Wordly wise pdf book 3

Three thousand carefully selected words taken from literature and SAT tests are the basis of this program, which teaches new words through reading and writing exercises and various fun activities. Designed with a 10-minute learning activity on weekdays, each lesson is completed within a week. The list of vocabulary of 15 words begins with a vocabulary that defines the words. Then the exercises follow – filling an empty sentence to fit the word, adapting each word to the situation, forming sentences with new words, etc. Each lesson ends by reading a narrative of the subjects of sciences, arts and humanities, which include all new vocabulary words in context. The word-wisdom section gives an interesting history of words and generally shows confused words and their meanings. Vocabulary words are reviewed from previous lessons through a crossword puzzle and hidden message puzzles. An online connection to a quiz game that helps students manage their vocabulary words is provided with a book code. There are 168 pages of books. The answer key is sold separately.
