Buyers' Guide: Things you consider when buying or creating a prom dress before you know it, it's time for prom again. It is best to look for a dress about five months in advance. This is especially true if you plan to buy it online because you need to consider shipping and possibly things like resizing and adjustments. However, choosing the perfect dress is not easy. You need to know what kind of dresses you like. Remember, prom is more formal than homecoming, so you'll be looking for something more official, preferably long and not knee length or tee length. The good news is that long ball gowns come in all shapes, sizes and styles. Know your options before selecting one for yourself. The same dress can look very different when worn by different people. When you shop in an outlet or department store, try different clothes to see what works best. Type The dress type is a key factor in your personal style. Do you prefer a treasure or a high neck? Sleeves or straps? Do you want a dress with a mermaid train? An A-line or a ball gown? Or a fit and flare? Ask this question and your options will slowly begin to shrink. It is easy to choose a dress with a smaller number of options. is the same if you want to make your own dress. Pattern Most humble ball dress styles come in simple, monochrome colors. As modest refers to the style and not so much to color. You can choose a bold one like red or a pattern. You can choose a warm or cool color or black or white. You can complement the dress with beadwork, dainty rhinestones, lace or even a striped dress. There are dresses with Flower embroidery. The selection is endless. As with type and color, knowing what patterns you like will limit your choice. Accessories Modest dresses work well with jewelry. Any kind will do, it depends on your preferences. People looking for modest styles are not likely to wear eye-catching jewelry, so just pair the dress with your favorite necklace or earrings. Personal preferences are most important when shopping for your ball gown. Pay attention to the elements you like until you are left with nothing but the best. Your body type your body type is important, even if you choose a modest ball gown. Of course, you can wear any dress you want without taking this factor into account. But some will be more flattering than others. There are a few main body types: athletic structure, apple-shaped (weight mostly in the abdomen). Pear-shaped (carrying weight in the hips) and hourglass, where the waist is the smallest point of the body. You may want to choose a modest ball gown, depending on your eye color, skin tone or hair color. Why should you? You have a dress that complements your features and is light on the eyes. When choosing a ball gown, you should pay attention to your undertones. Are you warm or cool? This is not a question of personality. What are your undertones? If the veins on the wrist look green or olive, your undertones are warm. Blue or purple, you have cool undertones. Bluish-green (in between) means that your undertone is neutral. If you have a warm tone, you would look best in pink, red or yellow. Cool tinted skin works best with more muted colors such as green, blue and royal purple.
