We cannot tell you the opening and closing times of the pools or when senior aerobics classes are held; we cannot tell you about the availability or cost of swimming lessons; we cannot get you reduced access to swim in any of them; And we can't help you find your kids' lost goggles or swimsuits. We can and will try to provide you with reliable information about swimming pools, their location, admission policies and one visit or occasional swimming prices. If possible, we will include hypertext links to the official websites and Facebook pages of the pools, the email addresses to be clicked, and the links to the clubs and teams' websites that swim there. For more information, see the resources in each list. Site information is continuously reviewed and reviewed whenever the site provider learns of the change, but after more than 20,000 listings, each list completely, the periodic review takes about seven years; in many places prices change four or five times before we have the option to check the official website of the pool again. For this reason, we ask for your help: If any of the information in the listing is incorrect, outdated or could be improved, please let us know. Each line in each list has the Edit button, click the edit button to tell us what needs to be changed. (No, it's not a place where you can ask us questions. What we have in every listing is the latest news we have.) Also consider checking the lists of pools you use regularly at home or while traveling, as your information can be useful for someone else who doesn't know the area and visits for the first time. Just go to the Add Pool section of the site, read the first page and fill out the questionnaire. Updated 14.4.2020. Adult Entrance Fee & Policy Drop-in/Casual \$25.00. [September, 2017] Note: The admission policies and prices set out in the swimmer's lists have been correctly believed since the days set out in the brackets. If you are not correct now, click the Edit button to correct this list and bring the data up to date. This site works best when its users take an active role in data maintenance.
