I know this question has been here a few times already, but all the answers are inconclusive. First of all, I'm talking about usable merchandise, not Kodama's head. What exactly is the purpose of the habitable Kodama Cup? I've read people who say it helps you find kodama or point to the direction in which it is located, if you have not yet found everything in the level or allows you to reuse hot spring. Did anyone confirm any of these? Page 2,25 comments
