## Summon skeleton poe life

Hey guys, you just wanted to give an update. I played this build, but I did it using a tree based on life rather than ES, because maligaro's goal recovery form only applies to life. I will update the thread soon and add some videos of me deleting maps with it (only as level ~75 and I can delete t4s) Page 2 StormHavoc, 2019. 3. 11. 18:15:07 Comment: 140 View: 1311312 frostzor27 f4ward, 2020. 11. 9. 15:19:41 Comment: 5 View: 3654 f4ward 2020. 12. 22. 10:33:07 pm Enk191, 2014. 12. 25. 15:41:27 Comment: 17840 View: 18250943 Findejs Lord\_Amandus, 2020. 9. 16. 12:31:14 a.m. Comment: 23 View: 7922 bahmut458 Hemzokuken, 2020. 10. 31. 14:41:44 Comment: 1413 Views: 130977 Turbo32 iLL3aT, 2020. 2. 18. 6:19:13 a.m. Comment: 1176 Views: 374131 iLL3aT Angry\_Roleplayer, 2018. 5. 18. 15:24:11 Comment: 1090 Views: 462832 Angry\_Roleplayer Suzu520, 2021. 1. 10. 06:29:24 Comment: 0 View: 117 Suzu520 Tales\_Black, 2020. 11. 2. 12:31:10 .m. The main flaw of all zombie/skeleton builds lied in the clumsy behavior of the Minions and how inconsistent their DPS is, lowering the clear speed and boss agricultural potential. Removing these negatives was one of the main parts of patch 3.8, putting this build at the highest level of build. At the same time, this build does not require specific uniques, which makes it a perfect choice even for a Starter build. You can also check out the other Builds of Path of Exile in this article: Best PoE Builds by Odealo 1. Gameplay This is a typical type of summoner build that relies on your minions to deal crazy amounts of damage and protect you from threats. Summon Skeleton Spell is used to summon skeleton warriors who deal huge melee damage, and using the feed frenzy support gem, we'll make them more aggressive, which has increased the radius with which they detect enemies and your overall clear speed. On the other hand, zombies are used as meat shields, which are connected to a support gem that shares the same name, makes their behavior defensive, and causes them to prioritize enemies near you, with the ability to taunt them on Hit. To further increase our defenses we rely on the high pool of life, mind on passive matter and passive torment. This build also offers quite high physical damage mitigation for a 16 0:07 Level 16 Minotaur 0:51 Hydra Level 16 Lair 1:17 Level 15 Sepulchre y2: 01 Tier 15 Coves 2:35 Tier 15 Estuary This video was recorded on a Level 92 Necromancer on Standard Softcore in Patch 3.9 Odealo is a safe trading platform for MMO players. Here you can buy, sell and exchange PoE currency for real money. 2. Very affordable build PRO &amp; PRO, CONTROS PRO with millions of DPS on a very low budget, easy to level up with minions doing the job for you DPS very high with a crazy explosion when you throw Vaal summon skeletons, but the great survival based on multiple defensive levels can do any cons mod map evocation object in Blight League will be very expensive 3. Leveling Tips The whole leveling as a Summoner is a breeze. This build is based on Skill Gems and Passives for damage, so you should have no problem progressing through the campaign regardless of your gear. Initially, this build might seem like so we recommend that you initially use the Evocative Unleashed Spirit and switch to Summon Skeletons when you start mapping. Below you will find the recommended gem configurations for the leveling phase and the unique low-level items that are cheap and extremely useful at the lower levels. Suggested Leveling Gem Configurations: Increase Zombies Increases Zombies - you'll get this gem right after completing the first mission and entering Lioneye's watch. Mr Lioneye. they are used for monster tanks from the start and dealing a moderate amount of Minion Life Support damage - the main support gem for Fortify Support zombie minions - increases your Zombie's defenses, as well as providing them with a powerful defensive benefit Summon Furious Spirit Setting Summon Furious Spirit - your main DPS during the leveling phase. They seem to do better at lower levels in terms of clear speed than support for hand-to-hand splashes of summoned skeletons - a mandatory gem to level quickly when using support for damage to enraged spirit minions - provides more damage to minions to enraged spirit bandits: we recommend killing all bandits for two additional passive points by leveling skill trees : 37 skill tree priority points : 1) Lord of the Dead 2) Lasting Bond 3) Quick Recovery 