the primary target. Palin Is the political candidate better known than the Monty Python member? If the monty python member? If the monty python member? If the monty python member is less well known than the political candidate, will he be less well known in the future? On August 29, 2008, Sarah Palin's announcement as the presumptive Republican nominee for U.S. vice president sparked a firestorm on (among other things) the disassociation site Palin (which had previously been edited three times since it was created nearly a year before). Should Palin refocus on Sarah Palin? Is Sarah Palin better known than Monty Python member Michael Palin? If it's better known now, will it still be better known in the future? Should Sarah and/or Michael Palin be listed in their own section at the top of the last of other Palins, or should the sorting be purely alphabetical? After a handful of polls and vexed accusations of bias, consensus seems close, but who knows what the future will bring? Chat pages Main page: Wikipedia:Lamest edit wars/Talk page This is not about discussions on conversation pages, but about real editing wars (as toctified by return) that happen on conversation pages. Talk:Homosexuality Singapore Probably the first instance of the engagement on the page of the article, where one editor accused the other of using talkpage as an alternative soap box for the POV agenda. The accused editor first tried to insert a list of unpredictable predictions, and then when in fact it didn't happen. That part has been going back and forth countless times, since no statute seems to govern talc behavior. Conversation:Lolicon Edits the war over whether the template is at the top, announcing that the article was quickly retained after discussing articles for deletion lasting less than an hour, should include the word ZOOOOOM to make an example of the speed of the process. It was kept until it was finally replaced by a note in the archive box template. Talk: Hurricane Ike/Importance Should Hurricane Ike Relevance Within WikiProject Tropical Cyclones Be High, or Top? Is it because I'm a tarantula Asian black? Arachnophobia Since Wikipedia is not censored, is it appropriate to include a huge picture of a tarantula for illustrative purposes on a page that discusses the fear of spiders? While this issue can be addressed back in June 2005, this is a question of complete authority over the interview page and accounted for almost all amendments to the article between November 2006 and October 2007. The image was later changed to a cartoon of little Miss Muffet (removed and then returned) and eventually the cute little spider crept into the template at the very bottom of the article. Banhammer Edit war in June 2007 for including a screenshot from Another Life in which the character in the picture holds a hammer. This led to the site being protected and a straw poll [95] on whether the picture should be included or not, along with accusations of sockpuppetry, one-purpose bills and a meat cap and eventual banhammers. In the end, the article was deleted anyway, making the whole argument moot. Bathrobe Is the robe better illustrated by a photo of a guy smiling at the camera and making a thumbs-up gesture, Fonzie-style, or a photo of another guy in another robe strikes a dramatic pose in his bathroom? Should the selected photo include a model at all and is the child less suitable than an adult? These key questions led to dozens of edits in 2008, changing between at least seven images with frequently altered subtitles vying for the prestigious position of an illustration of a Wikipedia robe and inspiring the formation of a famous and venerable Cabal of Wikipedia robes. Consensus ended up favouring a pink fluffy robe on a hanger. And then the dramatic picture of the poses came back. And then the robe on the gallows turned purple, and then... Cue more editing wars! British Rail Class 153 when replacing one image of the train with another led to a two-day editing war [96] over whether it was more important to show that he said the train was one carriage long or how the internal and external personnel would match. On a page with three edits in the previous month. This was resolved when it was possible to do both, but similar discussions then began (for vaguely different reasons) on British Rail Class 142 and, most spectacularly, British Rail Class 313 - where the chat site increased from 1KB to more than 28KB in just over a week [97]. Summaries for editing patterns include It's a Dark Photo, Not a Dark Photo, Restored editing. Autism is not a factor. Pressing problems: Should one memorable photo be included? Is the cat depicted really smiling? Both users were blocked for thirty seconds - a suitably lame block for an incredibly miserable editing war - after page protection stopped the reverts. One user continued after the protection was lifted the following day, leading to a further twelve returns via the same photo. Another page protection stopped the lameness. As it turned out, the photo was deleted because it didn't have any copyright status. And of course, don't forget those proud, brave souls who tried to settle the matter by promoting the use of Happy Cat. Another user suggested that the essay was only tangentially linked to civility and removed it. Amid a sea of blue ties to wise essays on the value of civility, a war of editing broke out over the inclusion of a new relationship. Multiple parties joined the fray, 12 comebacks in two days for including essays. The editors then took to the chat site and began throwing profanity at each other as they debated whether the essay contained valuable tips on civility. After two complete protections for the template and multiple blocks, the matter appears to have been resolved. Template: Luxembourg political parties An EU flag is added to the template header. Who cares what your color is? yes, that's easy for you to say, you're a Mayfair, you've got a cool sound name. All right, look, if it's no big deal to be purple, do you want to trade? Is the colour group containing Pall Mall, Whitehall