As you look at which option is right for you, keep in mind the size of the room you want to keep cool. Today's most popular models clearly advertise a specific amount of square meters they're equipped to handle, and you'd do well to read their reviews to check (I've got it covered here). Also, consider the actual setting of the air conditioning system. Most portable air conditioners use exhaust hose pumps to hot air from the room with a window vent and to get cooler air.
