Before you start playing Guitar Hero, you need to decide whether you want an open mic night or a level of intensity in a sold-out arena. The latest Guitar Hero release Guitar Hero III: Legends of Rock has five game mode options. Each offers a variety of opportunities and environments to help you build your skills, show up against friends or climb your way to the top. Tutorial: Use this mode to hone your skills and get you ready for a big time. You can slow down songs or play them at a normal pace without any pressure to be booed outside 10- stan. Career: Play your best to open songs and venues and make money with you. This mode separates the game from the levels made from the set of songs that multiply in trouble. Guitar Hero recommends that you start in career mode to unlock hidden content like new characters and songs and experience the thrill of success. Co-op: Get high marks with the help of a friend. Two people play different guitar parts for the same songs (for example, base or lead guitar) to get the best possible score for Guitar Hero II and Guitar Hero III. Quick Play: Select a song and play without you need to move through the levels. Multiplayer: Challenge a friend face-to-face by playing different guitar parts of the same song. You can also open pro face-off mode to compete with the same notes in the song. [source: Activision] Next, it's time to decide how close you are to rock 'n' roll fire. Four levels of difficulty are distinguished by the speed and number of notes thrown during the piece. If you're just getting started, don't even try anything but an easy level to get the hang of it. Easy: use only green, red and yellow fret buttons. Medium: use green, red, yellow, and blue fret buttons. Tough: play with all five fret buttons. Expert: use five fret buttons at a faster pace. Whether it's the bloodshed of Mick Jagger or Gene Simmons, there's everything on stage. For this reason, Guitar Hero has different characters or avatars to choose from. Match your riff style with Johnny Napalm's mohawk, Judy Nails' vixen vibe, or one of the seven other Guitar Hero III: Legends of Rock characters (including the one you can open). Also, if you wear the mantle of Izzy Sparks but not his pants, don't worry. As you progress through career mode, you can buy new clothes and instruments for your avatars. Now that you've set up a virtual set list and band, it's time to play. Learn more about guitar hero game scoring rules. Standing in front of the TV screen with a plastic axe on your chest, you take your best rocker position. Your fingers twitch a little with fret buttons, waiting for the camera to zoom into the screen avatar and you hear the first beats of the song turn on. It's time to play Guitar Hero. When the music starts display screen changes to a note diagram that resembles an unopened guitar neck. At the bottom of the screen, you'll see a destination row with five color-coded discs that match the top-down order of the driver's fret buttons. When your guitar part starts, color-coded gems slide along fret lines toward the target line. Guitar Hero is supposed to hit the corresponding fret buttons and the controller's strum bar at the same time as the jewels hit the target line on the screen. If successful, a small flame bursts above the bead of the screen. For every right note you hit, you get points. If you hit more than 10 notes in a row, these score values can be told up to four times. The key to scoring is timing, so the song's expertise helps. Depending on the condition and difficulty, you'll be following a guitar, bass or rhythm guitar. During faster melodies, keep an eye out for hammer-on and pull-off notes known as HOPOs in guitar hero vocabulary. These notes do not require a strum bar. Instead, if you press the right fret button when the bead hits the target line, you're fine. In Guitar Hero versions before Guitar Hero III, you need to press and hold the fret button on the previous note to hammer properly. You can spot HOPOs because their centers are completely white, while regular notes have a black ribbon around the white center. (Real guitarists play HOPOs by hitting or releasing a string with a ferret so loud that it is making noise without it needing to strum.) Continuous notes, which are held for multiple beats, are also important to catch. On the screen, these notes have long, bright lines on the back. To prepare, you can press the appropriate fret button on the axe early if you have time, and then press the support bar when the note reaches the target line. Since you only need to hit the strum bar once on a continuous note, use this hand to rotate the whammy bar and listen to the notes bending. Hitting the Whammy Bar also adds to your star power, which we'll talk about next. Scoring isn't the only part of Guitar Hero success. The stone meter in the lower-right corner of the screen also measures your performance. Depending on the accuracy, the needle points to green, yellow or red. If you see red, you'd better get your fingers on track because your character is in danger of being booed off stage. To maximize your score, you need star power in addition to good licks. The star power meter in the lower-left corner of the screen shows your score at the top, the number of consecutive