Nursing care plans nursing diagnosis and intervention paperback

The most comprehensive nursing care care plan book available, the Nursing Care Plan, has more than 200 care plans covering the most common medical-surgical nursing diagnosis and clinical problems in the 7th edition. Like previous versions, authors Meg Gulnik and Judith Myers carefully updated the content to ensure that it reflects the most current clinical practice and professional standards in nursing, while still maintaining the easy-to-use, reader-friendly format that makes this book so unique. Acting as two books in one, it provides you with a collection of 68 nursing diagnosis care plans to use as starting points for creating personal care plans and a library of 143 disease-specific care plans for medical-surgical conditions most often encountered in nursing practice. The care plan includes the most comprehensive array of any nursing care plans found in the book, with 68 nursing diagnosis care plans and 143 disease/disorder/process care plans, for a total of 211. An introductory chapter explains essential concepts such as care plans, components of NIC and NOC classification systems and ways to create care plans. Pre-formatted nursing diagnosis care plans include a nanda definition, brief description of diagnosis, related NOC results and NIC intervention, related factors, defining characteristics, expected results, ongoing evaluation and medical intervention. The care plans for pre-formatted disorders include synonyms for disorder (for ease of cross referencing), a clear and concise definition of the disorder, related factors, defining characteristics, expected results, NIC intervention and NOC results, ongoing evaluation and medical interventions for each relevant nursing diagnosis. Eye-catching icons distinguish between dependent and independent interventions to help you better understand how to act in collaboration with the health team. The text in an online care plan constructor on the Partner Evolved website includes all 68 nursing diagnosis care plans, allowing you to customize care plans for an individual patient. In addition, 25 pre-formatted bonus medical-surgical care plans are given to watch online or printing. The updated content includes the latest evidence-based data and best practice guidelines so you can provide the highest quality nursing care. Revised and extended arguments include explanations for nursing interventions so you can understand what the nurse does and why. Extended and more specific outcome details for each nursing diagnosis help you develop measurable patient outcomes. The new material on patient safety and preventable complications addresses national initiatives and discusses the nurse's responsibility in preventing complications such as falls, pressure ulcers, infections, etc. QSEN competencies are integrated throughout. 11 New Disorder Care Plans in Are: Pulmonary Pulmonary Cystic fibrosis carpal tunnel syndrome peptic ulcer fibromyalgia solid organ transplantation hemodialysis breast low reduction pelvic relaxation disorder hyperthyroidism psoriasis 6 new nursing diagnosis care plans include: Impaired dentation disturbed energy area after advanced immunization sedentary lifestyle - Trauma Syndrome Rehabilitation Stress Syndrome 1: Use of Nursing Care Plans to Improve Personal and Care Section 2: Nursing Diagnosis Care Plan Activity Intolerance Ineffective Airway Clearance Latex Allergy Response Aspiration Upset Body Image Intestinal Incontinence Risk for Ineffective Breathing Patterns Cardiovascular Production Impaired Oral Communication Chronic Confusion Compromises Family Combating Constipation Ineffective Police Impaired Dentation New! Diarrhea Upset Energy Sector New! Risks to Falls Disrupted Family Procedures Fatigue Fear Reduction Fluid Volume Excess Fluid Volume Impaired Gas Exchange Grieving Complex Grieving Health-Behavior Demands Ineffective Health Maintenance Impaired Home Maintenance Frustrating Hyperthermia Extended Immunization for Hypothermia Readiness New! Functional urinary incontinence reflex urge urinary incontinence stress incontinence urinary incontinence infections risk less intractable adaptive ability for insomnia lack knowledge-sedentary lifestyle new! Impaired Memory Impaired Physical Dynamics Nausea Noncompliance Unbalanced Nutrition: Unbalanced Nutrition Less Than Body Requirements: Impaired Oral Mucous Membranes Over Body Requirements New Trauma Syndrome Alter Acute Pain! Self-care deficit situational low self-esteem Upset sensory perception: auditory upset sensory perception: visual ineffective sexuality pattern risk for impaired skin integrity Spiritual distress impaired swallows ineffective therapeutic diet management impaired tissue integrity Ineffective tissue perfusion: Peripheral, cardiopulmonary, cerebral urine retention Useless ventilator pring response Section 3: Cardiac and vascular care plan acute coronary syndrome/myocardial enzyna pectoris, Stable aortic aneurysm, abdominal cardiac rehabilitation Coronary Bypass/Valve Surgery Postoperative Care Dysethymias Heart