How much additional money (if any) do you need to invest to make your home appliances more efficient energy? 730-630 = 100 As long as the Model #1 is even cheaper than the model ----- \$100 savings 2. What will be the total energy efficient devices? 260-142 = 118 118 kWH / yr 3 energy savings. How much money will you save each year if you replace the devices the devices? 0.08*118= 9.44\$ 9.44 saves every 4 years. What will the overall (all devices simultaneously) pay back period? 0/(118*.08) = 10.60 0 years to recover the additional investment. Do not pay back Period 5. How much you will save over a period of 10 years. with the energy efficient devices? 9.44*10 (Save money for 10 years) + 280 (the additional money you need to invest) = 374.4 You will save \$312 over a period of 10 years. The cleaner with Greenersm Polishing from Electricity Calculator Usage - By choosing the most efficient energy model #3, you can prevent 120 pounds of greenhouse gas, 1 lb of Dioxide Sulfer and 2 milligrams of mercury emissions per year. Looking at current Plug calculation of 9.44 (saving money per year) / 12 = .79 Return home the car will also give you an option starting late as well as an extra pleasure option and prewash for your clothes. You can also choose an express on your car to save you time when you need a quick wash. This Kenmore car works with a Catalyst Cleaning Agent that saturates the clothes of your laundry with a concentration specially designed in laundry detergent. Consumer Review (mysears.com) Excellent Wash & amp; Dry I have had this wash & amp; medicine for almost 3 years. I make about the burden of 12 or more to laundry every week. My clothes have always come clean, circle fast guards, keeper writing is wonderful. I washed shoes, big loads of towels and I've never had one problem. None ... LOTS OF SPACE, CLEAN UP CLOTHES EFFECTIVELY, AND CAN EVEN WASH MY HEAVY VACANT DAVESJEN84 FL 2018-04-17 True I have a large family and this wash it all the more. I never thought I'd ever buy a front loader but this changed my mind. She washed my daily clothes. It also makes my towels and they are super clean when finished. I'll definitely recommend this to brush anyone looking. jenmac0604 Pittston, PA 2018-04-06 True Ticket, check. Address pass, check. Lugage, check. Board of aircraft and ready to withdraw!!! This is how I feel every single time I start this washing machine washing machine. I've had this car for over 6 years and since day one it sounded like a plane taking off to my laundry room!! The noise is horrible. OK... noise about where I love this car... No! Not only is it noises but it such a full belly dancing dance! If that's not enough, now, every time I run, I'll run it in a bit of water pushed onto the floor. No matter what kind of load, the water looks like the car peed itself. I can't wait to get a different car. Do yourself a favor.... AVOID THIS CAR AT ALL COST. mmdylan USA 2018-03-01 This tower washed well but breaks down often. It started legging again a 16 months ago, but I held it early so it didn't damage the floor at that time. We got it repaired again and today, 16 months later it started to lear again. This time it damaged my new floor. I'm so angry!!! We've spent more money in guaranteed buyers and repairs in the past 11 years than a brand new wash. It was a true lemon!!! This time I put him out on the sidewalk! I have a pure washed top loader in the garage that is running well without problems and we've had this one for 14 years. Josianne Los Angeles, CA 2017-10-18 Strong I am really shocked by the negative comments on this wash. We've had one now for sometime and we love it. No leg problems at all. I had always said that after washing and washing up front charges to let the door break open after use. I did this and never had a mold problem. Simply use common sense and you'll love this wash! Imbondgirl Englewood, FL 2017-10-17 True Car gets worse ever. It is supposed to be able to accommodate large loads such as several towels and/or a kidney sized comforter. no way! With very little of a load it goes through repeated error codes and clothes they're looking wet when they're supposed to do. You have to shunk / Dren / Turn again because there are no turns only. So much for having an energy wash efficient. Also.... a white burden takes 2 hours. Literally. That's what the normal amount of time is when you set it to wash a white load. He also said at the end of a cycle that he had 1 minute left and it takes 7-10 minutes (minimum). Our washing turf is also somehow filled with water after we have done with a load. In addition, the area where the soap and bleach go disrupted with black music. I clean it frequently and still require a lot of maintenance to keep clean. When it turns out I oath the whole house moves. Seriously though.... stuff on our stove movement when it turns. Stay away from this wash and buy something else for your good. NonnieStruble Frustrated at Michigan 2017-09-05 Towers she holds a good amount of clothes, clean well.. the door is seriously defective, has been replaced twice, at my own price, and still doesn't stay closed, keep buzzing without starting.. trying western Islip, nway 2017-03-31 got the He2 sector as well over 5 years ago and beckoning a bad combo. Sector just failed thermal funds and Housing blower is full of junk because of a very poor design for the litt trap. Wash color regularly and seem to get confused with towels or mixed items. Take forever to make the final 1 minute. Loads are often always wet so there to run the short chronic cycle. Hiding the pump screen is also a terrible design. We just left the lower panel. KennethJB Toronto, Canada 2016-10-04 This tower is. Most frustrating washing machine EVER. A normal cycle is supposed to take 54 minutes but actually takes 80-85 minutes. Many times when the cycle is done, the clothes still soak wet and no cycle turn only so you have to shunk and turn again. Large waste of water for a high efficiency product. I wouldn't recommend this to wash anyone. I only gave it one star because I couldn't post this with no stars! DawnM16 Halifax, NS 2016-08-07 Strong N Kenmore HE2 often stops on giving up the cycle and won't continue. We wasted a lot of water trying to get him to work. It's a headache. The inside is still wet. I expect a wash in the last of more than 8 years. We are \$300 off our most recent repair and are giving up and buying a new car. csggk Vermont 2016-04-14 strong 65.3 65.3
