The most comprehensive health care planning available, Nursing Care Plan, 7th edition features more than 200 care plans covering the most common medical diagnosis and clinical problems. As in recent editions, authors Meg Gulanick and Judith Myers meticulously updated content to ensure it reflects the most current clinical practice and professional standards in retirement, while still maintaining the easy-to-use format, reader-friendly format that makes this book so unique. Functioning as two books into one, it provides you with both a collection of 68 diagnostic retirement plans to use as starting points for creating individualized care plans and a library 143 specific disease care plans for medical-surgical conditions most often encountered in retirement practice. Includes the most extensive array of care plans found in any nursing care planning book, with 68 diagnostic care plans and 143 disease/disease/care procedures, for a total of 211. An introductory chapter explains essential concepts such as the components of a care plan, NIC and NOC classification systems, and how to create a care plan. Pre-formatted care plan diagnostic pre-format includes a NANDA definition, a brief explanation of the diagnosis, relating results to NOC and NIC interventions, related factors, defined characteristics, expected results, ongoing assessment, and intervention capabilities. Pre-format care plans include synonym for the disease (for ease of cross reference), a clear and successive definition of the disease, related factors, defined characteristics, expected results, NIC interventions and NOC results, ongoing evaluations, and retirement interventions for each relevant retirement diagnosis. Eye icons – Keep differentiated between dependent and independent interventions to help you better understand how to function in collaboration with the healthcare team. An Online Care Plan on the Companion Evolve Website includes all 68 nurses to diagnose care through the text, enabling you to customize care plans for an individual patient. In addition, 25 pre-format medical-surgical bonus plans are provided for online viewing or printing. Updated content incorporating the latest evidence-based data and best guidelines practicing to help you provide the highest quality retirement care. Reviewing and expanding rationales includes explanations for retirement intervention to help you understand what the nurses do and why. Increased and more specific result statements for each retirement diagnosis help you develop measurable patient results. New content on patient safety and complications prevent addressing national initiatives and discussing the nursing's responsibility in preventing complications such as collapse, ulcer pressure, infection, etc. QSEN skill sets are integrated throughout. 11 new Parkinson's care plans include: Pulmonary Fibrosis Cystic Fibrosis Capillary Tunnel syndrome peptic Ulcer Fibromyalgia Solid Organ Clerk emodialysis reduction feeding pelvic diverting disease hyperthyroidism Ps 6 New Retirement Retirement Care Plans Include: Impaired Dentition Distributing Energy Field Preparation for Boosting Immunization Sedante Lifestyle Post-Chuma Stress Relocation Syndrome Syndrome Insection 1: Use N Plan Insurance for Individualized and Improved Care Section 2: Nurse Diagnostic Plan Care Activity Plan Activity Inlerance Effective Airway Clearance Latex Alexergy Response Anxiety Risk Aspiration Disturbance Co Image Bowl Incontinence Effective Model Breathing reduces productive cardiac problems with Problem Verbal Communications Chronic Confusion compromising the copied family's efficient corporations that have trouble dentition NEW!
