Amdro fire ant bait

Is it safe for me to use this product with my pet? The active ingredient in amdro fire ant bait is hydrathylon which has very little toxicity for people, animals and birds. We don't expect your pet to have any problems when used according to the label. Is it safe to use around lakes and ponds? This product is toxic to fish, so we recommend using Amdro fire ant bait with caution when applying near ponds or lakes. Will my sprinklers affect the treatment and will the product dissolve from wetting? Amdro fire ant bait corn is made of patience. When it gets wet, the bait gets wet and no longer appeals to fire ants. Now you can keep the area dry, you will have the better chances of the bait being picked up and taken back to the colony. We recommend applying the product if the rain is not expected within 24 hours. Is it safe to use this product near grazing cattle or in areas near pastures? This product should not be used in areas where animals graze or in pastures. Can it be used in the garden or near the well? Amdro fire ant bait granules are decorative and approved for use in flower gardens, but not for vegetable gardens. We recommend using caution when applying to a well as it should not be applied directly to the well. Is it safe for my dogs to be in the yard after applying this product? Amdro fire ant yard treatment the active ingredients in bait granules have very little toxicity for people, animals and birds. Once the dust settles, the pet can re-energate the treated area. What is the best way to apply this product? For best results, apply this product in the morning or late afternoon when ants are most active. Do not apply this product if the ground is wet or rain is expected in 24 hours. How long is it safe for me to go to play out my baby or dog after applying granules to the lawn? Children and pets should stay out of the treated area when applying granules, but once the dust is settled, children and pets can re-enter the area. How many square feet does this product cover? The 2-pound bag covers up to 4,0 square feet, and the 5-pound bag covers up to 10,0 square feet. What do I do when the mound of fire ant pops up even after using this broadcast treatment? We always recommend the treatment of fire ants recommended by the specialist a two-step method. Step 1 amdro fire ant yard treatment as a broadcast treatment for your lawn is to use bait granules, and Step 2 is to treat individual mounds that later pop-up with amdro fire ant bat granules.
