Lanky Kong's artwork in Donkey Kong 64 Lanky Kong is a bizarre orange artwork, Sumatran Orangutan Kong and his partner DK Krew and the Kong family, explaining that the branches twisted on the distant branches of the family tree, and his biologically distant cousins Lanky, Tiny and Chunky Kong, first appeared in Donkey Kong 64. Even he lacks grace and he has a funny face. He has Kong's longest arm in the DK personality series, one of the strangest happy and happy members of the Kong Klan similar to Diddy Kong and Kiddy Kong Lanky has been portrayed as goofy, exuberant, unstable, loud, but has also shown ingenuity and talent. He may be the most laid-back of them, all stumbling with a funny and witty style similar to a real clown or a court jester. He's a little outside, but his exotic way of thinking and those incredible long sleeves help those tense situations, Kongs finds himself in an easy-to-handle place. The debut appearance in Donkey Kong 64 Lanky was one of several Kongs imprisoned by the Kremling Krew at the start of the Lanky game, found in the temple of the Lama in the Angry Aztec area, Donkey Kong and his coconut shooter needed to release Lanky out of his prison by the Kremlings, when Lanky was released, the player becomes able to collect blue bananas, coins and blueprints, Lanky Kong fighting with the boss of Gloomy Galleon, who is Puffoss. In addition to this level Lanky can turn himself into Enguarde in the fungus forest, he must race with the rabbit twice to get the golden banana Lanky Kong is the only character needed to enter with the master of the creepy castle king coding out Lanky Kong is the first to try to defeat this boss. In one of the lanky cut-off scenes, pop up at Hideout Helm and start walking around the wall with two Kremlings along him, eventually the Kremling tries to walk on the wall and fall. In this way, he can use trombone vibrations. Slam and Super Duper Simian Slam, which Hong Kong all uses Lanky Kong as the only character that can be changed in Enguarde, similar to Donkey Kong, changed to Rambi mini-game Kong Lanky briefly appeared in one of funky kong's mini-games in the game Boy Advance remake of Donkey Kong Country 3: The Twin Problems of Dixie Kong!. Here he appears in the water along with other kongs and must be protected from being escorted by a boat with the Kremlings with them, Donkey Kong Barrel bombs Lanky with his improved look of Donkey Kong Barrel bombs. In it, he was very energetic and assigned to Klump as his rival. He has a high speed, a moderate boost and poor agility. As all the playable characters, he has the ability to do what's called Wild Moves in a solo cut-off scene, he can be seen with Donkey, Tiny and Dixie standing in front of their rivals Kass, Kalypto, Klump and Kritter. This is his debut in a spin-off game. This game made his first appearance on the Console Wii Stats: Add: ☆☆ Speed: ☆☆☆☆☆1/2 Agility: ☆ Other Super Smash Bros appearances, although he does not appear in Super Smash Bros. Melee, but there is a reference to Lanky on the Kongo Forest stage, since DK Rap played after the part of Tiny Kong Lanky was mentioned but in the sequel. Super Smash Bros. The ultimate verse of his verse about rap was removed, along with chunky Kong Lanky Kong's verse appearing as a trophy in His Super Smash Bros. Brawl Trophy, discussing his playable appearance in the Donkey Kong Barrel Blast after several years of not appearing in the game. He also has his own sticker, based on his appearance from Donkey Kong 64. He also appeared as a trophy again in Super Smash Bros for wii U and cost \$300. He is probably the latter who laid the most of Kong and has many funny expressions and manners. He uses his long sleeves to put out baddies and can walk on his hands to climb steep hills. In the latest game Donkey Kong: Barrel Blast, Lanky appeared for the first time in years to appear in other media cartoons Lanky Kong appeared in the Donkey Kong cartoon when the banana split into a golden banana was again stolen by the Kremlings unfortunately for King K. Rool, the Kremling that he sent a stolen golden banana at a bad time, as well as Lanky Kong and other kong at home. Throughout all the Kongs played from Donkey Kong 64, tracking King K. Rool easily through. And after passing all the Kremlin's traps and defeating all the enemies, they had the final protest against King K. Rool and the Kremling, who echoed