Yoink executor scripts

HYNOS HomeExploitsScriptsDiscord Login An old update does not mean that the program is no longer working. Some exploits use bootstrappers/auto-updates, so updates can be made without repeatedly downloading the exploit. * DLL exploits require a DLL injector * Disable your anti-virus protection if you can't download! Due to the nature of the exploits (obfuscation, game manipulation, etc.), they are incorrectly marked as viruses/malware. * Are you having trouble injecting your DLL? Try to install it * Most DLL exploits are patched every week, so you want to check the site frequently for updates and unpatches. * WeAreDevs does not develop for operating systems other than Windows. * Most software found on WeAreDevs.net will work well on 32bit and 64bit operating systems (Windows 7+). * See Insecure Connection Error? A firewall, YOUR ISP, or modem/router blocks the download. Disclaimer: Not every software found on WeAreDevs.net is created by us. If you are the creator of something found on WeAreDevs and would like it to be removed, please send us an email to contact@wearedevs.net. Last Update: Note: An old update date does NOT mean that the software is not working. Some software has auto-updater. The above date is only the last date on which its information was updated on our server. Both IUSING X and TRICKSploit are brand new Powerful Level 7 script executors, currently free. They offer a private API and very unique designs. In addition, pre-built scripts are available in the Script section of the Executors, including hacks for popular games like Ninja Legends, Jailbreak, Murder Mystery 2, etc. For some games, such as Jailbreak and Ninja Legends, Auto Farm Hacks are provided. Why choose our script executors? First of all, a lot of time and effort was put into a strong team of developers and designers to create this powerful, neat not the most powerful free script executor. Also our executor packs a beat, with a brand new design and more features, you will feel fresh when you use this Exploit Private Hack - we have our private API, making it harder for Roblox to patch these exploit updates - this exploit is updated every week! No Key System - No Key System = No long waits to start your exploit. Open it and your ready to go! More features coming soon! Steps to download: Click on the download button above As soon as the link opens click on Download as Zip in the upper right side of the screen (you need for this) Once your files come, extract it to your desktop Open the extracted folder Then navigate to 'IUSING X' Ope it Wait for exploit to load Join game game Press 'Attach button' Select a script from the script list or use your own press execution! (Note:If you are having trouble downloading, or if the file is detected as a virus, temporarily disable your antivirus software. All Roblox exploits detected Viruses because honestly, they are. Since they run scripts to another program (in this case roblox) it is a virus, but it only affects the application 'Roblox', so you can actually change the code of the software (Roblox). I hope you understand this. Feel free to leave this website if you feel insecure). GUI with auto farm for any type of mob, complete quests automatically & more! become all the heroes you want! Automatically delete every single dungeon on treasure hunt. Farm for items and gold while you are afk! Fully automatic Bloxburger farmer, compatible with all jobs and bypasses anti-cheat.
