Fingerprint Model App Lock 4.76 Update Fix Bugs Read More DescriptionBietric Solution (free) This is a security application that closes your other apps with a template or PIN. Developers are also claiming to have a option, but it doesn't seem so. He had a poor kentone born cluttered with ads. Closing the fingerprint doesn't work even if your phone has a scanner. You can see the icon, but nothing happens when you press it. The PIN options and templates perform functions, but not quite. Sometimes when you open an app, it doesn't prompt for a password. You should restart the app to use it. Corrupt apps in the background of this piece of software have a habit of closing background apps. There are plenty of announcements about the UI. Only one table has the only feature that you need. The rest are links and promos. Drainage your device's memory since it runs in the background, resource consumption is a problem. You need to give special read access to other apps on your phone. That means a lot of memory down the drainage. You can also experience a significant increase in loading the more time you use it. The only reason to use this app would be if you are sharing your device with someone else. That is not a good idea, to start with, and neither is downloading this lag generator. Save yourself the hassle and logs with the standard Android protection you already have.