notes hitting the bottom edge, and in the middle of a large single digit number. This number is the result factor that pumps out the value of each hit you hit. Blue star-shaped gems build your star power, and when the meter flashes, tilt the controller vertically to activate it and double your point factor. In addition, the tilt of the controller One part of the career space in Guitar Hero III: Legends of Rock is the boss fight. Moving around in career mode must be tolerated by three bosses: Tom Morello of Rage Against the Machine, Slash of Velvet Revolver and Lou the Devil. In multiplayer mode, you can also fight a friend to assess whose skills dominate superiority. Along the more challenging bonfire tracks, boss battles also include fighting power. In battle mode, whenever you hit star-shaped notes, they charge your fighting power. Once you have accumulated enough, you can tilt your controller to release the attacking movement to another player. Check out these note-knocking moves to learn what you share and know how to take it: Broken String - just what it says. Opponents cannot reuse the string until they have tapped the corresponding fret button enough times. Difficulty up - increases the difficulty of spreading a note. The overload of the amplifier makes the opponent's scrolling display hard to see. Whammy Bar - opponents' guitars stop until they move their whammy bars quickly. Stealing power, stealing your opponent's power. Double regulators make their fingers burn twice as much with notes. Left/right flip -- change your opponent's ferret arrangement to the opposite hand. Death leak, as bad as it sounds. If you are in sudden death mode, this will clear the opponent's stone meter. [source: Activision] When you go through career and collaboration modes, you also open hidden objects. These include bonus tracks, extra characters, and new guitars and basses. Gamers has also sent Guitar Hero scammers online to all versions and platforms that allow you to quickly find items buried in the software. While scoring is important, you should also know how your axe works. Next, let's take a closer look at the mechanics of the game and your Gibson guitar-shaped controller. So, you've found a few songs or a great playlist on Spotify, but you want to listen to them offline. Fortunately, Spotify has a way to download your favorite songs so you can enjoy them whenever you want. Before you get carried away, you'll need a couple of things first: saving songs on your device, connecting to the Internet, and subscription to Spotify Premium. Prerequisites Spotify is a little picky about what it allows you to download on certain devices, so here's a quick summary: on the desktop, you can record liked songs and playlists for offline listening, but – unlike mobile – albums and playlists aren't in the equation. Desktop Downloading a liked song to desktop Downloading a list of whole liked songs to your computer couldn't be easier – just open spotify's Liked Songs section (using the Spotify app for MacOS or Windows) and swipe the download switch. That's all there is to it. Download playlists Step 1: When you view a curated playlist, you want to: Click on the small heart-shaped icon, located directly to the right of the Play button, to save it to your library to make it easy to use. (If you don't, the download option remains hidden.) Step 2: Next, change the Download slider in the top right corner of any playlist. The playlist will start downloading, but remember that it may take some time depending on the size of the playlist and the speed of the Internet connection. Once saved, the playlist is available from the Playlists section to the left of the Spotify app for MacOS and Windows alongside all other playlists (even those that are not downloaded for offline listening). Mobile How to Download Liked Songs, Album or Playlist to Mobile Phone Whether you download a Liked Songs playlist, album or playlist, the procedure is the same across the board. Just download the collection you want to save and tap the download switch in the top right corner. The stripes will then begin to load. Note: You don't have to follow a playlist or album to download it to your mobile device. Upload a podcast to mobile step 1: When you view a podcast (such as Trends with Benefits), tap the three horizontal dots in the upper right corner – or the three vertical dots if you're using an Android device — to access the details panel. Step 2: Next, select Manage Downloads. Step 3: A download icon will appear next to each episode to help you choose which one you want to download. Note: You can also tap three horizontal dots to the right of individual cycles and select Download if you want a faster method. Troubleshooting Downloading additional songs is not available? It could be because you've hit such a frustrating 3,333-piece device-specific limit. If so, consider removing the playlist from the offline listening library. It frees up space for the songs you're trying to download. It is also worth bearing in mind that you can only download songs on three devices at a time. Try to add more and you'll be at an impasse. Reach this point, and your only option is to make a U-turn by turning off offline listening in another gadget. Supplier recommendations
