Update protocol 1. Upgrade thesaware sync function, achieve thesas sync with mobile phone side, input habits cross-terminal sync, sign in to the same account to sync input habits; 2. Fix some problems with skin installation failure; 3. Optimize usb bubble style pen recording; 4. Optimization of application stability. Many times we have to burn some data to disks to make sure that the data is not lost, so how do we burn the data disks? There are many types of burning software, and then I will teach you how to use Nero StartSmart software. Turn on the Nero StartSmart software and you can choose a DVD or CD when you burn it, both formats depending on what format you are burning the empty disc, and I am using the DVD now. After selecting the dvd production data, go to the next page, continue to select the DVD data click add, select the file to be burned, you can also directly to the file to be burned to the middle area, and then select the next burn pops up a small window, click OK, pop-up to the next page, click the next step to burn finished, burn the finished disc will automatically exit , you can check it back to see if the burned file is complete. Experience is for informational purposes only, and if you need to solve specific problems (especially in legal, medical and other areas), we recommend that you with relevant experts. The author declares: This experience is original in accordance with real experience, without permission, refused to reproduce. Page 2 opens the Nero StartSmart software and can select a DVD or CD when burning, both formats depending on what format the blank disc burned, and I'm using the DVD now. Nero is a cd-rom burning program from Germany 3231333333333333333333333333399b9e7ad9433333363737738 Before Software.com. Software.com. EasyCD Creator also has many users, but many burners provide support only for Nero burners. This is the case with a variety of recorders to light, for example. Now we are talking about the latest version of the use of Nero 6. Point download Nero BURNING ROM v6.6.0.5 Registration code: 1A21-0809-4130-2332-8523-1578 Unlike previous versions, Nero 6 has begun to move towards the entire process of solving video audio from acquisition to editing on burning. Nero 6 integrates powerful audio and video editing and production capabilities. There are quite a few editing modules. As a result, nero 6 changed the state of each module in previous versions. Integrate all Nero 6 modules with one integration tool. It is: Nero StartSmart. This article focuses on Nero StartSmart to show you how to use nero 6's powerful editing and burning feature to run an interface preview and find a Nero StartSmart shortcut in Start-Program-Nero. Start Nero StartSmart. You can see the interface in the picture below. Nero StartSmart is the focal point for all audio, video, backup, and burn tasks. Select tasks from different categories, open The Nero app, and customize some settings. Here's a look at how Nero StartSmart options work. 1. Application Launch Zone This area shows all installed applications in the Nero product line. You can access the app you want to use with a single click. 2, if the task directory area moves the mouse over the icons of each category, you can view the tasks that can be performed in that category. Tasks are displayed according to the selected mode. 3, the task icon area standard mode displays only the most frequently used tasks; If there are more than 8 tasks in the category, you can click the small arrow in the lower-right corner of the screen to see the remaining tasks. 4, Nero StartSmart mode conversion button. Standard and advanced modes for Nero StartSmart conversion. In Advanced mode, the word Advanced Mode appears in the task icon area. All task icons are displayed in advanced mode. 5, quick skin change button for Nero StartSmart interface. Click to change the color of the Nero StartSmart interface. 6, set the Click button to open the configuration window. You can set which program to run the Nero series in each task. 7, button to exit Nero StartSmart. As my friends, who often use the Nero family software in version control, probably know the Nero software is upgraded very often. Each upgrade has a small software improvement, reflecting Ahead's strong development power. This is one of the reasons most friends like to use Nero. To maximize software performance, it's best to use the latest version of Nero 6. Nero StartSmart provides a very convenient online upgrade detection feature. See picture above: First, make sure your computer is connected Internet. Then press the Nero button in the upper-left corner of Nero StartSmart, where the main Nero StartSmart interface appears in the Nero Product Center. Each installed Nero 6 is shown here here 6 The installed version of Ultra Edition is up-to-date. But NeroVision Express 2 software is installed in version 2.0.0.4, the latest available version is 2.0.0.22, and the software that needs to be upgraded will have a green download button behind it. Press this button to convert to the official Nero page to download and upgrade smoothly. You can also set intervals for automatic checking for updates. The default time is to check for updates every 15 days. If you do not update or exit the