Yu-Gi-Oh! - The Sacred Cards operate on all your devices with high quality. The game is based on Yu-Gi-Oh! Anime and released in 2002 for Game Boy Advance. The basis of this card game is one in a hand-to-hand match where different monsters pit together, and the aim is to reduce the opponent's life to the ground. Sacred Cards contains all the interesting, important elements of duel gameplay in an RPG atmosphere. Players roam around Battle City, and the Kaiba Group is sponsoring a Yu-Gi-Oh tournament. Players must challenge other Yu-Gi-Oh hand-to-hand lists. If the player defeats the opponent with a Locator card, they win their cards and challenge the other opponents. The battles are similar to Yu-Gi-Oh! A card game where players take a turn and remove creatures that can attack each other, and Duellist who runs away from the losing accent. Each win increases the level of players that will give them the ability to have and use stronger cards. The rules of the game are little different from the real card games. A prime verdict is not in the actual card game, such as water fire beats; dam electricity. Initially, the player and his friends Joey Wheeler and Yugi Moto prepare for the card game competition: Duel Monsters. To win the tournament, the player must have all six Locator cards, and only then can the player participate in the final. Marik has a group of demons to steal Egyptian cards and break up the battle so that he can bring darkness into the world. The demons control the city, and the card shop owner cooperates with Marik and tries to kill the player. Then comes Ishizu Ishtar, who challenges the player to see if he can keep a God card. After her victory, the player faces Seto Kaiba to get the first God card. After the player defeats Marik in the final, it is revealed that it is one of Marik's servants disguised as him. The real one is one of Yugi's friends, Namu. Now, the player must defeat Marik to save the world. Best fake for Yu-Gi-Oh! - The sacred cards You will ask a pre-game game boy to play this game.
