DescriptionLeer Important InformationConformation. Comments InTENSity Twin We Know[™] III is a portable electrotherapy device that offers two therapeutic modes: TENS and Ems therapy, which are used for pain relief and muscle stimulation. The unit is between the upper step of pain relief devices with a maximum power of 105mA, and also comes standard with an AC adapter and a detachable belt for easy use, at home and convenience. Pain relief using TENS mode. TENS is a non-invasive method without medications to manage pain by sending small electrical impulses through the skin. In many cases, this stimulation will greatly reduce or eliminate pain. Strengthen your muscles using EMS mode. EMS is widely used in hospitals and sports clinics to treat muscles and to prevent atrophy in affected muscles. Product Features and Specifications : Portable easy-to-handle electrotherapy device for pain management Unit combines TENS & amp; EMS therapy for optimal treatment Channels : Dual Channel Pulse amplitude : adjustable, 0-105 mA Voltage : Constant current, 100-240V (AC adapter) Pulse frequency: adjustable, from 1 to 150 Hz Pulse width : Adjustable, from 50 to 300 microseconds, 10oS / Waveform step: TENS: SINGLEphase square pulseEMS: Single-phase square pulsePower: 1x 9 volts battery, or Power adapter A/C included for household use. Timer : Adjustable in 1-minute increments between 1 and 60 minutes or continuously. Processing time counts automatically. Dimensions: 4.5 x 2.55 x 0.9 Weight: 0.28 lbs with battery 1 year manufacturer warranty Package includes everything you need to start using the device immediately: Twin Stim III Unit 45 Leads Wires 2 1x Pack 4x Electrodes High Quality Self-Adhesives 1x 9V Battery A/C Power Adapter Hard Plastic Case Manual Electrotherapy Programs: 4 TENS Modes: Burst Adjustable Burst Ratio of 0.5 - 5Hz, Pulse Width 50-300'S, Fixed frequency at 10Hz Normal continuous stimulation with adjustable frequency and width pulse Mode of modulation of pulse width decreases to 60% in a cycle, and increases back to baseline in the next cycle. Pulse, pulse width and cycle time are adjustable. Pulse frequency modulation mode (Modulation 2) Pulse frequency decreases to 60% in one cycle and increases back to baseline in the next cycle. Pulse, pulse width and cycle time are adjustable from 1 to 6 seconds. Determines the time to touch the output level set from zero and from the output level set to zero. Time on/off : Control time decreases time, adjustable from 1-60 seconds. The disconnection time controls the relaxation time, adjustable from 0 to 60 seconds. 3 EMS: Synchronous synchronized stimulation (S) on 2 channels. The duration of the ramp, ramp up, down ramp, pulse, pulse and width are all adjustable. Asynchronous /Alternative (A) Depending on synchronous mode, except that channel 2 stimulation occurs when channel 1 contraction is complete. Delay (D) Depending on synchronous mode, except that channel 2 stimulation begins after adjustable delay after the channel 1 stimulus begins. Prices: All prices published on our portal are reflected in Mexican pesos. All prices are plus 16% VAT Only if invoicing is required. PhysioTENS Mexico. You reserve the right to change or increase prices at any time without prior notice. All published promotions will be subject to availability and validity dates. The prices set on our portal are not subject to additional discounts compared to those they already apply at the time.
