## California drivers license 2017

The founder of Alibaba has not been seen for months – yet. Joe Biden was sworn in Wednesday afternoon to become the 46th president of the United States, presiding over a deeply divided nation that inherits a crisis that could be said to be bigger than any of his predecessors' problems. The celebration of the transfer of presidential power, a sacred American democratic tradition, will serve as a disconcerting reminder of Biden's challenges: the inauguration is unfolding at the U.S. Capitol, which was besieged by a rebel siege just two weeks ago, surrounded by security forces and a crowd-free because of the threat of a coronavirus epidemic. Biden will look at the capital, where empty storefronts are dotted, witnessing the deep economic losses of the epidemic and where summer protests have revealed the country's renewed accounts of racial justice. QUANTUM COMPUTERS ARE ABOUT TO ACQUIRE REALTORONTO, JANUARY 20, 2021 (GLOBE NEWSWIRE) -- TANZANIA GOLD COMPANY (TSX:TNX) (NYSE:TRX) (TANGOLD OR COMPANY) IS PLEASED TO PROVIDE A SUMMARY OF 2020'S ACTIVITIES AND ACHIEVEMENTS. 2020 Activities and Achievements Double Measurement & Resources in the Pakrev Gold Project (Pakrev Project) to 2.04 million ounces of gold and increase the average grade by 15% to 1.77 grams per ton (GPT) from 1.54 gpt in the measurement category & referred to. The company also recorded 635.5 thousand ounces of gold at a price of 1.11 grams in the inference category, and exploration targets between 1.2 million and 2.2 million ounces of gold. (See press release of 24 June 2020). Continue to move forward with the key components of the feasibility study of the independent sulphide processing plant: the company's technical partner, SGS Group of Companies (SGS), continued to advance the mineral testing work to determine the final flow schedule for sulphide ore processing; SGS continued geotechnical work, rock stress and other testing work; and the company also began to develop open pit models for Bureef. Successful finish, summer and operation of 5 tons per hour (tph) plant oxide laboratory. The test station has worked 7 days a week with two 12-hour shifts. Ultimately, the test ing plant significantly eliminated the risk from developing a much larger oxide process (based on government approval) that would be able to produce 15,000-20,000 ounces of gold per year. (See press release of 17 November 2020). Continued exploration through the third phase of the drilling program, which indicated that the Bokev reservoir is open at depth. Other results are still pending, and the company will provide future updates. (See management discussion and analysis for q1-2021 submitted on January 14, 2021.) Discover an additional salvation area carrying gold on a surface of approximately 1 km west of the main Tar Bukrev region. Other results are still pending, and the company will provide future updates. (See management discussion and analysis for q1-2021 submitted on January 14, 2021.) Mr. Andrew Cheatile, P.Geo., MBA, added to its board of directors. Mr. Cheatile is an experienced and accomplished professional gold mining industry. (See press release of October 29, 2020). On December 1, 2020, Mr. Stephen Moloney, CPA, CA, CFA was appointed CEO (CEO) of The Tanzanian Gold Company. He also approved the appointment to the Board of Directors of the company, (pending approval of the expansion of the Board of Directors at the 2021 Annual General Meeting). (See press release of December 1, 2020). Tangold and Stamiko, working together an updated mine plan for Pakrev, submitted to the Tanzania Mining Commission. Once approved, the updated mining plan will replace the mining plan submitted to the Mining Commission in 2017 as part of the renewal of the private mining licence provided by Bocgrave. (See press release of January 8, 2020). Tangold and Stamiko have agreed on amendments to the Bakrev Joint Venture Agreement (JV Agreement) to bring the agreement into line with recent changes in Tanzania Laws and updating the working arrangement between the two parties (the original JV agreement was concluded in 2011). The amendments are subject to obtaining the necessary government approvals and finalizing the relevant legal documents. (See press release of January 8, 2020). Mr. Stephen Moloney, CEO of Tangold, said: As we enter a new year, we would like to thank all stakeholders for their continued support. It has been a very constructive 12 months for Gould and I am excited to be on board and look forward to contributing to Backref's progress in collaboration with our joint venture partner STAMICO, for the benefit of all stakeholders. About Tanzanian gold company Tangold along with its joint venture partner, STAMICO, is building a large gold project in Pakrev in Tanzania that is based on an expanded mineral resources base and processing its oilable mineral reserves into two independent plants. To date, the continuous drilling programme has more than doubled the volume of measured and indicated mineral resources to include 2.04 million ounces of gold. Exploration targets set by NI 43-101 standards could add up to another 2.0 million ounces of gold (see press release of 24 June 2020). The company began production of the initial test of oxide ore in June 2020 at the oxide testing plant, and now expects government approval to build an expanded plant (oxide). Tangold is on three tracks to create value: strengthening its balance sheet by expanding near-term production to 15,000-20,000 ounces of gold per year from oxide processing when approved of an expanded oxide plant; The Conconing with drilling program for further testing the potential of the mineral resource base by: (i) drilling at deeper levels; (ii) drilling new targets of oxides; (iii) drilling wells to upgrade mineral resources in the inference category; and (4) a step drilling program in the northeast stretch. The qualified person of the company is a qualified person, Mr. Peter Zizhou, who has reviewed and approved the contents of this press release. Mr. Zicho holds a Master's degree in Science (Exploration Geology) from the University of Zimbabwe (2000) and is a professional naturalist registered with SACNASP (No. 400028/08).
