Jasmeet Sahni Nintendo President and CEO Satoru Iwata died at the young age of 55 after battling cancer for over a year. He was a Japanese-born programmer and businessman. Even at a young age, he was always interested in computers and leadership. In middle school, he worked with a computer simply using phone lines. In high school, he showed leadership skills, serving as class and student councils and club presidents. After entering high school, he would save money by washing up to buy his first programmable calculator. Not long after, he continued to develop his own game in his junior year to make simple number games. He is known for his unconventional ideas and changing medium. Unfortunately, in June 2014 a tumor was discovered during a routine physical, the tumor was removed yet reappeared a year later. Unfortunately, Mr. Iwata died of complications with a bile duct tumor on July 11, 2015 in Kyoto prefecture, Japan. Throughout his career, Iwata built a strong relationship with Nintendo fans through social media and regular appearances at game events. He became the face of Nintendo, respectively. Mr. Iwata's death was a big shock to all video game entrepreneurs and users. Iwata brought a new feel to the Nintendo world, unlike its predecessor, Hiroshi Yamauchi, who was notorious for being very tough with his rhetoric when saying people who play RPG's (role-playing game) were depressed people who like to sit together in their dark rooms. Instead Iwata's hands-on approach to business earned him admiration and respect from both developers and gamers.

Satoru Iwata was named one of the world's best CEO by Barron's Magazine, he was the first Nintendo president not related to the Yamauchi family through either consanguinity or affinity. In 2003, thanks to Yamauchi, Iwata pushed for the development of a revolutionary product that would later become known as the Wii. According to Iwata, the premise of the console was that a mother should like it. He is especially known for helping to create big games like Kirby's Adventure, Super Mario Bros., Super Smash Bros., Donkey Kong Pokémon Gold & Silver, Legends of Zelda, to name but a few. Iwata thought above all, video games are meant to be just one thing; Fun. Fun for everyone. Even after he joined Nintendo as head of its corporate planning division in 2002, he saw Nintendo's net sales fall by two-thirds; it was the first time in thirty years that the company experienced its first operating loss. Iwate voluntarily halved his salary as an apology in both 2011 and 2014. As of April 2013, Forbes estimated Yamauchi's net worth at \$2.1 billion, the 13th of his year. Nintendo, alternatively, is worth \$18.1 billion thanks to their timeless games and uniquely designed hardware. Satoru Iwata's death was a shock to the whole world. Due to his unconventional gaming ideas and strong relationship with Nintendo fans, he will forever be known as an iconic and deeply admired person. Fortunately, through his game fans of his work like myself are able to keep his memory alive. He has survived by spouse, Kayoko Iwata.