update, you can exit the software update interface by simply pressing the End button. It is important to understand how to set up the software before using it. Press the Nero StartSmart settings button to enter the settings interface. Language settings options set the interface display language, and in cases where the Nero 6 Chinese language pack is already installed, you can specifically set software modules to run for each feature in tasks and open. Depending on how familiar you are with the software, you can set it up in detail as needed. Typically, the default settings are typically used. Enable all burner mode is important, and if selected, some special CD burning formats appear above the main Nero StartSmart interface. They are HD-Burn, DDCD, DVCD, CD and Nero supports a special format call function so used on. The Change Color button is actually an extension of the interface color change button. Press to change the color of settings interface. Detailed color themes can be set here. It can also be set for frame and background colors. Customize your unique Nero StartSmart interface with your own background! If you find that it doesn't work well after some settings, you need to go back to the original settings. The Reset Default button resets all factory settings. When all the settings are complete, press the End button to return to the initial nero StartSmart interface. Production is now a step in the production of several main drives using Nero StartSmart. There are a number of icons in the Nero StartSmart task catalog that are: favorites, data, audio, photos and videos, copy and backup, and a few other options. When you point to the Favorites icon, you'll see some of the most frequently used feature options. Favorites include common preferred tasks. After you install Nero StartSmart, the Favorites area will contain the most frequently used tasks. To add an item, right-click the task and select Add to Favorites from the shortcut menu. To remove a task from a favorite, right-click the task and select Remove from Favorites. Data disk for data production. This option contains tasks that can be performed on a data disk. Tasks are displayed depending on whether you select standard or extended mode. In mode are options: Create a data disk format/prepare a rewritable disc so that the audio and data discs CD) Make guided disc Make UDF CD Make UDF/ISO disc Make hybrid disc (CD only) Make hybrid mode disc (CD only) - where making a disc that can be made with bootable disk function can start your computer. Replaces the usual boot disk. The UDF Optical Disk File System Standard is a universal optical disk file system standard established in 1996, allowing for any additional data on CD-R/RW drives that provide a feature with random hard drive-like reading and writing properties, standard data burning does not occur because the cache is underinstalled or the data transfer rate is lower than the burning speed to interrupt the burning process, leaving the disk discarded. The standard supports operating systems such as Win 9X/NT and MAC OS, and has become more widely used. The Audio Audio Disc Maker class contains tasks that can be performed on an audio disc. Tasks are displayed according to the selected mode. Options within advanced mode are: Make audio disc (CD only) Make audio and data disc (CD only) Make W3 disc Cut disc track (CD only) Edit audio mixed audio disc (CD only) Encoding audio recording audio Convert tape to disc (CD only) Convert LP to CD (CD only CD) Make mixed mode disc (CD only) Settings also integrate audio editing, recording, conversion and more in advanced mode. Photos and videos Photos and videos include tasks you can do when you edit photos and videos. Tasks are displayed according to the selected mode. In Advanced Mode Options Are Available: Make Video Disc (VCD) (CD Only) Make Super Video Disc Disc (SVCD) Make Video Disc Slide Show (CD Only) Make Super Video Disc Slide Show (CD Only) Capture Video Production or Edit DVD-VR (DVD-VR DVD DVD) You can choose between a Chinese-simplified or traditional display when creating a DVD presentation (DVD only) making a movie making miniDVD (CD only) making DVD video (dvd only) is burned directly to the disc (DVD / R / RW only). Nero 6 shifts the functional focus of the software from traditional audio CD, VCD production to DV-related features such as DVD, video capture, editing, etc. This is evident from the richness of the options of the photo and video category feature. Copying and copying this includes replication and backup-related tasks. The options in advanced mode are: Copying a disk burning image to disk Backup backup backup backup backup backup backup backup hard drive (CD only) Uses the disk as an ideal solution for backup media. Other options include other disk-related tasks. Options available in advanced mode are: Test drive erase disk to make a label or cover show drive speed to get system information optical image link: only) The ideal solution for using the disk as backup media is on this option. Other options include other disk-related tasks. Options available in advanced mode Test drive erase disk to make a label or cover show drive speed to get system information about the system optical image link:
