The book was first published in German in 1956 under the title The Monastery of Weig Zum and Herin Adabten by the publisher Verlag Hermann Bauer. The first edition of The English language appeared in 1962, published by Osiris Verlag and translated by Alfred Radsbeller. Dieter Rogberg published a second English translation in 1971. The last translation published by Mercure, translated by Gerhard Hanswell and Franca Gallo, was edited by Ken Johnson. [1] The book itself is divided into two parts: the theoretical and the practical. The Department of Esoteric Theory and Philosophy is summarized to assist the student when following this course. Topics covered include elements (fire, air, water and earth plus v, ether), karma (the law of cause and effect), occult anatomy, physical, Australian and mental aircraft, and matters of religion and God. The practical section is divided into 10 steps. Each step contains physical, other and mental exercises that the student must master to the point that Bardon has set before moving on to the next step. The three types of exercise should be exercised within one step at a time, and the idea is that this will lead to more balanced development.
