Thank you, we'll take a look at that. 05-27-2019, 01:36 PM #1 Member Log Date: Apr 2019 Posts: 37 Winegard Entertainment Select Hi just purchased by older Damon Escaper. It features a Box of Winegard Entertainment Select Amplified. I think the box is also a model for 2004, as his age looks like, but still in excellent condition. The question is how I connect it with 12V power or it even needs it. It looks like it can be mechanical buttons, so you don't know that I need power to switch cable/OTA/DVR. I would write a picture if I could understand that, but so far no luck. Do I even need a hook to power? Where can I get the power plug because it's a weird 12V hook. Does it still work, minus reinforced, without power? Aid! Dana N Maritza - US Army CW4 (retired) 2004 Damon Escaper Model 4176 ISL 400HP Cummins DamMars Dream Lake Dallas, TX 05-27-2019, 01:45 PM #3 member login date: Apr 2019 Notifications: 37 Yes that helped but the power supply is a problem. I've never seen anything like that type of power plug from 12V. Understand, I have to find a 12V source wiring it, but the plug that goes to the back of the box is a problem. Any idea where to get one? The buttons simply select coax input/outputs to different TVs. 2017 Phaeton 40H XSH Maroon Coral - Power Glide Chassis with IF Formerly '15 Tiffin Allegro RED 38QRA and '06 Itasca Sunrise 35A'16 Jeep JKU Wrangler Sahara or '08 Honda Goldwing 05-27-2019, 05:02 #6 Member Log Date: Apr 2019 Posts: 37 Quote: Originally published in Lt. Dan This is often called a bomb (Box of Many Buttons) and you do not need the power to switch cable, antenna, etc. 12v used only for OTA antenna amplifier. Buttons just select coax input/outputs to another Thanks!!! That's what I was looking for! I thought it would work without an amplifier as it was used before and OTA already has an amplifier. I'll try to hook him up tomorrow! Now I have to do something! Dana N Maritza - US Army CW4 (retired) 2004 Damon Escaper Model 4176 ISL 400HP Cummins DamMars Dream Lake Dallas, TX
