My Air Pro Power Light keeps flashing red when you try power on and it won't read my memory card.· For the camera to work, you must have a memory card listed in the MicroSD port on the side of the device.· A flashing red light indicates that the memory card you use is full, so you'll need to either scan the memory or use another memory card.· The red/green flash light indicates that the memory card you use is not compatible with the device.· Please make sure you are using a class 6 memory card or higher with maximum 32GB storage. It is recommended that you configure the memory card before use. How do I get the Air Pro app for my mobile device?· The iON Camera app is only available from the iOS and Android store.· For iOS users, go to AppStore and look for an iON camera.· Android users, go to Google PlayStore and search iON camera.· Simply install the ready-to-use app with your Air Pro Camera.My fuzzy photo Wi-Fi?· When connecting to the iON camera app, please ensure that there is no more than 10 metres between Air Pro and the mobile device.· You may need to upgrade the firmware if the problem persists.· We're always working on improving Camera capabilities with regular firmware updates.· See our firmware updates section for the latest firmware for your camera are the depths that my underwater air pro can go? Depending on your model of Air Pro, our cameras are permanent underwater for recording and photos.· The iON Air Pro/Air Pro 2 is waterproof up to 30 feet /10 meters with no need for an additional external casing.· The 3 air pro waterproof up to 49ft/15 m. The rubber seal on the PODZ forms a waterproof barrier to protect the camera when adjusting the PODZ lock. This seal should be kept clean as one strand of hair or a grain of sand can cause leakage in the camera. The camera is intended for fresh or saltwater but, after using it in saltwater, the camera should be rinsed and sealed carefully cleared with clean and then dried fresh water. Failure to do so can cause corrosion or seal failure. Why don't my Air Pro create two separate files when recording?· One of the camera features that lets you easily download on social media. The camera creates two profiles by design. The first is a full-size HD video file. The second is a duplicate in less accurate downloadable on social media sites. The files will have the same name but the smallest one _thm add. For example, IONX0001.MP4 and IONX0001_thm.MP4.· The Air Pro production line is designed to record both the full size and the mini-version of each video. There's no way to disable it. How long does it take to charge the entire battery?· The fastest charging is through the AC adapter - about 80% capacity after 1 hour and full after about 1.5 hours. The battery will reach about 80% after about two hours on your computer's USB port and about 3 hours for full power. The charge of the battery booster will take about 1.5 hours. How long can I register on a single charge?· You can use the camera for 2.5 hours on a single charge. The use of Wi-Fi will go down this time considerably. Turn off Wi-Fi when it's not in direct use. The battery may run out a little more quickly in a cool environment. How much can I capture a video on a single memory card?· 1080p/30fps video and 720p/60fps use about 1 GB of space in 8 minutes. 720p/30fps uses about 1GB of space in 15 minutes 960p/30fps uses about 1GB in 13 minutes. The 16GB card will hold about 2-2.5 hours. Hour of 1080p/30fps video. What does the HDMI port do on the camera?· The HDMI port allows the user to connect the camera to the HD screen.· When connected to a high-resolution screen you can use the viewfinder and camera function. What is the minimum/maximum operating temperature tolerance?· The ON Air Pro is a sports camera action designed for use in some extreme environments. we don't have an official bearing but expect that Under most circumstances. The battery may run out more quickly in subfreezing temperatures but has been tested for recording for two hours at about 0 degrees Fahrenheit. Always allow the frozen camera to warm up before removing podz so any condensation create the camera as the camera warms does not enter the camera. We do not recommend using the product in environments over 130 degrees Fahrenheit.What does the AV/MIC port do on camera?· Depending on your model of Air Pro, you will have either AV (audio/visual) inputs or mic (microphone input) on the back of the camera.· AV input can produce audio and visual output to a device of your choice using Scart/AUX output.· MIC input allows you to use an external microphone for use when shooting videos to improve sound quality. How do I reset my Air Pro device?· If you need to reset the camera, you can do by sticking the pin in the insert on the back of the camera with reset written above it. After you're done, the camera should work as expected. If you are a computer user and are still experiencing problems, you can also try a fixed reset.o Connect the camera to PC.o back up any photos/video that you want to keep.o delete all of the camera (including software and configuration files)o unplug the camerao turn on the camera and take a few photoso connect to the computer. You must now have a new version of the built-in application try and download firmware as previously tried. If you are a MAC user and are still experiencing problems, you can also try to reset hard.o Connect the camera to PC.o back up any photos/video that you want to keep.o delete all of the camera (including software and configuration files)o cut the camera turn on the camera and take a few photoso connect to pco drag and drop mac software on camera. Q You should open the program now as desired. Required.
