SKATEPAIGE.COM - KNOW your blanks! We started decks in the old school days of 1984, for companies like JFA, Zorlac, Concrete Jungle, Transit, and more. A million decks later, we still produce pro-quality skateboards for businesses and individuals who remain loyal to American skateboarders. We sell everything from uncut blanks to custom graphics blankets. Buy one ready deck from \$19.95, or start your skateboard business with bulk discounts and custom skateboard deck printing. With our uncut and some tools, you can even make your own skateboard deck. We also sell our favorite basics, such as Jessup griptape, Independent trucks, hardware and shock riser pads, Powell Mini-Logo bearings and pro-quality empty white wheels. Graduates are assembled with them, or we can help you design a custom skateboard. All empty blankets are 100% North American hard maple, hand-crafted by skilled American workers. Ours are not the cheapest because the highest quality materials, manufacturing and labor cost a little more. Skateboarding, our philosophy is simple is good. We focus on high quality products at reasonable prices. We don't sell factory seconds here, and all decks are backed against defects. If you need more, browse the information box, call us or send us an email. Our Blank Skateboard Decks are the perfect choice to create your own skateboard art. These high-quality empty skateboards come in a variety of finishes, including natural wood, they are also available in wide width from 7.75 , 8.0, 8.125 , 8.25 and 8.5. Looking in bulk to buy empty skateboard blankets? We have multi-buy options available, have a look at the products below or give us At the skating shop. 5 Point (s) See If: Grid List Sort Position Name Price Brand Deck Width Helmet Size Select Pad Size Wheel Hardness (Durometer) Footprint Type Deck Concave £27.95 £34.95 category Workshop Alien was founded in 1990 by Chris Carter, Mike Hill and Neil Blender. The Ohio-based company has been an innovative force behind the skateboard movement since its launch. When it comes to skateboarding, Alien Workshop is about the thrill you get when you're ready to ride. That's why they specialize only in pre-assembled skateboards and longboards. Alien Workshop full skateboards are available in two models: Vertiply and Pong Pusher Cruisers. Their Vertiply Cruiser boards have vertically laminated tops and bottoms, burnt graphics straight from the wood. Alien Workshop Pong Pusher Cruisers are flexible skateboard trucks that ensure stability and control. The speed of these bearings is ABEC 3. With custom dyed graphics and ping pong paddle textured grip tape, this board really does represent the look and feel of the ping pong paddle. Alien Workshop longboards are just as just as the Pong Pusher Cruiser on board, but for a long time. Alien Workshop has also expanded its product line to include clothing. You need a pair of shorts for summer skateboard sessions to keep you feeling cool all day long. Made from cargo, Alien Workshop skateboard pants give you the flexibility of movement you need to board freely. If you are a dedicated skateboarder who drives constantly, you will not be disappointed by the durability of these pants! All Alien Workshop products are built to look polished, perform large, and enhance your confidence. If you love everything about skateboard gear and apparel, then Alien Workshop is all you need! No need to worry. Avoid uneven lines and unwanted air bubbles by letting our professionals grip your new deck for you. Let's build your own skateboard Do you want warehouse skateboards to collect your full skateboard? This service includes: Professionally gripping skateboard deck. Making sure there are no bubbles and a nice clean cut around the edge. Pressing 8 skateboard bearings into 4 wheels. Each camp sits in a professional camp press and includes bearing partitions if necessary. Assembly of skateboard lifts and wheels. Both sets of trucks have wheels mounted on the right speed and torque to the corresponding tolerance. Installing both sets of trucks on the covered deck and ensuring the correct torque tolerance for all hardware. Autographed Warehouse Skateboards hang the tag of your builder. Skateboard Hardware Sets skateboard hardware is used to connect skateboard trucks to skateboard deck. Skateboard hardware refers to bolts and locknuts used to build a plate. Bolts could be Allen's head or Phillips' head. Skateboard hardware is available in many different lengths, and often includes one different colored bolt, so that the rider can mark the nose of his board. Each skateboard hardware kit includes 8 bolts and 8 locknuts needed to collect one skateboard. What size hardware do I have to put together on my skateboard? 7/8-1 hardware - no riser 1 to 1 1/8 hardware - 1/8 riser 1 1/4 hardware - 1/4 riser 1 1/2 hardware - 1/2 riser width of your truck axle should closely match the width of your skateboard deck, usually within 1/4. For more information, visit our Skateboard Trucks Buying Guide Truck height measured from the bottom of the truck baseplate in the middle of the axle. In general, a medium-sized truck works well on most skateboards, but high or low trucks may prefer different styles of skaters. LO - Provides extra stability for flip tricks designed for small wheels (50-53mm wheel size recommended). MID - Good all-around profile street or park (53-56mm wheel size recommended). HIGH - Great for cruising and carving, designed for large wheels (56mm + wheel size recommended). For more information visit our Skateboard Trucks Purchasing Guide Hanger is a truck T-shaped aluminum alloy grind area. This makes direct contact with the rails and curbs. The hanger holds the axle on which the wheels are mounted. Hangers weigh about 10-13 oz, lighter available. The width of your truck's axle should exactly match the width of the skateboard deck, usually 1/4. For more information, visit our Skateboard