and Northumberland Avenue purple, or is it pink? Like a similar argument in Reservoir Dogs, participants forced their way into a Mexican showdown and no one can pass Go, let alone raise £200. See WP:PALLMALLISPINK. List of television stations in North America by media market Nielsen claimed copyright over the concept of DMA (or TV market), and the entire section of the United States of America this article demanded complete overhaul. This has led to a war of editing about whether a 40-year-old, incomplete list of public good is better than something made by some Wikipedian, or whether we should assume that the copyright claim, which no one has ever seen, does not exist and bring back the DMA FCC. Is connecting with the FCC officially extensive because of copyright, or is the government organization under public domain? Either way, the only solution doesn't seem to have a list for the U.S. at all. Lucky Charms The long-running, slow-motion editing war between anonymous users seeks to solve a big problem: Are they or are they not sold in Ireland? See also: Irish breakfast. Or maybe not. Revellers were once a daily occurrence and the discussion page was rife with discussion offering ittle more than personal reflections, but the sub-sided site helped clean things up and provided riff-raff with a place to chat. The subpage is now filled with passionate arguments, which of course would not be complete without editors calling themselves peasants and yankees. Mayonnaise It is a dangerous thing, not only for the waistline, but also for common sense, at least on Wikipedia. Does traditional mayonnaise contain lemon juice or not? If so, is it really necessary to make it? These thoughtful questions led to a great war that stretched throughout September 2007 [140] [141] [142] So when you enjoy fries with mayonnaise, take a second to remember those heroes who fought for (against) lemon juice that might be found in it. Memphis Did David Saks write the official Memphis song, or did he write Memphis song of the year? Mickey Mouse Club Was Zachary Jaydon a cast member during the MMC incarnation of this Disney series? Some say yes, some do not, because his name is added and removed from the list of actors with depressing frequency. A standard reference book on Disney television doesn't list it, but some online sources cite it. Are those references added by Jaydon himself? Who knows? Fans of the 1950s version of the show can only shake their heads in laughter, grateful that no one edits the warring around Moochie's appearances. Miss Kitty Fantastico Edit war over whether it is appropriate for the text to be associated with the article Evil Reptilian Kitten from another planet, which has since been merged and redirected to the Ontario general election, in 2003. After a month of full protection, straw poll, requests for comment and appearances in the New York Times on June 17, 2006 for its protection, straw poll, requests for comment and appearances in the New York Times on June 17, 2006 for its protection, straw poll, requests for comment and appearances in the New York Times on June 17, 2006 for its protection (and almost certainly this lame dispute), the article was unprotected, not because anything was actually resolved but because the article had been protected for so long. And guess what? More edit / restore the warment and follows, to the point where the original table is added to the article again and one frustrated editor opposes Boston being mentioned as a business and cultural hub for New England. The editor endlessly returns the article to remove all mention of Boston from the article, believing it to be a plot by Boston propagandists to covertly recapture Connecticut via Wikipedia. Compromise is attempted to acknowledge in the subsection that... The New York City Metropolitan Area [is] an important economic impact on Fairfield County ... but the editor is still not satisfied. New England editors are offering to cede Fairfield County to NYC to resolve the conflict. The edition receives a mention in the Nashua Telegraph article on Wikipedia. A REALbasic Anonymous user with a bone to pick spends more than half a year on a crusade to discredit the topic and promote a boycott. The site has been made to bring Wikipedia before the attorney general for consumer fraud, blocking the entire ISP. Edit the war stops as abruptly as it began, with the anonymous editor's final summary editing stating that he personally by the company because they released Macintosh customers supporting Windows, or something like that. Riot Shield The Lonely Editor is waging a brief editing war in an attempt to point out to the world what should be obvious, which is illegal to throw stones at the police. Fortunately, he eventually backed down, though not before opening a settlement of disputes and requests for comment. Ronald Ryan The last man to be hanged in Australia died decades ago, but the debate over his possible innocence continues to rage (like all the best controversies) in wiki form. Accusations and counterclamations are scattered like confetti, editors are accused of promoting various (possibly fictional) books, and all CAPS editing summaries abound. The only thing all the editors can agree on is that the truth is out there. Sarah Edmonds High intensity editing war lasting about forty minutes. Editor A makes a correction, giving her her middle name and month of birth. This is lost through the editing conflict, and Editor B adds content worthy of the passage. Reverts; B reverts; B reverts. Et cetera. The only grudge they had with the innings of the other was that they got theirs back. War can be seen here: [146] Stanley Kubrick's article have an infobox? no! The infobox pollutes the article and no infobox will encourage readers to know more about the person and makes the article look more professional. The debate has been going on since August 2015, and countless infoboxes have been added and deleted over the years, showing no signs of ending. See Talk:Stanley\_Kubrick/Archive\_7, Talk:Stanley\_Kubrick/Archive\_8 etc ad