4) Spiritual Command 5) Death Tuning 61 Passive Tree Priority Points: 1) Redemption - Spiritual Help - Right Army 2) Gravepect 3) Flesh Purity Recommended Leveling Items: Sidhebreath - the only best leveling item for this summoning build. Provides minion damage bonuses and very high movement speeds and greatly helps you with mana management at lower levels (20-30)% increased mana regeneration rate +25% to Cold Resistance 0.2% of leeches physical attack damage such as man minions have (10-15)% increased at most The Minions of life have (10-15)% increased the speed of movement (15-10)% reduced the mana cost of minion skill minions (10-15)% increased the practice of Damage - if you have problems with your Mana when spamming SRS you should consider getting this Ring. Greatly reduces the mana cost of spells and increases mana and mana+(20-25) regeneration rate to maximum Mana +(30-60) at maximum Mana (3-6) Mana Regenerated per second (-8-4) at Mana Skill Cost 8% of damage taken as Mana in 4 seconds when you hit reverb rod - a very decent low-level choice for the weapon slot. It provides your SRS configuration with a level 1 magical echo that causes multiple spirits to be summoned with each cast (15-19)% spell damage increased +1 to the level of the died gems taken are supported by the Level 1 Echo Spell +(10-30) to the Intelligence Victario. Dexterity Flight provides a very high movement speed bonus for both you and your +15 minions to Dexterity +15 to Intelligence (100-150)% increase in evasion score by 5% increased movement speed (5-10)% of damage taken as Mana in 4 seconds when you hit 10% increased movement speed by 10% more than movement for you and the neighboring Allies 4. Final Skill Tree, Ascendence Points, and Pantheon Final Skill Tree: 116 Final Skill Tree 116 Building Path (PoB) Links Ascending Points: Preferably in That Order: Mindless Aggression Unnatural Force Plaguebringer Bone Barrier Pantheon: Major God: Soul of the Brine King You can't be stunned if you've been stunned or blocked by a stunning hit in the last 2 seconds God Minor : Soul of Gruthkul 1% 1% Reduced physical damage for each hit you've recently suffered up to a maximum of 5% 5. Final gems bind vaal elevating summon skeletons - they allow you to summon skeletal warriors for a lifetime that are your main source of DPS. The Vaal part of the ability should be used for an extra explosion against boss minion damage support - greatly increases support for minion feeding frenzy - increases your minion DPS and makes them more aggressive, which further increases your clear speed Fortifies support - provides a high DPS bonus to your skeletons. In our configuration, this gem seemed to give the best results, although you could do better with main or awakened melee splash support - it provides a sketch effect to the body-to-hand physical damage support of your skeleton's melee attacks - increases your skeleton's melee DPS [UTILITY] Increases zombies - used as flesh shields to absorb damage and taunt your skeleton's body-to-body DPS Enemies approaching support for the life of the minion - increase support for the strength of your zombie's life - increase your support for your zombie's life force - increase your Zombie Damage and provide them with a powerful defensive benefit Meat Shield Support - makes your zombies defensive and reduces damage taken Optional Gems : Feeding Frenzy Support - You can replace Meat Shield if you have more than 1,000 strength so your zombies are more active in fights and Leech more Life for your character [UTILITY] Flesh Offering and Flame Dash Flesh Offering - increases the attack of minions, Movement and Flame Dashboard speed launch - recommended movement spell that increases mobility Faster launch support [UTILITY] Profane summon and summon - Recommended mobility spell used in this build. Each launch will also trigger arcane wave desecration - create a stack of corpses that you can use for the meat supply and to summon zombies faster launch support [CURSE] Punishment thrown when damage taken - used to automatically cast the Linked Curse whenever you take a certain amount of damage. Use a Level 10 CwDT gem punishment - the recommended curse for this build that provides your minions with greatly increased physical melee damage and attack speed [UTILITY] Immortal Call/ Carrion Golem Launch when damage taken in support - they will generate supported spells when a certain amount of damage is taken by your immortal Called character - reduces