Failure, Chronic/Cardiomyopathy Hypertension Mitral Valve Prolapse Pacemaker/Cardioverter-Defibrillator Percutaneous Balloon Valvuloplastii percutaneous coronary intervention: PTCA, Atherectomy, Stent, Cardiac Catheterization Peripheral Artery Bypass: Postoperative Care Peripheral Artery Oxulve disease, Chronic Pulmonary Edema, Acute Pulmonary Hypertension New! Shock, Anaphylactic Shock, Cardiogenic Shock, Hypovolemic Shock, Septic Deep Vein Thrombosis Venous Insufficiency, Chronic Section 4: Pulmonary Care Plan Acute Respiratory Defense Syndrome (ARDS) Chest Trauma Chronic Obstructive Pulmonary Disease (COPD) Cystic Fibrosis New! Head & Noble Cancer Lung Cancer Mechanical Ventilation Pass-Drowning * Obstructive Sleep Apnea Pneumonia Pneumonia Pneumothorax Chest Tube Pulmonary Thromboembolism Respiratory Failure, Acute Severe Acute Respiratory Syndrome (SARS)* Thorotomy Trachostomi Tuberculosis Section 5: Neurologic Care Plan Alzheimer's Disease/Dementia Amyotrophic Lateral Sclervease (ALS) * Carpal Tunnel Syndrome New! Cerebral Arterial Aneurysm: Preoperative/Uncised * Cerebrovascular Accident (CVA) Craniotomy Head Trauma Headache: Migraine, Cluster, Tension, Sinus Intracranial Infection Low Back Pain/Pain Herniated intervertebral disc Lyme Disease * Multiple Sclerosis Myasthenia Gravis * Parkinson's Disease Seizure Activity Spinal Cord Injury, Autonomous Dysreflexia Transient Ischemic Attack/Carotid Andarectomy Risk for West Nile Virus * Section 6: Gastrointestinal and Digestive Plan Stomach Surgery Bowel Diversion Surgery: Colostomi, Ileostomy Chocytitis/Cholestotomy Cirrhosis Colorectal Cancer External Tube Feeding Gastrointestinal Bleeding Hemorrhoids/Hemorrhoids OPRIMARI * Hepatitis Inflammatory Bowel Disease Obesity/Bariatric Surgery Pancreas Peptic Ulcer Disease New! Total Parent Nutrition Section 7: Musculoskeletal and Connective Tissue Care Plan Amputation Arthroscopy Fibromyalgia New! Fracture: Extreme and pelvic joint replacement: Total Hip, Knee, ShouJudith L. Myers, Meg Gulnik © 1996-2015, Amazon.com, Inc. or its colleagues bestselling nursing care plans on the market Book, Nursing Care Plan: Diagnosis, Intervention, and Outcomes, version 8 covers the most common medical surgery problems seen in nursing diagnosis and clinical adults. This includes 217 care plans, each of which reflects the latest evidence and best practice guidelines. There are two new chapters for this version, including the new 13 new care plans and care plans that address basic nursing concepts with health promotion and risk factor management that apply to multiple body systems. Written by specialist nursing teachers Meg Gulnik and Judith Myers, this reference serves as two books in one, with 147 disorder-specific and health management nursing care plans and 70 nursing diagnosis care plans to use as starting points in creating personal care plans. The 217 care plans --- more than any other nursing care plan book. The 70 nursing diagnosis care plans include the most common/important Nanda-I nursing diagnosis, which provide building blocks for you to make your personal care plans for your own patients. Almost every common medical-surgical condition covers 147 disorders and health promotion care plans, which is conducted by the body system. Priority care plan guidance organizes care plans for risk diagnosis from real, from general to specific interventions, and from independent intervention. The format of nursing diagnosis care plans includes definition and clarification of diagnosis, related factors, defining characteristics, expected results, related NOC results and NIC intervention, ongoing evaluation, medical intervention, and continuity of education/care. The format of disorder care plans include synonyms for disorder (easy to cross refer to), clarification of diagnosis, general related factors, defining characteristics, expected results, NOC results and NIC interventions, ongoing evaluation and medical intervention. Icons differentiate between independent and collaborative nursing intervention. Student resources on the Developed Partner website include 36 of the book's care plans --- 5 nursing diagnosis care plans and 31 disorders care plans. Use Nursing Tissue Plans to Personalize and Care Nursing Diagnosis Care Plans Health Promotion and Risk Factor Management Care Plans New! Basic Nursing Concepts Care New Plan! Cardiac and Vascular Care Plans Pulmonary Care Plans Neurological Care Plans Gastrointestinal and Digestive Care Plans Musculoskeletal and Connective Tissue Care Plans Hematolympatic, Immunological, and Oncological Care Plans Renal and Urinary Tract Care Plans Men's Health Care Plans Women's Health Care Plans Endocrine and Metabolic Care Plans Integumentary Care Plans Index Language: English Copyright: © Mosby 2014 Published: 30th January 2013 Imprint: Mosby eBook ISBN: 9780323113564 eBook ISBN: 9780323186919 PhD, RN, FAAN, Professor Emeritus, Marcella Niehoff School of Nursing, Loyola University Chicago, Chicago, Illinois MSN, RN, Formerly Assistant Professor of Nursing, Grand View University, Des Moines, Iowa Iowa