Trucks Buying Guide Construction to refer to the material(s) used in the manufacture or specific brand technology. For more information, visit our Skateboard Purchase Guide Skateboard Deck with an average width of 7.5- 8.25. Width is affected by type of driver and driving. Larger riders and these skating skating paths usually prefer a wider deck. Street skaters usually choose a smaller blanket. Choose your skateboard deck according to width, not length. Here are some general instructions: MICRO - Deck width: 6.75 or less - 5 years old or younger, less than 3'4 long. Size 3 shoes or smaller. MINI - Deck width: 7.0 - 6-8 years old between 3'5 & 4' long. Size 4-6 shoes. MID - Deck width: 7.3 - 9-12 years old between 4'5 & 5'2 long. Size 7-8 shoes. FULL - Deck width: 7.5 or greater - all skaters over 13, longer than 5'3 with a shoe size of 9 or more. 7.5 8 Standard board adult riders skating in the streets or doing more technical tricks 8.0 to 8.25 Skating pools, ramps and parks 8.25 and largerVert, pools, cruising and just going to old school Still having a hard time size, try our Skateboard Sizer For more info visit our Skateboard Decks Buying Guide Deck type refers to the size or style (shape) of the skateboard deck. If you are a beginner, choose your deck according to width, not length. The width you need depends on your size, skating style and personal preferences. Here are some general instructions: MICRO - Deck width: 6.75 or less - 5 years old or younger, less than 3'4 long. Size 3 shoes or smaller. MINI - Deck width: 7.0 - 6-8 years old between 3'5 & 4' long. Size 4-6 shoes. MID - Deck width: 7.3 - 9-12 years old between 4'5 & 5'2 long. Size 7-8 shoes. FULL - Deck width: 7.5 or greater - all skaters over 13, longer than 5'3 with a shoe size of 9 or more. Cruisers, Old School, Freestyle, Longboard and Downhill all refer to skateboard style and corresponding shape. For more information visit ourSkateboard Decks Purchasing Guide Length measured at the tip of the nose tip of the tail. The average table length is 28-32 and the devoursers can reach 32and larger, but the length is referred only to advanced skaters. For more information visit our Ramp Decks Purchase Guide Wheel Size or Diameter – All skateboard wheels are measured in millimetres (mm). The smaller the number, the smaller the wheel. Smaller wheels are slower; the larger wheels are faster. 50-53mm - Small slower wheels, stable trick riding and smaller riders skating in the street, skating in parks and bowls. 54-59mm - Average wheel size for beginners and larger riders skating on the street, skateboard parks, bowls and vert ramps. 60mm + - Specialty riders skating longboards, old school tables, downhill and dirt boards; for speed and rougher surfaces. For more information, visit our Wheel Wheel Purchasing Managers' Meter to measure wheel hardness. The wheels are faster, softer wheels are slower, but have better grip. 78a-87a - Soft wheel with good rough surfaces, longboards or street boards that require a lot of grip and easier to roll over cracks and pebbles. Created Fly cruising, longboards, mountains and rough surfaces. 88a-95a - A little heavier and faster with a slightly less grip, but the grip is still good. The street; rough surfaces. 96a-99a - Good speed and grip - all around the wheel. Excellent for beginners skating on the street, skateboard parks, ramps and pools. Smooth surfaces. 101a + - The heaviest and fastest wheel with the least grip. Ineffective on slippery and rough surfaces. These are pro wheels. 83b-84b - Wheels on the B scale are extremely hard, measuring 20 points lower than scale A so that the scale can extend another 20 points to heavier wheels. For more information, visit our Ramp Wheel Purchase Guide Skateboard Laws vary from country to country. Many states require that skaters wear helmets at a certain age, and some states like California make all skaters under the age of 18 wear a CPSC Certified helmet all the time. CPSC skateboard helmets are usually eps protective liner that meets safety standards for skateboarding. Be sure to check your country's policies before ordering. CPSC Certified Helmets: California requires that all skateboard helmets must comply with the requirements of the United States Consumer Product Safety Commission (CPSC). Section 890.4 Of the Streets and Highways Code enforces these standards in California and does not allow Warehouse skateboards to ship non-CPSC Certified Helmets in California. For more information visit ourRula Helmets Guide Uncertain size, what do you need? Visit our Clothing Size Maps Most camps are measured by ABEC rating. The higher the ABEC rating, the more accurate and accurate the camp is. This rating system covers grades 1,3,5,7 and 9. The closer you get to the ABEC 9 rating, the faster and less friction you have than skateboarding. Many companies do not use the ABEC rating scale. They're marking their special technology. For more information, visit ourSkateboard Camps Purchasing Guide Note: Each brand of skateboard helmet size varies; therefore, it is best to measure your head and refer to the size of the chart for a specific brand helmet. To properly measure your head, follow these steps: Wrap a soft ribbon measure around your forehead, just above your eyebrows and ears. Keep the level of measure from the back of the head to the back of the head. Your skateboard helmet should sit low on your forehead. If you don't have a flexible tape, try marking the string and measuring it against the ruler. If the helmet is a gift or you can't measure the skater's head, measure the inside of the current helmet or hat they wear. Each skateboard helmet product page has specific measurements for each skateboard brand. Use this information with your head size to determine your correct helmet size before placing your order. This ensures that you get the most suitable. For more information, please visit our Helmets Helmets