the physical and elemental damage taken for a short-lived augmented duration summon carrion golem - provides your minions with additional physical damage making it the best for an summoner character [UTILITY] I hate hate - the recommended Aura for this build that provides additional cold damage to all your minions. You should generously support it for a greater Generosity Support effect - it increases the effect of supported Auras, but makes it applicable only to your Allies/Minions and not to your character [UTILITY] Bird's Avian Appearance - guarantees a lot Movement speed and DPS bonuses to your minions. You need to build it on a part of your rare gear and it requires you to wear Saqawal's Unique Nest Armor Odealo is a player-driven safe market for PoE currency. 5. Equipment Configuration Below you will find the recommended equipment for this zombie/skeleton summon build. As mentioned above, it can be played with any rare equipment, so you can replace any listed unique item with pretty much anything you want. We would also like to take this opportunity to invite you to visit our PoE Marketplace where you can buy and sell Path of Exile currency with the use of real money. Link to Marketplace is located at the top of our recommended items: Limiting resistances Will give you enough DPS/Life/Mana to start successfully mapping object statistics priorities: Strength Force Life Elemental Resistance / Mana Regeneration Rate (Helmet) Baron - Helmet required for this setup. This build will work without it. although our skill tree is strongly geared towards using Baron to maximize the DPS of your minions and grant us an extra bloodsucker from zombies +2 to the level of minion gems taken +(20-40) to armor +9-12% to Chaos Resistance 20% increased movement speed +1 to maximum number of skeletons (15-18)% increased strength (boots) rare boots - preferably senior base with extra Fortify support for your Raise Zombie Min configuration. Requirements: 70 maximum duration 25% increase in movement speed 35 Force 70% Total elemental resistors Optional affixes: Mantapped gems are supported by the enchantment of #Fortify. Regenerates 2% of life and mana per second if you've recently been hit by 18% mana skill cost if you've recently been hit (Belt) Rare Belt - preferably Visa Stygia for extra abysmal grip. You can also use the Studded Belt for the ultimate Strenght Min bonus. Requirements: 80 maximum duration 70% Total Elemental Resistors Optional Affixes: Strength Armor Assessment Chaos Resistance (Amulet) Rare Amulet - with the highest possible minimum Strenght bonus requirements: 70 maximum life 60 Force Assign optional affixes Voracious Horde / Death Tuning: Mana/Mana Regeneration Elemental Resistance Attributes (Rings) Rare Rings - with high standards of Life Resistance, Strength and Elemental. Minimum requirements: 65 maximum duration 45 Force 85% Total elemental resistors Optional affixes: Provides level 20 appearance of bird ability (gloves) Rare gloves - mainly for Min defensive stats. Requirements: 80 Maximum Duration 40 Force 80% Total Elemental Resistors Optional Affixes: Provides Level 20 appearance of bird skill glove enchantment: Commandment of efficient frost training - rose right above the witch's starting point, will grant over 110 +(16-24) strength bonuses to Force Intelligence from Passive in Ray is transformed into rare abyss jewels of strength (jewelry) - since skeletons get 50% more added damage, I would recommend getting abysmal jewelry against regular ones Recommended affixes: Maximum life minions inflict additional optional physical damage affixes: increased minion damage if you used a recently served ability (Balloon) Rumi's Concoction - provides a bonus armor score and a chance of block/block magic, giving you Extra defenses and Mana regeneration rate thanks to passive mystical bulwark +3000 armor +(14-20)% chance to block attack damage during balloon effect +(6-10)% chance to block spell damage during The Flasks effect Suggested: Sizzling Flasks of Sta's Divine Life The experimenter's basaltic flask (bleeding immunity) of the experimenter (curse immunity) Quicksilver's ample adrenaline flask (increased movement speed) Odealo is a safe market PoE currency and unique items where exchanges are made by regular players with the use of real money. If you have any other build requests, leave this in the comments below. The images used in this article are intellectual property of Grinding Gear Games. Games. Games.
