I HAVE NO MJLOC TO TERMINATE THIS WORK. Ever. Feel free to pm me a walkthrough for the remaining medals (You'll get full credit, of course) or post a link to another TTA3 medal guide. Contributors: ThaDudez Play it here. (Custom > Casual > Round Length = 100 secs. > Round scaling = 0.1X). Stick to what the medal demands. If you run out of ammunition/health just sit inside/between enemies. The ammunition crate will eventually appear. Once you get the medal, start a new game and go for another one. ---- The image below is an example of standing in enemies. They can't shoot you if your in this position, unless, of course, they have the rebound rifle or a grenade launcher. If more enemies are around, jump until they're all right next to you. ---- Find a spike grenade launcher, and a dart grenade launcher. Carry them both and shoot them in the order they say. ---- This is easiest with the valve. Drop both your weapons and hit an enemy twice with the barrel. Press F to preform the execution. ----- The medals below are courtesy of ThaDudez. ---- The easiest to do at the biggest courses, because they all have certain places to hide. ---- <spacebar> Easiest to do at the beginning of a round, when you only have 1 opponent. ---- Easiest to do at the beginning of a round. </spacebar>Eviscerator Takes 150 Headshots in one round. In my personal opinion, it's the easiest, either with the Dart Launcher Grenade from a distance, or rifles with double leverage up close. Always aim for your head. ---- Remember that the one-handle dare is not the double-handled weapon. An easy tactic for this, is to basically kill your opponent, then pick up their weapon, kill a new opponent, pick up their weapon, kill a new opponent and so on... --- this is my love, piercing blindness, collateral damage, don't bring a gun to a shotgun fight, Don't you feel lucky?, Woo chip, lead ninja pipe, Buckshot firestorm, Chicago memoir , Bullet hose wrangler, Shotgun sniper, and Hasta at Vista Get 100 kill with that gun. The easiest to achieve by restarting after you get one of the achievements, because AI is becoming more and more difficult through the level. Can't get 100 kills? Keep practicing, and you'll get it eventually. I don't have any help for you there. ---- Take 50 kills with that gun. For tactics, look higher. ---- To get this weapon, you need to get 100 kills for each weapon in the first group, and 50 kills for each weapon in the second group. You will automatically get this weapon at the beginning of the round, along with the beretta and Tommy gun. It has only 100 bullets, but it reloads automatically, and can shoot multiple opponents at the time. ---- I think -----Back to the Curated Index of The Complete Collection of Thing-Thing & Thing-Thing Arena Games Thing-Thing Arena by Weasel Thing-Thing Arena 2 of Weasel Thing-Thing Arena 3 by Weasel Author Comments Thing-Thing 2 is ongoing. Check out my website for more details. --Update 2 -- w00t front page! Thanks for everyone's support, I appreciate and I'm still reading all your comments. About all the Comments Madness: Neither me, no Krinkles are the first people to make a mouse with the aim of the 3rd person shooter engine, and I realize that it is black and white at first, but I wanted the game to look gloomy and gray until it finally makes its way into the colorful outer world. In these respects, I think this can play somewhat like madness, but these are 2 very different games. --Update-- Daily feature! Thank you all. I've read all your reviews, and thanks for the imputation. You also have to shoot from the first room for everyone who didn't understand that. This is a game engine that I a while back and was simply for experimental purposes. I'm creating a complete game around an engine similar to this and I wanted to get some feedback on it before it gets too far into it. Controls are A and D move W jump SPACE is open doors, F is changing weapons and mouse Aim/ shoot. You can pull in the vents to pass by an area. Note: there is only one level in this, so it's a bit short. Try all the cheap weapons, add it in a bunch of weapons that you can't get in normal mode. Newgrounds accounts are free, and registered users see fewer ads! 1 2 3 4 5 6 7 8 9 10 ... 188 ... 364 Man, nothing against the classic itself, but damn it. The player seems to give me a mostly black screen. Unfortunately, I liked that back in the day, Nostalgia Road, here I am. You may have lacked color and similar, but this game is what started from the beginning of a tram ride to hell full of bullets and blood. My only complaint was (spoiler alert) when that Poseidon just gets up and attacks you at the end without much more explanation for what the hell happened. 10/10 Nostalgia's sake Page 2 Taking the classic frogger to a new dimension!