the win and got their golden banana back. He also appeared in the N-Gang comic series, but only played a minor role. In n-gang comics, N-Gang vs. Nintendo, he collaborated with Banjo, Kazooie, Wario, Yoshi, Peach and Donkey Kong to play football with N-Gang, these are just his only appearances in the comics, and also his unique appearance out of the game. His clothes consisted of blue shorts with a white shirt that was too small for him, and on his back he had red and white patches. The button in his overview is yellow. According to the lyrics of DK Rap, he was described as having no style and no grace, and his funny face, and indeed his face was locked in a missing expression of thought. Also on rap, it states that he can do a handstand when he wants to show his sports side. In his latest appearance on Donkey Kong Barrel Blast, in addition to being graphically improved, he looked a little bigger and his hair style changed. In this game, his voice sounds different, Lanky resembles Manky Kongs, but unlike them, he is not a baddie, according to the German website DK64: Name: Lanky Kong Career: Hobby Stand-Up Comedian: Blowing Trombone Made A Favorite Dish Joke: The Movie's Favorite Raisin Cake: The Kong Canon 64 The greatest hero: Kongo Waalkes Arm Length: 7 feet to the satisfaction of other Kongs, Lanky has been at home on DK Island for some time now. Society is too boring and conservative for Lanky, however, so he is attracted to the slightly chaotic members of the Kong clan. Here he feels more comfortable, since his constant silence has always been appreciated, especially by Chunky and Kiddy, even television presenters can't move the enthusiastic comedian off the island: he's dying to experience some some exciting adventures! As a child, Lanky made a bet with a friend who could hang on the longest limb. Lanky mostly uses his long reach to attack enemies, he can also swing his arms while rushing to attack enemies. In his donkey kong barrel blast appearance, he gets more strength and ability to perform wild moves. Lanky Kong's talent is in Donkey Kong 64: From Medicine Cranky: Simian Slam: He can hit the green button with his face. Super Simeon Slam: He can press the blue button with his face on them. He can press the red button with his face with them. OrangStand: with this ability, he can stand on his hands and can climb steep hills. Baboon balloon: With the help of his gong plate, he can inflate like a balloon and can fly in a short distance OrangSprint: with the help of a coconut crystal, he can stand on his hands and work very quickly. From other Kongs: Trombone Tremor: He uses a trombone, which can defeat almost any enemy, and can also make something special happen if he uses it in The Music Pad Grape Shooter: He can shoot grapes to damage the enemy and activate the switch. Color: Blue speech, cool move, DK! It was identified by Cranky that he was a twisted twig on a distant branch of a family tree and some distant non-biological cousin continued to speculate on the German guide DK64 he was the uncle of Kiddy and Chunky when it was removed (presumably referring to the uncle of one of Kiddy's parents and Chunky, and because it mentioned kiddy and Chunky only. However, this is not confirmed elsewhere and is not possible due to Lanky's very young age and seems to be a joke. However, Lanky may be a member of the echo, like the orangutan known as the Manky Kongs found in the Donkey Kong Country game, this is a logical hypothesis, since Lanky is similar to Manky Kong in the name and species, for unknown reasons Lanky Kong is often associated with water. He is also the only kong who can be Enguarde in that game, and his only boss fighting on his own is against the fish in the boat. Ironically, orangutans are known as one of the worst swimmers among mammals not to mention dislike of rain according to Donkey Kong 64, Lanky currently holds the record for the longest reach in the world, and shows that Lanky has incredible access during his last fight with K. Rool. On the tag barrel screen and Kong Battle Player Select Lanky Kong sounded like he was saying Mario, a reference to a parallel series, since they are both in the same universe, Lanky Kong in video games and other media have demonstrated a lot of success. It is not known whether Lanky will be back in the game donkey kong in the future. Displayed animations The game adds photos to this gallery.