nauseam. Stegosaurus in popular culture Two administrators disagree on the inclusion of a paragraph mentioning several characters from steg-like cartoons. The dispute eventually disintegrated into a slow warp of the wheels over several days, with careful attention to the magic number, leaving other users scratching their heads as they try to figure out what makes that particular passage such an obvious target for dispute. Stingray mentions Steve Irwin's death with a stingray warrant? Immediately after news of his death broke, a miserable war of editing ensued. Sweden between 5 October 2007 and 31 did Sweden have two prime ministers during this period? Tales of the Symphony: Dawn of a New World Is it a spin-off, sequel or spin-off sequel? The land that makes up the Tsushima sub-prefecture Is it an island or a group of islands? Does it matter if there are surrounding what people call an island? Can we still think of it as an island if the Navy blows up the shipping channel in the middle of it? Maybe the Japanese name should be used to decide. Or perhaps the English term used to refer to it by the Japanese government. Or is it just a case of one side thinking about land in the sea (e.g. the British Isles) while the other side is thinking of the island as a political entity (e.g. U2 (again) Is it relevant for Bono to play the harmonica? Should this be mentioned in the main paragraph along with the vocals and guitar? Does this mean that in the same sentence we should also find that The Edge also plays piano, organ and bass in addition to background vocals, guitar and keyboards? As it is an anonymous IP user to constantly add a harmonica as one of bono instruments, other editors have constantly removed it. The debate on the talks page was held and closed, with consensus that the harmonica would not be included. Of course, the addition of the harmonica lip continued. The second discussion arose after the first, and the anonymous editor events notable enough for individual articles or fail criteria? It's a discussion that continued on MMA talk sites, resulting in the creation of omnibus articles. UMBC Long editing the war back in 2005 about whether the school is located in Arbutus, Baltimore, or Catonsville. Compromise was attempted when the site was changed to Baltimore County, but that was seen by some as too general but unnecessary by one Baltimore who argued that Baltimore included the entire Baltimore County anyway. And since one lame editing war clearly wasn't enough, another raged about whether the school's full name was the University of Maryland, Baltimore County or the University of Maryland Baltimore County. Take a closer look. Yes, the only difference is a comma, a comma that sparked a heated debate on the chat page about whether the school wanted to identify with the punctuation mark. One vandal even nodded to the comma-editing war by changing a bold title to the University of, of, Maryland, Baltimore, County. [147] A user: Santa Claus on a Santa sleigh (perhaps an experienced editor's sock) was blocked on Christmas Day for trying to spread mood and goodwill to other users. WKBS-TV (Philadelphia) Edit war for including these nine words: the first Kickoff Classic, played at Giants Stadium. Things get so heating up that one of the editors starts making personal attacks and gets blocked. Compromise remains, where a link to the site on said the game was piped link in a transcript of the general manager's closing speech. Year 2038 problem After 2038, it turns out that some computers will also run in date issues in the year 292,277,026,596, well after the predicted end of the universe. Which means we still have some time to debate whether the article should include a sentence that says this is not considered a pressing issue. [148] [149] [151] Obviously saying that it doesn't matter in itself, because the phrase was deleted when no one was looking, and no one even noticed. And then the reference to the problem was deleted, so if you're reading this after finding a copy of Wikipedia in the midst of the aftermath of the war caused by the problem of year 292,277,026,596, the Wikimedia Foundation expresses its condolences. Nazism Should Adolf Hitler's quotes be obtained using primary sources or are scientific sources needed? Does it really matter since they're just quotes? Was Psychosurgeons an editing war or not? Five editors arguing over whether the dispute over commas is a war of editing or whether the same editor changes his own edit back and forth - 97 times! It was eventually resolved when the original article was deleted. Reach for the sky The editing war springs over the addition of a single line of white space between the external connections section and the navbox in Reach for the Sky. The results are two ani themes, a contentious entry into WP:3O and various charges of vandalism and sockpuppetry. The true source of lameness here? Two new lines in the source were removed at some point without any participants noticing, which is the appearance of the two versions, which were returned back and forth seven times, exactly identical. Talk: Tyrannosaurus Perhaps one of the most truly bizarre editing wars ever, this was a brief but tense edit war in which an anonymous user apparently argued with himself over whether Tyrannosaurus rex is a predator or a vulture (ridiculous arguments abound including comparing Troodon to and a lot of Jack Horner-bashing). It later turned out to be two anonymous users who shared the same IP address. Concerns about the WP:3RR breach surfaced, but it was brought down because the IP was technically returning its own modifications. Shiba Inu Editing Rat between editors and the Internet has resulted in several page protections and internal text warning users not to add Doge (memes). The debate rages over whether the link in Vidi is also sufficient or if the mention in the article is notable. This protected page, which can only be edited by administrators, usually goes off for days off – all content is included from templates, so there is no need to edit Master Page directly. On