Questions? Please call the District Office at 360-825-1631. Time warning: DNR managed lands and camps have begun to open. Some amenities may not be available. You can find the latest information about openings here. See the list of additional action changes related to covid-19 Discover the most beautiful holiday destinations in the state. Public Land Commissioner Hilary Franz runs the DNR's diverse recreation of more than 3.3 million acres of public trust - everything from hiking, mountain biking and horse riding to paragliding, rock climbing and off-road racing. Our leisure facilities take place in healthy forest ecosystems, which we also manage for wood production. The funds earned from sustainable work forests generate revenue for local county services, public school construction and universities. So, with our country's trust in the lands to do more than our adventures, they also support the people of Washington. Visit our Where to go, what to do on the website to learn more about leisure options dnr manages land. Waiting for your new favorite spots for all your favorite outdoor activities. Check out our interactive leisure map to explore DNR holiday sites across the country. The map highlights all DNR runways, camps, day-to-day areas and more. Before you head out on your next adventure, make sure you have your Discover Pass. Discover Pass is required to access the resting places of DNR managed land with your vehicle. The annual Discover Pass is transferable between two vehicles and must be displayed on its windshield while parked on DNR sites. Discover Pass is not required if you just want to drive through the area and are going to leave your vehicle. For more information, discoverpass.wa.gov and find the Discover Pass seller nearby. Don't forget to check the leisure warnings in the area you're interested in visiting. We work hard to keep you aware of trail closures, restrictions, repairs, and activities around our sites. Leisure sites are updated daily when notifications occur. Give back to the DNR recreation areas you visit most by attending the Labor Party, serving as a camp host, or protecting our country's lands with Forest Watch volunteers. Go to our volunteer page for more information. Or look to be part of the Puget Sound Protection Corps, a subset of the Washington Defense Corps. Volunteers also have the option to earn a free Discover Pass if they volunteer for 24 hours or more for certain projects. More information about earning a free pass can be found here. Want to know more about how we plan different dnr-managed lands? Visit our holiday planning page to see our adopted plans and policies and current planning projects. We want people to continue to enjoy the areas of trust and natural areas of our country for future generations, and that means that we are now doing our part to preserve these beautiful landscapes. For your safety and safety of our plants and wildlife, follow these instructions when you restart: Get ready. Check out the rules and special considerations in the area you plan to visit. Make sure you are prepared for weather, hazards, and emergencies. Don't leave a trail. The DNR manages a 1,200-mile trail - and grows. To avoid soil erosion and trampling fragile vegetation, stay on our established trails and use only established campsites. In areas that allow scattered backcountry camping, choose a site away from the water and trails with minimal impact on the plant. It in, out. If you bring it into the woods, make sure you bring it out. Food and rubbish that is abandoned or mis disposed of can attract wildlife and create potentially dangerous situations for visitors. Please pack all groceries and garbage. NEVER feed wildlife. Don't take things out of the woods. DNR allows you to clean up in some of your places. You can brush the rules of these activities here. Outside of these activities, help us preserve the land. Do not build structures or disturb vegetation and fauna. Avoid introduction or transport of invasive species. Be careful with the fire lights. Be sure to check the fire restrictions before going out. Bonfires are permitted on DNR-managed land only in approved fire pits and are permitted only if the fire-burning restriction is not in place. Keep shovels and buckets of water nearby and never walk away from a glowing bonfire. Put the light on before leaving cold - if it's too hot to touch, it's too hot to leave. Stay safe. Observe our wildlife remotely and never attempt to touch or feed them. Secure food supplies and trash. Getting used to human food and rubbish changes their natural behaviour and creates dangerous situations for animals and our visitors. Respect the others on the track. Make sure everyone has the opportunity to enjoy nature. Keep your dog on a leash or under strict voice command if you're mountain biking or riding. You can also learn when and how to give other users a trail here. Here.