April 1, 2005, it racked up more than 60 revisions of varying severity before finally returning to the day's old version. This doesn't even include all the template revisions that the master page includes. (edit history) Time in London has been chosen. And then, over a long period of time, people were creating and administrators erasing different entries for time in London (normally, or redirecting to London #Klima or some variation, but this has since been replaced by a hard connection to London#Climate. What made this so pathetic? Well, the above arguments led to one of the longest page deletion records for any page on this page. Wikipedia:Articles to delete There was a flurry of activity in late 2011 when an enthusiastic user noted that the often abbreviated form of Wikipedia:Articles to delete should be WP:AfD as was previously the case. The bold manoeuvre quickly descended into arguments on both sides, culminating in quite a torment with a God-for-God advice, leave him alone and a suggestion to forbid anyone else from having the courage to continue the discussion. The final administrator may have summed up popular opinion by stating: I deliberately analyzed every word of reckless arguments put forward in this section, both for and against, and found that this discussion was preposterous, and furthermore, that we all had better things to do than try to change a long-standing abbreviation that never presented absolutely any problems to anyone. Wikipedia: Footnotes A regular dispute prompts a wording that has to do with setting footnotes: after or before punctuation? Do we recommend it or not? Should we be consistent between articles? At one point it spread to several politics and style pages. Style. All rules Should the rule be ignored? Many editors, including several administrators, have spent more than a month trying to decide on these critical responses. And then, a few months later, he spent more than a month doing it again. See the protection log and the story of the change of IAR. Wikipedia: Please be a giant dick, so we can ban you from an edit war that focuses on which image to use to describe the cock. The thing at hand includes WP:BLP, WP:censor along with the US president, US vice president and 1960 politics. But that wasn't enough. No, a further war of editing, however miserable, he continued, with each side fiercely choosing a new image for the site and defending it to the death! Thrust! Parry! Riposte quinte! Remise! Counterattack! Finally, the question became so serious, so incredibly important, that the only resort was a request for comment. Usually this would be considered excessive killing for a site of humor, but only fools and knaves, blind to how important this site really is. And with that request for comment came ... A DEATH BLOW! What will the future bring, for a vital question like this, a choice that is the most funny/least funny/least funny/least educational/best pun/worst pun on the humor page? One might think that only arbitration can decide, but fortunately this seems to have been avoided, and the latest change remains without any arguments. Wikipedia:Requests to de-administer Wik's nomination of nine Wikipedia:Wikicops have been moved; u u u The site itself won the on-the-go war about a week later and ended up back on Wikipedia:Administrators. A triple reverse war that has been deleted and recreated countless times. Wikipedia: Spoiler The meta-irony of the editing war due to the presence of {{disputedtag}} on the page, which effectively boils down to a dispute over whether a dispute has occurred, can be at the top of only the version without the label being protected by administrator protection and then adding {{p-spor}}. More recently, there has been a dispute over whether spoilers are needed at all, which is mostly solved, but still sings today. Deletion wars The Gay Nigger Association of America has struggled the most over the article for whether to nuk it. The GNAA article first originated sometime in 2004 and was finally deleted in November 2006. September 2010 saw what was expected to be final incentives to renew the article. Redirecting to Goatse Security later took the place of the absentee article, and the RfD confirmed this redirection as a new status quo. The strangest fact of all about this incident is that repeated reversions were done by the user who originally introduced the three-reverte rule on Wikipedia. [159] Wikipedia colleagues have above-average intelligence? It resulted in full protection by two administrators, [the quote required] wasting the chat and demotion page from official policy to mere guidance. And it still is. Wikipedia talk: Attack pages of attacks against Wikipedians, some editors implemented the proposed policy against other editors who, for the purposes of the discussion, were trying to provide (in their opinion) legitimate examples of the location of the attack. A lot of warring edits followed, with accusations from both sides of bad faith, WP:POINT-making, and ulterior motives. The conflict later re-emerged when similar language was added to the policy without personal attacks and resulted in two (to date) arbitration cases. Meta-lame Have you learned anything from this entire site?!? Of course there were lame edit wars about lame editing wars! Edit the wars over which wars are allowed to be edited on this site or as certain entries on this page should be worded (oh, irony\*). See recursion; see and Tail. Examples included Cat (under Wording), William of Orange, Her Late Majesty, Vic Vic List of virgins, e (mathematical constant), Template: Administrators of users who ignore politics, the Democratic Party (United States) and, yes, even this entry[quote required]. The site as a whole also survived at least six attempts to delete, plus another attempt that was ultimately closed at the request of the nominator. \* Came back because it's not a true example of irony. Even this revert itself is not an example of irony, even in the context of this site. Look for him if you don't believe it. This includes you, Alanis Morrisette.
